Sustainable Consumption and Production in Asia and the Pacific

Considers not only the environmental outcomes of an individual business, but also its contribution to its business sector and the natural environment. Author from Macquarie University, Australia.

## United Nations Publications Catalogue

A comprehensive review of contemporary research in management accounting. Provides a thorough critical analysis of recent issues published in the management accounting literature and identifies gaps for future research in each issue reviewed.

## Blueprint for a Sustainable Economy

This exciting book is one of the first textbooks in this fast growing field. Contributed to, and edited by an impressive array of internationally renowned authorities, it draws on real life examples and case studies.

## National Sustainable Development Planning

This book discusses recent developments relating to ethical and sustainable issues in accounting & finance. Accounting is often seen as a technical discipline that records, classifies and reports financial transactions. However, since the financial information produced concerns all interest groups both within and outside the enterprise, accounting also has social characteristics and involves multi-faceted duties and responsibilities. As such, in addition to basic principles and accepted rules and standards in the field, this book focuses on the ethical aspects and fundamentals of this profession that accountants should also take into

consideration, as this is the only way to build and preserve society's confidence in accounting and increase its social credibility.

### The Future of Forests in Asia and the Pacific

Sustainable development will not happen without substantial contributions from and leading roles of companies and business organizations. This requires the provision of adequate information on corporate social and ecological impacts and performance. For the last decade, progress has been made in developing and adapting accounting mechanisms to these needs but significant work is still needed to tackle the problems associated with conventional accounting. Until recently, research on environmental management accounting (EMA) has concentrated on developed countries and on cost – benefit analysis of implementing individual EMA tools. Using a comparative case study design, this book seeks to redress the balance and improve the understanding of EMA in management decision-making in emerging countries, focussing specifically on South-East Asian companies. Drawing on 12 case studies, taken from a variety of industries, *Environmental Management Accounting: Case Studies of South-East Asian Companies* explores the relationship between decision situations and the motivation for, and barriers to, the application of clusters of EMA tools as well as the implementation process itself. This book will be useful to scholars interested in the environmental and sustainability management accounting research field and those considering specific approaches to EMA within emerging economies.

## Sustainable Welfare in the Asia-Pacific

Managerial Accounting is characterised by a strong pedagogical framework and a dynamic and practical approach that directly demonstrates how students can develop their careers in real life. The text introduces students to the underlying concepts and applications of management accounting tools based on the traditional allocation approach and absorption costing method, and uses Staircase exercises in each chapter to build knowledge and help learners to link the content between chapters as they progress through the book. This title uses easy-to-understand, student-friendly language, uncomplicated examples, a logical discussion of concepts that matches student learning processes, and clear visual explanations that support student understanding.

'Environmental Taxation in China and Asia-Pacific contains a rich collection of papers addressing issues of vital importance to policy formulation in a spectrum of environmental areas. While not everyone would agree to all that is said in each of the papers, the book will certainly trigger fruitful debates. It is also a great source of information on environmental policy developments in major economies that will need to play an increasing role in addressing major issues such as climate change mitigation.' Nils Axel Braathen, Principal Administrator OECD, Environment Directorate 'Another outstanding volume on environmental taxation, this time with focus on China and the Asia-Pacific. Legal, economic and policy contributions offer great insight in the present situation and future developments in this fascinating part of the world.' Kurt Deketelaere, K.U. Leuven, Belgium, University of Dundee, UK and University of Qatar

Environmental Taxation in China and Asia-Pacific contains an integrated set of detailed chapters providing insights and analysis on how fiscal policy can be used to achieve environmental sustainability. Highly topical chapters include energy tax policy in China, environmental fiscal reform, carbon tax policy in northeast Asia and environmental taxation strategies in China, Asia and Australia, as well as many other relevant topics. Written by distinguished environmental taxation scholars from around the world, the emphasis of this book is on finding solutions to environmental problems which merit serious consideration by policy makers as well as academics in environmental law and other academic disciplines.

## Education and Training at Tertiary Level in Environmental Economics

## Capacity Building for Environmental Law in the Asian and Pacific Region

Environmental and sustainability reporting involves nonfinancial and financial indicators of an organization's impact on environmental, economic, and social dimensions of their operations. This book is intended for MBA students, executives, and managers who can discover the internal and external benefits of environmental and sustainability reporting, the basics of reporting, and the reaction of the investment community.

## The International Journal of Accounting Volume 37, Number 1, 2002

This is the fourth in a series publishing the best contributions on environmental management accounting (EMA) from around the world. This volume brings together international examples of leading thinking and practice in this rapidly developing area. This is the most comprehensive volume to date covering theory, practice and case studies on sustainability accounting and reporting. It covers tools, frameworks, concepts as well as case studies and empirical analysis.

## Annual Report

### Advancing Sustainability Management Accounting in the Asia Pacific Region

### Applicability and Use of Natural Resource Accounting and Environmental Economics in Small Island Developing States

### A Handbook for Integrated Economic and Environmental Planning at the Subnational Level in Asia

This book advances the understanding of corporate sustainability and challenges and roles of sustainability accounting in the Asia-Pacific region. The Asia-Pacific region has shown fast economic growth for several decades which is expected to continue. In this context, Asia has become the “production engine” of the global economy. At the same time scientific reports reveal that some planetary boundaries are crossed, for example relating to biodiversity and climate change. Companies in the Asia-Pacific region are therefore increasingly challenged to reduce their environmental impacts, to document their social contribution and to contribute to sustainable development. Key approaches to identify sustainability problems and challenges,

## Bookmark File PDF Accounting For Sustainability Asia Pacific Perspectives Eco Efficiency In Industry And Science 33

to support improvement processes and to back up sustainability contributions include accounting and reporting. In contrast to the high relevance of accounting and reporting for corporate sustainability for the Asia-Pacific region, academic research has so far been dominated by Western researchers and pre-dominantly dealt with Western and Japanese cases and approaches. It is thus time to take account of Asian perspectives on accounting and reporting for sustainability in the Asia-Pacific region.

### Implications of the Asian Crisis on Sustainable Industrial and Technological Development in the Asia-Pacific Region

National, sectoral, and international approaches to environmental law education are integrated in this comprehensive resource on environmental law in Asian and Pacific countries. A broader definition of sustainable development that incorporates social, cultural, and economic dimensions facilitates consideration of social justice and equity in environmental law. Specific environments including freshwater ecosystems, forests, and intercoastal zones are discussed in this volume, including information on biological diversity, climate change, and sustainable development.
