The Imperial Archive

"This collection of fourteen new essays on Gilman's mixed legacy - her vision for a truly humane, egalitarian world alongside her persistent presentation of class, ethnic, and racial stereotypes - underscores the contemporary relevance of Charlotte Perkins Gilman (1860-1935). Gilman enjoyed a worldwide reputation as a writer, lecturer, and socialist, and her prodigious output (novels, stories, poetry, lectures, journalism, theoretical works) stands as a major contribution to modern feminist thought on important, contested economic and social issues. After her death in 1935, she was virtually forgotten. With the revival of the women's movement in the 1960s and 1970s, however, Gilman was "rediscovered," her arguments deemed prescient by late-twentieth-century feminists." --BOOK JACKET. The Big Book of Modern Fantasy

The Western tradition of excluding women from leadership and disparaging their ability to lead has persisted for centuries, not least in Germany. Even today, resistance to women holding power is embedded in literary, cultural, and historical values that presume a fundamental opposition between the adjective "female" and the substantive "leader." Women who do achieve positions of leadership are faced with a panoply of prejudicial misconceptions: either considered incapable of leadership (conceived of as alpha-male behavior), or pigeonholed as suited only to particular forms of leadership (nurturing, cooperative, egalitarian, communicative, etc.). Focusing on the German-speaking countries, this volume works to dismantle the prevailing disassociation of women and leadership across a range of disciplines. Contributions discuss literary works involving women's political authority and cultivation of community from Maria Antonia of Saxony to Elfriede Jelinek; women's social activism, as embodied by figures from Hedwig Dohm to Rosa Luxemburg;

women in political film, environmentalism, neoliberalism, and the media from Leni Riefenstahl to Petra Kelly to Maren Ade; and political leaders Hillary Clinton and Angela Merkel. The essays achieve a deeper understanding of the historical roots and theoretical assumptions that inform ideas and realities of German female leadership. In this book, first published in 1985, Ernest G. Bormann explores mass persuasion in America from 1620 to

1860, examining closely four rhetorical communities: the revivals of 1739?1740, the hot gospel of the postrevolutionary period, the evangelical revival and reform of the 1830s, and the Free Soil and Republican parties. Each community varies greatly, but Bormann asserts that each succeeding community shares a rhetorical vision of restoring the "American Dream" that is essentially a modification of the previous visions. Thus, they form a family of rhetorical visions that constitutes a rhetorical tradition of importance in nineteenth-century American popular culture.

Slavoj Žižek is, without doubt, one of the most stimulating and vibrant thinkers of our time, and his idiosyncratic blend of Lacan and Hegel is always sparkling with insight and studded with amusing stories, anecdotes and jokes. In *The Plague of Fantasies* Žižek approaches another enormous subject with characteristic brio and provocativeness. The current epoch is plagued by fantasms: there is an ever intensifying antagonism between the process of ever greater abstraction of our lives—whether in the form of digitalization or market relations—and the deluge of pseudo-concrete images which surround us. Traditional critical thought would have sought to trace the roots of abstract notions in concrete social reality; but today, the correct procedure is the inverse—from pseudo-concrete imagery to the abstract process which structures our lives. Ranging in his examples from national differences in toilet design to cybersex, and from intellectuals' responses to the Bosnian war to Robert Schumann's music, Žižek explores the relations between fantasy and ideology, the way in which fantasy animates enjoyment while protecting against its excesses, the associations of the notion of fetishism with fantasized seduction, and the ways in which digitalization and cyberspace affect the status of subjectivity. To the already initiated, *The Plague of Fantasies* will be a welcome

The Magazine of Fantasy & Science Fiction

Daydreaming, our ability to give 'to airy nothing a local habitation and a name', remains one of the least understood aspects of human behaviour. As children we explore beyond the boundaries of our experience by projecting ourselves into the mysterious worlds outside our reach. As adolescents and adults we transcend frustration by dreams of achievement or escape, and use daydreaming as a way out of intolerable situations and to help survive boredom, drudgery or routine. In old age we turn back to happier memories as a relief from loneliness or frailty, or wistfully daydream about what we would do if we had our time over again. Why is it that we have the ability to alternate between fantasy and reality? Is it possible to have ambition or the ability to experiment, create or invent without the catalyst of fantasy? Are sexual fantasies an inherent part of human behaviour? Are they universal, healthy, destructive? Is daydreaming itself destructive? Or is it a force which facilitates change and which can even be harnessed to positive advantage? In this provocative book, originally published in 1975, the product of the previous twenty-five years of research, the author debates the nature and function of daydreaming in the light of his own experiments. As well as investigating what is a normal 'fantasy-life' and outlining patterns and types of daydreaming, he describes the role of daydreaming in schizophrenia and paranoia, examines the fantasies and hallucinations induced by drugs and also the nature of altered states of consciousness in Zen and Transcendental Meditation. Among the many topics covered, he explains how it is possible to help children enlarge their capacity for fantasy, how adults can make positive use of daydreaming and how people on the verge of disturbed behaviour are often unconscious of their own fantasies. Advances in scientific methods and new experimental techniques had

