### **Enzyme activity determination using ultrasound ...**

Enzyme activity will be measured using gelatinised starch solutions with the addition of  $\alpha$ -amylase or diastase ( $\alpha$  and  $\beta$  amylase derived from malt) to catalyse the breakdown of the starch Measurements will be taken to determine the ultrasound velocity as the starch solution is metabolised by the enzyme

### **Enzymes: Amylase Activity in Starch-degrading Soil Isolates**

Enzyme activity (reaction rates) is dependent upon the environmental conditions either in nature or in the laboratory (eg temperature, pH, etc) This is because these conditions can alter the amino acid side chains in a protein, affecting protein structure and folding and sometimes the enzyme's active site
