Examines the problem of soaring medical costs, discusses the future role of the physician, hospital, and new drugs, and looks at how medical care will be funded

Cogs in the Great Machine

From the Publisher: Jonathan Safran Foer spent much of his teenage and college years oscillating between omnivore and vegetarian. But on the brink of fatherhood-facing the prospect of having to make dietary choices on a child's behalf-his casual questioning took on an urgency. His quest for answers ultimately required him to visit factory farms in the middle of the night, dissect the emotional ingredients of meals from his childhood, and probe some of his most primal instincts about right and wrong. Brilliantly synthesizing philosophy, literature, science, memoir and his own detective work, *Eating Animals* explores the many fictions we use to justify our eating habits-from folklore to pop culture to family traditions and national myth-and how such tales can lull us into a brutal forgetting. Marked by Foer's profound moral ferocity and unvarying generosity, as well as the vibrant style and creativity that made his previous books, *Everything is Illuminated* and *Extremely Loud and Incredibly Close*, widely loved, *Eating Animals* is a celebration and a reckoning, a story about the stories we've told-and the stories we now need to tell.

The Running Man

Kids love fast food. And the fast food industry definitely loves kids. It couldn't survive without them. Did you know that the biggest toy company in the world is McDonald's? It's true. In fact, one out of every three toys given to a child in the United States each year is from a fast food restaurant. Not only has fast food reached into the toy industry, it's moving into our schools. One out of every five public schools in the United States now serves brand name fast food. But do kids know what they're eating? Where do fast food hamburgers come from? And what makes those fries taste so good? When Eric Schlosser's best-selling book, *Fast Food Nation*, was published for adults in 2001, many called for his groundbreaking insight to be shared with young people. Now Schlosser, along with co-writer Charles Wilson, has investigated the subject further, uncovering new facts children need to know. In *Chew On This*, they share with kids the fascinating and sometimes frightening truth about what lurks between those sesame seed buns, what a chicken 'nugget' really is, and how the fast food industry has been feeding off children for generations.

Who Shall Live?

From the author of *What to Eat and Shopped*, a revelatory investigation into what really goes into the food

we eat.

Chew On This

A journalist explores the homogenization of American culture and the impact of the fast food industry on modern-day health, economy, politics, popular culture, entertainment, and food production.

Big Bad Ironclad! (Nathan Hale's Hazardous Tales #2)

New York Times Bestseller: The shadowy world of “off the books” businesses—from marijuana to migrant workers—brought to life by the author of *Fast Food Nation*. America’s black market is much larger than we realize, and it affects us all deeply, whether or not we smoke pot, rent a risqué video, or pay our kids’ nannies in cash. In *Reefer Madness*, the award-winning investigative journalist Eric Schlosser turns his exacting eye to the underbelly of American capitalism and its far-reaching influence on our society. Exposing three American mainstays—pot, porn, and illegal immigrants—Schlosser shows how the black market has burgeoned over the past several decades. He also draws compelling parallels between underground and overground: how tycoons and gangsters rise and fall, how new technology shapes a market, how government intervention can reinvigorate black markets as well as mainstream ones, and how big business learns—and profits—from the underground. “Captivating . . . Compelling tales of crime and punishment as well as an illuminating glimpse at the inner workings of the underground economy. The book revolves around two figures: Mark Young of Indiana, who was sentenced to life in prison without parole for his relatively minor role in a marijuana deal; and Reuben Sturman, an enigmatic Ohio man who built and controlled a formidable pornography distribution empire before finally being convicted of tax evasion. . . . Schlosser unravels an American society that has ‘become alienated and at odds with itself.’ Like *Fast Food Nation*, this is an eye-opening book, offering the same high level of reporting and research.” —Publishers Weekly

The Photo Ark

NOW A MAJOR MOTION PICTURE STARRING NOAH WYLE, JEREMY IRVINE, MINKA KELLY, ADELAIDE CLEMENS, STEVE EARLE, AND HALEY JOEL OSMENT. "ONE OF THE MAJOR WRITERS OF OUR TIME."—THE ATLANTA JOURNAL-CONSTITUTION Travis Shelton is seventeen the summer he wanders into the woods onto private property outside his North Carolina hometown, discovers a grove of marijuana large enough to make him some serious money, and steps into the jaws of a bear trap. After hours of passing in and out of consciousness, Travis is discovered by Carlton Toomey, the wise and vicious farmer who set the trap to protect his plants, and Travis's confrontation with the subtle evils within his rural world has begun. Before long, Travis has moved out of his parents' home to live with Leonard Shuler, a one-time schoolteacher who lost his job and custody of his daughter years ago, when he was framed by a vindictive student. Now Leonard lives with his dogs and his sometime girlfriend in a run-down trailer outside town, deals a few drugs, and studies journals from the Civil War. Travis becomes his student, of sorts, and the fate of these two outsiders becomes increasingly entwined as the community's terrible past and corrupt present bear down on each of them from every direction, leading to a violent reckoning—not only with Toomey, but with the legacy of the Civil War massacre that, even after a century, continues to divide an Appalachian community. Vivid, harrowing yet ultimately hopeful, *The World Made Straight* is Ron Rash's subtlest exploration yet of the painful conflict between the bonds of home and the desire for independence.

