The instant New York Times bestseller from legendary investment guru Ric Edelman, who presents a prescient personal finance guide on how technology and science will reshape the way we save, invest, and plan for the future. In *The Truth About Your Future*, award-winning financial advisor Ric Edelman reveals how technology and science are evolving at a blistering, almost incomprehensible pace—with profound

implications for your personal finances. Ric radically upends traditional financial planning, showing that you need not just one financial plan, but three—one for now, one for later and one for much later. He explains: Why you 're likely to live much longer—and the impact on your financial future; how you must alter your plans to shift from the familiar linear lifeline (school-job-retirement-death) to the new cyclical lifeline; the importance of Career Planning—even if you 're in your fifties or sixties; how to invest in tech companies and how to generate income from your investments; why nursing homes are becoming obsolete—and with them, long-term care insurance policies, and what this means for you; how to protect your digital assets; and how you 'll spend your time—and money—in retirement, and why the future will be the happiest time of your life. The traditional paradigms of how we live, learn, and invest are shifting under our feet. Fortunately, Ric Edelman has seen the future, and in *The Truth About Your Future* he illustrates how smart investors can adapt and thrive in today 's changing marketplace. Newcomers and loyal Edelman followers alike will find value in his proven advice and trademark humor. This is a must-have guide for anyone serious about successfully adapting to the ever-evolving financial landscape.

"A heartfelt, subversively funny memoir and a bold personal manifesto that pushes back against the superficial expectations of motherhood -- and challenges the idea that there's a "right" way to raise kids. With hard-won knowledge gained from having four kids in four years, Kristen Howerton navigates the emotional and sometimes messy waters of motherhood, sharing valuable lessons from her journey through infertility, adoption, pregnancy, toddler tantrums, divorce, and the shock and awe of parenting teens. Howerton recounts how she learned to opt out from the pressure to do it all perfectly. As a mom of both white and black children and a licensed therapist, Howerton talks frankly about the thorny issues parents face today, whether it's finding good mom friends, confronting racism, disciplining other people's kids, or falling short of that elusive work/life balance. Howerton's experience--the expectations, the stress, the total lack of control, and yes, the indignities of driving a minivan (which now sits in her driveway littered with crushed Cheetos and the remnants of her self-esteem)--along with her ability to laugh at herself, reminds parents they are not alone on this unpredictable ride"--

Various combinations of commercially available technologies could greatly reduce fuel consumption in passenger cars, sport-utility vehicles, minivans, and other light-duty vehicles without compromising vehicle performance or safety. Assessment of Technologies for Improving Light Duty Vehicle Fuel Economy estimates the potential fuel savings and costs to consumers of available technology combinations for three types of engines: spark-ignition gasoline, compression-ignition diesel, and hybrid. According to its estimates, adopting the full combination of improved technologies in medium and large cars and pickup trucks with spark-ignition engines could reduce fuel consumption by 29 percent at an additional cost of \$2,200 to the consumer. Replacing spark-ignition engines with diesel engines and components would yield fuel savings of about 37 percent at an added cost of approximately \$5,900 per vehicle, and replacing spark-ignition engines with hybrid engines and components would reduce fuel consumption by 43 percent at an increase of \$6,000 per vehicle. The book focuses on fuel consumption--the amount of fuel consumed in a given driving distance--because energy savings are directly related to the amount of fuel used. In contrast, fuel economy measures how far a vehicle will travel with a gallon of fuel. Because fuel consumption data indicate money saved on fuel purchases and reductions in carbon dioxide emissions, the book finds that vehicle

stickers should provide consumers with fuel consumption data in addition to fuel economy information.

School buses that have been converted into mobile living spaces — known as skoolies — are a natural extension of the tiny house craze. Buses are not only easier and safer to drive than an RV, they provide a jump-start on the conversion process with frame, roof, and floor already in place. Experienced builder Will Sutherland, whose creative school bus conversions have been featured in Road and Track and Popular Mechanics, is behind the wheel of this alluring look at life on the road. In addition to profiles of eight fellow skoolie fans and stunning photos of bus interiors designed for simple living, Skoolie! does what no other book on the subject has — it offers a complete, step-by-step guide to the conversion process, from seat removal to planning layout and installing insulation, flooring, and furnishings that meet your needs.

In the late 1970s we ventured across the country from northern California to western Pennsylvania and back through Washington and Oregon in Steven's boxy old 1965 Chevy van. Those were the days, my friends. That trip had a lasting effect and over time we realized we were destined to be full time RVers. In 1995 we sold our house and a Recreational Vehicle became our home. An RV has been our home every since.

