## Through Painted Deserts

When Bloomberg journalist Mark Pittman suddenly died, his widow spent four summers driving 31,152 miles searching for answers. In her fearless memoir, *The Pink Steering Wheel Chronicles: A Love Story*, author Laura Fahrenthold presents a moving portrait of marriage, motherhood and mourning as she captains a 1993 RV sprinkling her husband's ashes with their two young daughters and a stray dog in an epic quest for healing and understanding. Filled with insight and wit from a career in journalism, the story captures the family's adventures and misadventures, her deeply-layered love story, and her hilarious slice-of-life dispatches where the pink steering wheel becomes her spiritual GPS.

## RV Living

A Practical Guide to Full-Time RV Living Motorhome & RV Retirement Startup Exactly six years ago my spouse Shirley and I have both retired from our previous careers, leaving us with quite a lot of extra time in a mostly empty house throughout the day. That's when we decided we wanted to travel. The only problem was we did not know what the best way was to get from point A to point B. Needless to say, we needed to find a way that was comfortable for the two of us, given our conditions; we did not want our sense of adventure to be limited by something as unimportant as physical pain, after all. That is when we spoke to our neighbors, old family friends who had just returned from an RV camping trip with another couple. The more we learned about traveling in an RV, the more my wife and I were convinced that was the solution to our conundrum. We had some savings, we had the time, and we had the ability to go wherever we wanted in the world with the safety aspect of carrying a piece of home with you. Thus we decided to start our new life in an RV on the road. We have been living the RV life for the last five years now, and I must admit that these five years are the best years of our life so far. I also must admit that not everything has been glorious and fun, yes, we have faced our fair share of problems and hiccups on various fronts, but looking back, they all were great learning experiences. However, RV living isn't just for retirees; it can be for anyone who wants to enjoy the freedom of living on the road although this doesn't mean that full-time RV living is for everyone. Whether you are retiring soon and want some adventure, have been retired for a while and want a change of scene, or simply want to change your way of life to something simpler, living full-time out of an RV can be your answer. In this book, we are going

Buddhism is all about training the mind, and boot camp is an ideal training method for this generation's short attention span. The chapters in this small book can be read in any order, and are simple and easy to understand. Each story, inspirational quote, and teaching offers mindfulness-enhancing techniques that anyone can relate to. You don't need to be a Buddhist to find the Buddha's teachings motivational. As the Dalai Lama says, "Don't try to use what you learn from Buddhism to be a Buddhist; use it to be a better whatever-you-already-are." So whether it's Mother Teresa's acts of charity, Gandhi's perseverance, or your aunt Betty's calm demeanor, as long as you're motivated to be better today than you were yesterday, it doesn't matter who inspires you. Regardless of religion, geographical region, race, ethnicity, color, gender, sexual orientation, age, ability, flexibility, or vulnerability, if you do good you feel good, and if you do bad you feel bad. Buddhism isn't just about meditating. It's about rolling up your sleeves to relieve some of the suffering in the world. If you are ready to be a soldier of peace in the army of love, welcome to Buddhist Boot Camp!

Concepts of Biology is designed for the single-semester introduction to biology course for non-science majors, which for many students is their only college-level science course. As such, this course represents an important opportunity for students to develop the necessary knowledge, tools, and skills to make informed decisions as they continue with their lives. Rather than being mired down with facts and vocabulary, the typical non-science major student needs information presented in a way that is easy to read and understand. Even more importantly, the content should be meaningful. Students do much better when they understand why biology is relevant to their everyday lives. For these reasons, Concepts of Biology is grounded on an evolutionary basis and includes exciting features that highlight careers in the biological sciences and everyday applications of the concepts at hand. We also strive to show the interconnectedness of topics within this extremely broad discipline. In order to meet the needs of today's instructors and students, we maintain the overall organization and coverage found in most syllabi for this course. A strength of Concepts of Biology is that instructors can customize the book, adapting it to the approach that works best in their classroom. Concepts of Biology also includes an innovative art program that incorporates critical thinking and clicker questions to help students understand--and apply--key concepts.

Carrying baggage you don't need? When I was in college, I figured my life would come together around graduation. I'd meet a guy, have a beautiful wedding, and we'd buy a nice little house—not necessarily with a picket fence, but with whatever kind of fence we wanted. Whatever we decided, I would be happy. When I got out of college and my life didn't look like that, I floundered, trying to get the life I had always dreamed of through career, travel, and relationships. But none of them satisfied me as I hoped. Like many twentysomethings, I tried to discover the life of my dreams, but instead I just kept accumulating baggage—school loans, electronics I couldn't afford, hurt from broken relationships, and unmet expectations for what life was “supposed to be” like. Just when I had given up all hope of finding the “life I'd always dreamed about,” I decided to take a trip to all fifty states . . . because when you go on a trip, you can't take your baggage. What I found was that “packing light” wasn't as easy as I thought it would be. This is the story of my trip and learning to live life with less baggage.