Fast Food Nation

"On every level, *Cold Storage* is pure, unadulterated entertainment." —Douglas Preston, *The New York*

Times Book Review For fans of *The Martian*, *Dark Matter*, and *Before the Fall* comes an astonishing debut thriller by the screenwriter of *Jurassic Park*: a wild and terrifying bioterrorism adventure about three strangers who must work together to contain a highly contagious, deadly organism that could destroy all of humanity. They thought it was contained. They were wrong. When Pentagon bioterror operative Roberto Diaz was sent to investigate a suspected biochemical attack, he found something far worse: a highly mutative organism capable of extinction-level destruction. He contained it and buried it in cold storage deep beneath a little-used military repository. Now, after decades of festering in a forgotten sub-basement, the specimen has found its way out and is on a lethal feeding frenzy. Only Diaz knows how to stop it. He races across the country to help two unwitting security guards—one an ex-con, the other a single mother. Over one harrowing night, the unlikely trio must figure out how to quarantine this horror again. All they have is luck, fearlessness, and a mordant sense of humor. Will that be enough to save all of humanity?

Food Politics

In the tradition of *Fast Food Nation* and *The Omnivore's Dilemma*, an extraordinary investigation into the human lives at the heart of the American grocery store What does it take to run the American supermarket? How do products get to shelves? Who sets the price? And who suffers the consequences of increased convenience and efficiency? In this alarming exposé, author Benjamin Lorr pulls back the curtain on this highly secretive industry. Combining deep sourcing, immersive reporting, and compulsively readable prose, Lorr leads a wild investigation in which we learn:

- The secrets of Trader Joe's success from Trader Joe himself
- Why truckers call their job "sharecropping on wheels"
- What it takes for a product to earn certification labels like "organic" and "fair trade"
- The struggles entrepreneurs face as they fight for shelf space, including essential tips, tricks, and traps for any new food business
- The truth behind the alarming slave trade in the shrimp industry

The result is a page-turning portrait of an industry in flux, filled with the passion, ingenuity, and exploitation required to make this everyday miracle continue to function. The product of five years of research and hundreds of interviews across every level of the industry, *The Secret Life of Groceries* delivers powerful social commentary on the inherently American quest for more and the social costs therein.

Modern Meat

DIVEach of the books in Nathan Hale's *Hazardous Tales* has elements of the strange but true and is presented in an engaging, funny format, highlighting the larger-than-life characters that pop up in real history. *Big Bad Ironclad!* covers the history of the amazing ironclad steam warships used in the Civil War. From the ship's inventor, who had a history of blowing things up and only 100 days to complete his project, to the mischievous William Cushing, who pranked his way through the whole war, this book is filled with surprisingly true facts and funny, brave characters that modern readers will easily relate to. UPraise for Nathan Hale's *Hazardous Tales: Big Bad Ironclad!* "Livelier than the typical history textbook but sillier than the many outstanding works on the Civil War available for young readers, this will appeal to both history buffs and graphic-novel enthusiasts." —Kirkus Reviews "Readers interested in American history will enjoy these graphic novels. Comic panels of varying sizes enhance the real-life events and support the stories' over-the-top humor. The writing is accessible and entertaining; author Hale's style gives readers an insider-y, you-are-there-type scoop." —Horn Book UAward: /uNew York Public Library's Children's Books 2012: 100 Books for Reading and Sharing listU /u/div

Ethics on the Job: Cases and Strategies

We all witness, in advertising and on supermarket shelves, the fierce competition for our food dollars. In this engrossing expos é , Marion Nestle goes behind the scenes to reveal how the competition really works and how it affects our health. The abundance of food in the United States--enough calories to meet the needs of every man, woman, and child twice over--has a downside. Our over-efficient food industry must do everything possible to persuade people to eat more--more food, more often, and in larger portions--no matter what it does to waistlines or well-being. Like manufacturing cigarettes or building weapons, making food is big business. Food companies in 2000 generated nearly \$900 billion in sales. They have stakeholders to please, shareholders to satisfy, and government regulations to deal with. It is nevertheless shocking to learn precisely how food companies lobby officials, co-opt experts, and expand sales by marketing to children, members of minority groups, and people in developing countries. We learn that the food industry plays politics as well as or better than other industries, not least because so much of its activity takes place outside the public view. Editor of the 1988 Surgeon General's Report on Nutrition and Health, Nestle is uniquely qualified to lead us through the maze of food industry interests and influences. She vividly illustrates food politics in action: watered-down government dietary advice, schools pushing soft drinks, diet supplements promoted as if they were First Amendment rights. When it comes to the mass production and consumption of food, strategic decisions are driven by economics--not science, not common sense, and certainly not health. No wonder most of us are thoroughly confused about what to eat to stay healthy. An accessible and balanced account, Food Politics will forever change the way we respond to food industry marketing practices. By explaining how much the food industry influences government nutrition policies and how cleverly it links its interests to those of nutrition experts, this path-breaking book helps us understand more clearly than ever before what we eat and why.