In our age of fast-paced biotechnological progress and humans' increasing impact on the environment the autonomy of 'nature' has come into question. We can now engineer living things, blur the biological distinctions between humans and animals, and influence parts of our world that we cannot see - such as DNA and genes. These discoveries and far-reaching developments have created fertile ground for artistic expression. This book reveals the ways in which the work of bio artists offers new meanings for our lives in the wake of scientific discovery, as well as new frameworks for describing them. Four thematic chapters cover the key areas in which biotechnology has had an impact on today's world, including ecology, biomedicine, designer genomes and evolutionary theory, profiling the work of 60 artists, collectives and organizations from countries including France, Germany, the US, the Netherlands, Mexico and Japan. Interviews with eight bio artists and technologists, including Arne Hendriks, Mark Dion, Boo Chapple, Heather Dewey-Hagborg and Raphael Kim,

RV Vacations

Millions of people travel the countryside in RVs, and that shows no signs of slowing down. RVing leaves a smaller carbon footprint than traditional fly/hotel/drive vacations; plus, it's a lot more comfortable and convenient. Prospective RV buyers agree that RVing allows for more family togetherness, a less-expensive vacation, and a great way to avoid the illnesses travelers pick up in hotels and on cruise ships. If you've already got your RV, or if you'll be renting a rig for the trip, this book will show you how to choose the perfect trip for you or your family, and how to get there smoothly and easily. *Idiot's Guides: RV Vacations* covers:

- Basic tips for getting up to speed in a rented RV.
- Practical information for safety and convenience on the road, plus how-to information on booking space at campgrounds and getting hooked up once there.
- Info for getting started with boondocking, or non-campground camping.
- Choosing your destination and planning the perfect trip.
- Itineraries for regional driving trips, plus lists of the top campgrounds in various regions.
- Forty of the best RV vacations to the most popular attractions in the U.S., including national and state parks, beach destinations, Orlando, Branson, and other sites of wide

The activist and TED speaker Megan Phelps-Roper reveals her life growing up in the most hated family in America At the age of five, Megan Phelps-Roper began protesting homosexuality and other alleged vices alongside fellow members of the Westboro Baptist Church in Topeka, Kansas. Founded by her grandfather and consisting almost entirely of her extended family, the tiny group would gain worldwide notoriety for its pickets at military funerals and celebrations of death and tragedy. As Phelps-Roper grew up, she saw that church members were close companions and accomplished debaters, applying the logic of predestination and the language of the King James Bible to everyday life with aplomb—which, as the church ' s Twitter spokeswoman, she learned to do with great skill. Soon, however, dialogue on Twitter caused her to begin doubting the church ' s leaders and message: If humans were sinful and fallible, how could the church itself be so confident about its beliefs? As she digitally jostled with critics, she started to wonder if sometimes they had a point—and then she began exchanging messages with a man who would help change her life. A gripping memoir of escaping extremism and falling in love, *Unfollow* relates Phelps-Roper ' s moral

awakening, her departure from the church, and how she exchanged the absolutes she grew up with for new forms of warmth and community. Rich with suspense and thoughtful reflection, Phelps-Roper ' s life story exposes the dangers of black-and-white thinking and the need for true humility in a time of angry polarization.

Along the way, she charms with her intimate writing style and dedication to helping others live well, be healthy, and explore our beautiful world. Excerpt: I also needed to feel safe, and I didn't feel safe at all in a home made from drywall and particle board cabinetry. With the exception of high-quality hardwood, whenever I looked at the way houses were made now, it was like looking at mold restaurants. "Welcome to our new restaurant, Mr. and Mrs. Mold. On the menu tonight we have some damp drywall, a nice assortment of ply woods and particle boards, and some fantastic dusts we have been letting age in the duct work. If you'd like to stay for a while, we have some special dust-filled insulation and carpet I think you will find quite cozy. Oh, and of course, for the benefit of any little mold children that might come along, we have the full assortment of anti-fungal paint and fungicide-resistant genes already in full complement in our facilities. All mold offspring from this establishment have shown full resistance to these rather pitiful human attempts to control our numbers."

Happy Tails Across New Jersey

Revolutionary new travel book shows everyone regardless of current financial condition how to travel and live forever anywhere in the United States on \$20 a day. Author Jason Odom and his wife Kelly have traveled over 700,000 miles in 15 years enjoying the sumptuous beauty of pristine national parks and the exciting nightlife of big cities like San Francisco and Las Vegas. Vanabode shows you how to earn a living working in some of the most exciting places in the United States like national parks and state recreational areas, how to sleep safely and comfortably in your own bed every night; how to eat better than you ever have, how to cook for free without electricity, fire or fuel; how to get rid of all our current debt and regain your freedom; and most importantly - how you can do it forever if you want. Do you want to
