True story of Japan's WWII 'human experiments' at Unit  
731

Human skin works as barrier, preventing the entry of pathogens,  
among other functions. Reynolds et al. used single-cell sequencing  
to generate an atlas of the human skin from both developing and  
adult sources, identifying differences and similarities across  
heterogeneous populations of skin cells. In this atlas, gene  
expression in the two disease states studied—atopic dermatitis and