Swallow This: Serving Up the Food Industry ' s Darkest Secrets

Reefer Madness

From a Pulitzer Prize-winning investigative reporter at The New York Times comes the troubling story of the rise of the processed food industry -- and how it used salt, sugar, and fat to addict us. Salt Sugar Fat is a journey into the highly secretive world of the processed food giants, and the story of how they have deployed

these three essential ingredients, over the past five decades, to dominate the North American diet. This is an eye-opening book that demonstrates how the makers of these foods have chosen, time and again, to double down on their efforts to increase consumption and profits, gambling that consumers and regulators would never figure them out. With meticulous original reporting, access to confidential files and memos, and numerous sources from deep inside the industry, it shows how these companies have pushed ahead, despite their own misgivings (never aired publicly). *Salt Sugar Fat* is the story of how we got here, and it will hold the food giants accountable for the social costs that keep climbing even as some of the industry's own say, "Enough already."

Enough

Historian and Bram Stoker Award Nominee W. Scott Poole traces the confluence of military history, technology, and art that gave us modern horror films and literature. From *Nosferatu* to Frankenstein's monster, from Fritz Lang to James Whale, the touchstones of horror can all trace their roots to the bloodshed of the First World War. Bram Stoker Award nominee W. Scott Poole traces the confluence of military history, technology, and art in the wake of World War I to show how overwhelming carnage gave birth to a wholly new art form: modern horror films and literature. "Thoroughly engrossing cultural study . . . Poole persuasively argues that the birth of horror as a genre is rooted in the unprecedented destruction and carnage of WWI." —Publishers Weekly (starred review)

Eating Animals

For more than thirty years, humankind has known how to grow enough food to end chronic hunger worldwide. Yet while the "Green Revolution" succeeded in South America and Asia, it never got to Africa. More than 9 million people every year die of hunger, malnutrition, and related diseases every year - most of them in Africa and most of them children. More die of hunger in Africa than from AIDS and malaria combined. Now, an impending global food crisis threatens to make things worse. In the west we think of famine as a natural disaster, brought about by drought; or as the legacy of brutal dictators. But in this powerful investigative narrative, Thunow & Kilman show exactly how, in the past few decades, American, British, and European policies conspired to keep Africa hungry and unable to feed itself. As a new generation of activists work to keep famine from spreading, *Enough* is essential reading on a humanitarian issue of utmost urgency.

Fast Food

The authors contemplate the origins, architecture and commercial growth of wayside eateries in the US over the past 100 years. *Fast Food* examines the impact of the automobile on the restaurant business and offers an account of roadside dining.

The World Made Straight

This lush book of photography represents National Geographic's Photo Ark, a major cross-platform

initiative and lifelong project by photographer Joel Sartore to make portraits of the world's animals—especially those that are endangered. His powerful message, conveyed with humor, compassion, and art—to know these animals is to save them. Sartore intends to photograph every animal in captivity in the world. He is circling the globe, visiting zoos and wildlife rescue centers to create studio portraits of 12,000 species, with an emphasis on those facing extinction. He has photographed more than 6,000 already and now, thanks to a multi-year partnership with National Geographic, he may reach his goal. This book showcases his animal portraits— from tiny to mammoth, from the Florida grasshopper sparrow to the greater one-horned rhinoceros. Paired with the eloquent prose of veteran wildlife writer Douglas Chadwick, this book presents a thought-provoking argument for saving all the species of our planet.

The Secret Life of Groceries

Franchise: The Golden Arches in Black America

For thirty days, Morgan Spurlock ate nothing but McDonald's as part of an investigation into the effects of fast food on American health. The resulting documentary earned him an Academy Award nomination and broke box-office records worldwide. But there's more to the story, and in *Don't Eat This Book*, Spurlock examines everything from school lunch programs and the marketing of fast food to the decline of physical education. He looks at why fast food is so tasty, cheap, and ultimately seductive—and interviews experts from surgeons general and kids to marketing gurus and lawmakers, who share their research and opinions on what we can do to offset a health crisis of supersized proportions. *Don't eat this* groundbreaking, hilarious book—but if you care about your country's health, your children's, and your own, you better read it.

