The Civilian Conservation Corps in Nevada is based on extensive research in private manuscript collections, unpublished memoirs, newspapers, CCC inspectors' reports, government documents, and other sources, as well as on interviews with CCC veterans and personnel. The book also includes period photographs depicting the Nevada CCC and its activities. This is the first comprehensive history of the Nevada CCC, a program designed to help the nation get back on its feet, and of the "boys" who did so much to restore Nevada's lands and resources - and who in the process became men.

The Civilian Conservation Corps was created in 1933 by U.S. President Franklin D. Roosevelt in response to the Nation's dire unemployment and imperiled natural resources. The CCC had a great impact on Louisiana by employing youth to work on conservation projects throughout the State. Although the influence and accomplishments of the CCC have been recognized widely, there is little specific information on enrollees and camps in Louisiana.

In the early 1980s, two water-supply systems on the Marine Corps Base Camp Lejeune in North Carolina were found to be contaminated with the industrial solvents trichloroethylene (TCE) and perchloroethylene (PCE). The water systems were supplied by the Tarawa Terrace and Hadnot Point watertreatment plants, which served enlisted-family housing, barracks for unmarried service personnel, base administrative offices, schools, and recreational areas. The Hadnot Point water system also served the base hospital and an industrial area and supplied water to housing on the Holcomb Boulevard water system (full-time until 1972 and periodically thereafter). This book examines what is known about the contamination of the water supplies at Camp Lejeune and whether the contamination can be linked to any adverse health outcomes in former residents and workers at the base.

Camping Colorado

From the New York Times bestselling author of *Band of Brothers* and *D-Day*, the definitive book on Lewis and Clark's exploration of the Louisiana Purchase, the most momentous expedition in American history and one of the great adventure stories of all time. In 1803 President Thomas Jefferson selected his personal secretary, Captain Meriwether Lewis, to lead a voyage up the Missouri River to the Rockies, over the mountains, down the Columbia River to the Pacific Ocean, and back. Lewis and his partner, Captain William Clark, made the first map of the trans-Mississippi West, provided invaluable scientific data on the flora and fauna of the Louisiana Purchase territory, and established the American claim to Oregon, Washington, and Idaho. Ambrose has pieced together previously unknown information about weather, terrain, and medical knowledge at the time to provide a vivid backdrop for the expedition. Lewis is supported by a rich variety of colorful characters, first of all Jefferson himself, whose interest in exploring and acquiring the American West went back thirty years. Next comes Clark, a rugged frontiersman whose love for Lewis matched Jefferson's. There are numerous Indian chiefs, and Sacagawea, the Indian girl who accompanied the expedition, along with the French-Indian hunter Drouillard, the great naturalists of Philadelphia, the French and Spanish fur traders of St. Louis, John Quincy Adams, and many more leading political, scientific, and military figures of the turn of the century. High adventure, high politics, suspense, drama, and diplomacy combine with high romance and personal tragedy to make this outstanding work of scholarship as readable as

Camping with the Corps of Engineers

Smart RV Travel Guide For The Lower 48 States List of RV & National Parks, the Cost, the Amenities, What to See and Do in Each State Smart RV travel guide For the Continental 48 states is a three-year compilation of all the RV parks and National parks in each and every state in the continental US. I outlined all the amenities they offer, the actual cost to stay and so much more. We gathered this data from our last three trips across all 48 states. I also included what to see, where to visit and what they are famous for in each of the states. For each state, I created a detail travel plan that covers everything that is worth seeing along with where to stay while visiting that state. There are 48 chapters, each representing one individual state. Each state is divided into three categories. "Suggested RV trips" - this is where I outline what the main attractions are for each of the states including cities, next I name each and every RV parks, the amenities they offer and what the costs are. Finally, I discuss all the state parks in each state and what perks and goodies they offer along with actual costs. By profession, I was in instructional design, where I designed various commercial and industrial training modules and helped create mini-guides which are far from writing an RV travel guide. I am not qualified to write such guides, but after our 3rd around the country trips, my wife made a convincing argument that people like us could truly benefit from such guides which we didn't have when we first started traveling around our great country. It took me little over nine months to gather all the information and start writing. It is a no-fluff guide with no storytelling as I am good at writing fiction, so I didn't even try, I stayed with the facts and information that I know is helpful to everyone that is looking to take a trip around our good

ole' USA. My wife and I were lucky enough to be able to retire at age 52. We both share one passion, and that is the beautiful wide open roads and to see this great vast country of ours. We were able to buy us gently used Class A Fleetwood Southwind for a very reasonable price. It is spacious, maybe a little too spacious for just two of us, but we love every bit of it. It drives beautifully, and the interior comfort is almost like a 5-star hotel. We both love living in it. We spend roughly five months out of the year on the road; we take a 2.5 month long trip around the lower half of the country during the spring, then another 2.5-3 month's long trip during late summer to early fall around the upper part of the country. Since we have been to each of the lower 48 states a dozen or so times and tried out various parks and amenities in every state. We have decided to share all our knowledge here with you. Enjoy the freedom of open roads.