made it possible at this time to monitor both conscious daydreaming and sub-conscious fantasies in a way not possible before. Professor Singer is one of the few scientists who have conducted substantial research in this area and it is his belief that the study of daydreaming and fantasy is of great importance if we are to understand the workings of the human mind.

M. R. James was born in Kent, England in 1862. James came to writing fiction relatively late, not publishing his first collection of short stories – *Ghost Stories of an Antiquary* (1904) – until the age of 42. Modern scholars now see James as having redefined the ghost story for the 20th century and he is seen as the founder of the 'antiquarian ghost story'. We are republishing these classic works in affordable, high quality, modern editions with a brand new introductory biography of the author.

Not just another book on Star Wars, "The Reign of Fantasy" provides an explanation for the program's monumental political support during the Reagan years. The fundamental argument of the book is that the more fantastic the Star Wars proposal became, the greater the political success of the SDI program. And, though its primary focus is on Star Wars, the book's greatest contributions lie in the broader questions it raises concerning presidential leadership. What is the role of utopian visions in presidential politics? How could a surreal dream actually drive strategic policy? What are the future implications of Reagan's reign of fantasy to American-style democracy?

What is the role of literature in the formation of the state? Anthony J. Cascardi takes up this fundamental question in *Cervantes, Literature, and the Discourse of Politics*, a comprehensive analysis of the presence of politics in *Don Quixote*. Cascardi argues that when public speech is constrained, as it was in seventeenth-century Spain, politics must be addressed through indirect forms including comedy, myth, and travellers' tales. *Cervantes, Literature, and the Discourse of Politics* convincingly re-engages the ancient roots of political theory in modern literature by situating Cervantes within a long line of political thinkers. Cascardi notably connects Cervantes's political theory to Plato's, much as the writer's literary criticism has been firmly linked to Aristotle's. He also shows how Cervantes's view of literature provided a compelling alternative to the modern, scientific politics of Machiavelli and Hobbes, highlighting the potential interplay of literature and politics in an ideal state.

Protectors Diaries

"Situating non-violence at the cross-roads of the ethical and political, The Force of Non-Violence brings into focus the ethical binds that emerge within the force field of violence. Non-violence is very often misunderstood as a passive practice that emanates from a calm region of the soul, or as an individualist ethic with an unrealistic relation to existing forms of power. This book argues for an aggressive form of non-violence that struggles with psychic ambivalence and seeks to embody social ideals of inter-dependency and equality. Only through a critique of individualism can the ethical and political ideal of non-violence be understood in relation to the ideal of equality and the demand for grievability. In this psychosocial and philosophical reflection that draws upon Foucault, Fanon, Freud, and Benjamin, Butler argues that to oppose

violence now requires understanding its different modalities, including the regulation of the grievability of lives. The book shows how "racial and demographic phantasms" enter into the rationale for inflicting state violence and other modes of "letting die" by investing violence in those who are most severely exposed to its effects and subjugated to its lethal power. The struggle for non-violence is found in modes of resistance and movements for social transformation that separate off aggression from its destructive aims to affirm the living potentials of radical egalitarian politics"--

Canon Alberic ' s Scrapbook (Fantasy and Horror Classics)

While humanity has been telling fantastic stories for millennia, fantasy fiction has only come into its own as a genre in the latter half of the twentieth century, as the works of such writers as J.R.R. Tolkien and Robert E. Howard have found a wide audience. This wonderful collection celebrates fantasy's heyday with 33 masterpieces of short fiction, ranging from 1940s stories by L. Sprague de Camp, H.L. Gold, Fritz Leiber, and Manly Wade Wellman to more recent tales by such towering modern talents as Peter S. Beagle, Terry Bisson, James P. Blaylock Suzy McKee Charnas, John Crowley, Tanith Lee, Michael Swanwick, Judith Tarr, Howard Waldrop, Jane Yolen, and Roger Zelazny. Just as Gardner Dozois's Modern Classics of Science Fiction has helped longtime fans and new readers alike discover the genre's finest short stories, so too shall this anthology allow readers to find in one volume more than two dozen masterworks of fantasy.