Minna wishes for many things. She wishes she understood the quote taped above her mother's typewriter: Fact and fiction are different truths. She wishes her mother would stop writing long enough to really listen to her. She wishes her house were peaceful and orderly like her friend Lucas's. Most of all, she wishes she could find a vibrato on her cello and play Mozart the way he deserves to be played. Minna soon discovers that some things can't be found—they just have to happen. And as she waits for her vibrato to happen, Minna begins to understand some facts and fictions about herself.

Every book tells a story . . . And the 70 titles in the Pocket Penguins series are emblematic of the renowned breadth and quality that formed part of the original Penguin vision in 1935 and that continue to define our publishing today. Together, they tell one version of the unique story of Penguin Books. Eric Schlosser's inimitable brand of hard-hitting yet always entertaining writing looks beneath the surface of American life to examine issues ranging from the black market to burgers. When Penguin published his expose *Fast Food Nation* in 2001, it sparked a storm in the fast food industry. This piece on the terrifying true cost of cheap meat shows why Schlosser has been instrumental in changing our attitudes to what we eat.

Cold Storage

Drowning in student loans? Can't afford to get married, buy a home, have children? Up to your ears in credit card debt? At last, a book for the under-35 generation that explains why it's not their fault, and what can be done about it. *Strapped* offers a groundbreaking look at the new obstacle course facing young adults. Getting ahead, argues commentator and policy maven Tamara Draut, is getting harder. A college degree is the new high school diploma – and costs a fortune to obtain. Good jobs are scarcer thanks to stagnant wages and disappearing benefits. And, the cost of everything – starter homes, health coverage, child care – keeps going up. Witty and wise, *Strapped* brims with ideas for fashioning a new kind of America in which every young person can go to college, buy a home, and start a family. The future starts here.

Master Humphrey's Clock

Explores the homogenization of American culture and the impact of the fast food industry on modern-day health, economy, politics, popular culture, entertainment, and food production.

If I Ran for President

“ This is a book to savor, especially if you're a fast-food fan. ” —Bookpage "This fun, argumentative, and frequently surprising pop history of American fast food will thrill and educate food lovers of all speeds." —Publishers Weekly Most any honest person can own up to harboring at least one fast-food guilty pleasure. In *Drive-Thru Dreams*, Adam Chandler explores the inseparable link between fast food and American life for the past century. The dark underbelly of the industry's largest players has long been scrutinized and gutted, characterized as impersonal, greedy, corporate, and worse. But, in unexpected ways, fast food is also deeply personal and emblematic of a larger than life image of America. With wit and nuance, Chandler reveals the complexities of this industry through heartfelt anecdotes and fascinating trivia as well as interviews with fans, executives, and workers. He traces the industry from its roots in Wichita, where White Castle became the first fast food chain in 1921 and successfully branded the hamburger as the official all-American meal, to a teenager's 2017 plea for a year's supply of Wendy's chicken nuggets, which united the internet to generate the most viral tweet of all time. *Drive-Thru Dreams* by Adam Chandler tells an intimate and contemporary story of America—its humble beginning, its innovations and failures, its international charisma, and its regional identities—through its beloved roadside fare.

Fast Food Nation

Fast Food Nation

From civil rights to Ferguson, *Franchise* reveals the untold history of how fast food became one of the greatest generators of black wealth in America. Often blamed for the rising rates of obesity and diabetes among black Americans, fast food restaurants like McDonald's have long symbolized capitalism's villainous effects on our nation's most vulnerable communities. But how did fast food restaurants so thoroughly saturate black neighborhoods in the first place? In *Franchise*, acclaimed historian Marcia Chatelain uncovers a surprising history of cooperation among fast food companies, black capitalists, and civil rights leaders, who—in the troubled years after King's assassination—believed they found an economic answer to the problem of racial inequality. With the discourse of social welfare all but evaporated, federal programs under presidents Johnson and Nixon promoted a new vision for racial justice: that the franchising of fast food restaurants, by black citizens in their own neighborhoods, could finally improve the quality of black life. Synthesizing years of research, *Franchise* tells a troubling success story of an industry that blossomed the very moment a freedom movement began to wither.

Fast Food Nation: The Dark Side of the All-American Meal

Essays cover the history of junk foods and convenience foods, along with information on health, diet, and current controversies surrounding the consumption of this type of food.

The McDonaldization of Society

Now in its Eighth Edition, George Ritzer's *McDonaldization of Society* continues to stand as one of the pillars of modern day sociological thought. By linking theory to 21st century culture, this book resonates with students in a way that few other books do, opening their eyes to many current issues, especially in the areas of consumption and globalization. Through vivid, story-telling prose, Ritzer provides an insightful introduction to the ways in which the principles of the fast-food restaurant are coming to dominate sectors of American society as well as the rest of the world. This new edition has been fully updated to include a new focus on McDonaldization of the workforce.