Undaunted Courage

In 1933, President Franklin Roosevelt created the Civilian Conservation Corps (CCC) as part of his New Deal legislation. The CCC provided unskilled manual labor jobs related to the conservation and development of natural resources on rural government lands. The CCC was designed for men and to relieve families who had difficulty finding jobs. Over 3 million young men would serve in the CCC nationwide. In Rhode Island, from Newport to Glocester, and from North Smithfield to Hope Valley, camps popped up to remake our own state's natural public places. Today, the efforts of those proud young men can be seen still in various stages of restoration and decay. This book provides a unique photographic glimpse at what remains of this important piece of little-known Rhode Island history.

Smart Rv Travel Guide for the Lower 48 States

If you're looking to plan the grand trip of a lifetime, this book is for you! I have been traveling in my RV across North America full time since 2012. I was laid off from my corporate job as an accountant, and I needed a solution for living cheaply. I decided that it was more economical - and fun - to live fulltime on the road. Ever since, I have been keeping notes and records about the sort of RV parks, resorts, and campgrounds, where I have personally camped. I also asked around in my circle of other RV enthusiasts to compile the listings in this book. I decided to compound these notes into this comprehensive directory. Think of this book as a personally recommended and curated listing of RV parks, resorts, and campgrounds. I am mainly focused on how your experience would be at these locations while traveling in an RV specifically. I have

Online PDF Camping With The Corps Of Engineers The Complete Guide To Campgrounds Built And Operated By The U S Army Corps Of Engineers Weight Guides

not included many notes on primitive or tent camping, as all of these locations offer amenities such as electric and water hookups. Many locations in this directory do not offer tent camping sites. I have not sold any spots in this book to any of these businesses. None of them have paid to be a part of this listing. I chose the businesses to be included in this book as those places where either I personally stayed and had a great time or one of my friends in the RV community personally recommended it to me. You will notice that nearly every listing allows pets at their facility, as I know that our furry companions are very special to us, I wanted to make those listing a highlight for your vacation planning. There are also no national or state parks listed here. This is as complete a listing of private RV parks, resorts, and campgrounds as can be handpicked directly from those who are in the RV community. This is a straightforward directory listing of places to stay with your RV in the lower 48 continental United States. I have compiled the listings into their own tables, outlining the necessary qualities of each campground, including their physical address and phone numbers. The information is as current and accurate as I could possibly ensure it to be. Each table listing outlines: Street address Phone number Website (It will be clickable if you're reading the eBook version.) Operating days Price Discounts Offered Maximum width and length of the sites The total number of spaces offered Road conditions (paved, gravel, dirt) Any restrictions (for example, if they have any conditions concerning pets) A list of a few of the amenities the resort offers I have listed the campgrounds by state, and most of the states I have split into regions so you can better decide where you might stay by where you want to be in that state. AS A BONUS If you purchase the paperback version of this book, you can download the eBook version for FREE. The best thing about the eBook version is that the links to the websites of the resorts and campgrounds (if they have one listed) is hyperlinked and clickable. This could save you time when you're trying to research your vacation. Check out Robert Nichols' other books: "How to

RV Camping in National Parks

This informative guidebook lists all campgrounds in the United States built and operated by the U.S. Army Corps of Engineers, including summer and winter campground sites. Especially valuable for RV travelers and campers who are boaters and fishermen, the book includes all campsites with fishing and boating access located on or near lakes or streams managed by the Army Corps of Engineers. The Corps is renowned for keeping well-maintained sites, with inexpensive fees. Many of the campsites listed are in beautiful, little-known locations, too. Individual campground listings contain complete details about camping facilities, amenities, recreational activities available, RV park information, GPS and longitude/latitude information for each lake, and complete, easy-to-follow directions to get to each campground - which can be handy when traveling where internet signals can be difficult to receive. Concise overviews of the Corps of Engineers' projects at many sites are included for those curious about the works at many parks.

Many recognize Giant City State Park as one of the premier recreation spots in southern Illinois, with its unspoiled forests,

glorious rock formations, and famous sandstone lodge. But few know the park's history or are aware of the remarkable men who struggled to build it. Giant City State Park and the Civilian Conservation Corps: A History in Words and Pictures provides the first in-depth portrait of the park's creation, drawing on rarely seen photos, local and national archival research, and interviews to present an intriguing chapter in Illinois history. Kay Rippelmeyer traces the geological history of the park, exploring the circumstances that led to the breathtaking scenery for which Giant City is so well known, and providing insightful background on and cultural history of the area surrounding the park. Rippelmeyer then outlines the effects of the Great Depression and the New Deal on southern Illinois, including relief efforts by the Civilian Conservation Corps, which began setting up camps at Giant City in 1933. The men of the CCC, most of them natives of southern and central Illinois, are brought to life through vividly detailed, descriptive prose and hundreds of black-and-white photographs that lavishly illustrate life in the two camps at the park. This fascinating book not only documents the men's hard work—from the clearing of the first roads and building of stone bridges, park shelters, cabins, and hiking and bridle trails, to quarry work and the raising of the lodge's famous columns—it also reveals the more personal side of life in the two camps at the park, covering topics ranging from education, sports, and recreation, to camp newspapers, and even misbehavior and discipline. Supplementing the photographs and narrative are engaging conversations with alumni and family members of the CCC, which give readers a rich oral history of life at Giant City in the 1930s. The book is further enhanced by maps, rosters of enrollees and officers, and a list of CCC camps in southern Illinois. The culmination of three decades of research, Giant City State Park and the Civilian Conservation Corps provides the most intimate history ever of the park and its people, honoring one of Illinois's most unforgettable places and the men who built it.
