### Health Promotion Programs

Bioterrorism, drug--resistant disease, transmission of disease by global travel . . . there are no shortage of challenges facing America's public health officials. Men and women preparing to enter the field require state-of-the-art training to meet these increasing threats to the public health. But are the programs they rely on provide the high caliber professional training they require? *Who Will Keep the Public Healthy?* provides an overview of the past, present, and future of public health education, assessing its readiness to provide the training and education needed to prepare men and women to face 21st century challenges. Advocating an ecological approach to public health, the Institute of Medicine examines the role of public health schools and degree--granting programs, medical schools, nursing schools, and government agencies, as well as other institutions that foster public health education and leadership. Specific recommendations address the content of public health education, qualifications for faculty, availability of supervised practice, opportunities for cross--disciplinary research and education, cooperation with government agencies, and government funding for education. Eight areas of critical importance to public health education in the 21st century are examined in depth: informatics, genomics, communication, cultural competence, community-based participatory research, global health, policy and law, and public health ethics. The book also includes a discussion of the policy implications of its ecological framework.

### Research in Education

Physical inactivity is a key determinant of health across the lifespan. A lack of activity increases the risk of heart disease, colon and breast cancer, diabetes mellitus, hypertension, osteoporosis, anxiety and depression and others diseases. Emerging literature has suggested that in terms of mortality, the global population health

## Access PDF Health Program Planning An Educational And Ecological Approach With Powerweb Bind In Card

burden of physical inactivity approaches that of cigarette smoking. The prevalence and substantial disease risk associated with physical inactivity has been described as a pandemic. The prevalence, health impact, and evidence of changeability all have resulted in calls for action to increase physical activity across the lifespan. In response to the need to find ways to make physical activity a health priority for youth, the Institute of Medicine's Committee on Physical Activity and Physical Education in the School Environment was formed. Its purpose was to review the current status of physical activity and physical education in the school environment, including before, during, and after school, and examine the influences of physical activity and physical education on the short and long term physical, cognitive and brain, and psychosocial health and development of children and adolescents. Educating the Student Body makes recommendations about approaches for strengthening and improving programs and policies for physical activity and physical education in the school environment. This report lays out a set of guiding principles to guide its work on these tasks. These included: recognizing the benefits of instilling life-long physical activity habits in children; the value of using systems thinking in improving physical activity and physical education in the school environment; the recognition of current disparities in opportunities and the need to achieve equity in physical activity and physical education; the importance of considering all types of school environments; the need to take into consideration the diversity of students as recommendations are developed. This report will be of interest to local and national policymakers, school officials, teachers, and the education community, researchers, professional organizations, and parents interested in physical activity, physical education, and health for school-aged children and adolescents.

### Resources in Education

Health Sciences & Professions

### Theoretical Foundations of Health Education and Health Promotion

This book seeks to provide a common understanding of health education disciplines and related concepts. It also offers a framework that clarifies the relationship between health literacy health promotion determinants of health and healthy public policy and health outcomes. It is targeted at health promotion and education professionals and professionals in related disciplines.

### Health Promotion Planning

The first edition of Step-by-Step to Comprehensive School Health was published in 1993 and has been widely used by schools and communities throughout the United States to establish school health programs to support the healthy development of children and youth. State agencies, local schools and tribal communities have used this guide effectively in their efforts to establish high quality health promotion programs within their schools. The guide also served as a blueprint for university programs that prepare future health education teachers and leaders.

### A Framework for Educating Health Professionals to Address the Social Determinants of Health

The Second Edition of Health Program Planning and Evaluation will help you to systematically develop, thoughtfully implement, and rigorously evaluate health programs across a variety of health disciplines. This thorough revision includes updated examples and references throughout, reflecting the major changes within the field. This outstanding resource prepares students and professionals to become savvy consumers of evaluation reports and prudent users of evaluation consultants. It presents practical tools and concepts in language suitable for both the practicing and novice health program planner and evaluator.

NOTE: Used books, rentals, and purchases made outside of Pearson If purchasing or renting from companies other than Pearson, the access codes for the Enhanced Pearson eText may not be included, may be incorrect, or may be previously redeemed. Check with the seller before completing your purchase. This access code card provides access to the Enhanced Pearson eText. The Third Edition of this comprehensive and applied resource for teachers of the very young details and celebrates the many nuances of infant and toddler development from pre-birth through age 36 months old. In a uniquely engaging full-color presentation (in the Pearson eText), the authors clearly explain theory, include current research, and explain appropriate practice throughout the chapters on development, curriculum, program planning, guidance, and professionalism. Using a relationship-based model for understanding how infants and toddlers grow and learn in typical and atypical ways, this book maintains a keen focus on the importance of families' and teachers' relationships and responsiveness in interactions with children, the latest developmental research, an emphasis on child-centered planning, a particularly strong coverage of infants and toddlers with special needs, and a focus on the effects of culture, families, and quality programs on infant-toddler development and interactions. Readers will come away with a deeper understanding of why, according to the science of child development, certain practices support or hinder an infant's or toddler's optimal development – and how to provide responsive, high-quality care. The Enhanced Pearson eText features embedded video and internet resources. Improve mastery and retention with the Enhanced Pearson eText\* This access code card provides access to the new Enhanced Pearson eText, a rich, interactive learning environment designed to improve student mastery of content. The Enhanced Pearson eText is: Engaging. The new interactive, multimedia learning features were developed by the authors and other subject-matter experts to deepen and enrich the learning experience. Convenient. Enjoy instant online access from your computer or download the Pearson eText App to read on or offline on your iPad® and Android® tablet.\* Affordable. Experience the advantages of the Enhanced Pearson eText for 40-65% less than a print bound book. \* The Enhanced eText features are only available in the Pearson eText format. They are not available in third-party eTexts or downloads. \*The Pearson eText App is available on Google Play and in the App Store. It requires Android OS 3.1-4, a 7 " or 10 " tablet, or iPad iOS 5.0 or later.

### Health Program Planning: An Educational and Ecological Approach

Emotional, physical and social well-being describe human health from birth. Good health goes hand in hand with the ability to handle stress for the future. However, biological factors such as diet, life experiences such as drug abuse, bullying, burnout and social factors such as family and community support at the school stage tend to mold health problems, affecting academic achievements. This book is a compilation of current scientific information about the challenges that students, families and teachers face regarding health and academic achievements. Contributions also relate to how physical activity, psychosocial support and other interventions can be made to understand resilience and vulnerability to school desertion. This book will be of interest to readers from broad professional fields, non-specialist readers, and those involved in education policy.

### School Mental Health

### Theory at a Glance: A Guide for Health Promotion Practice (Second Edition)

This classic text by the creators of the PRECEDE-PROCEED model provides a comprehensive overview of the principles and processes of health promotion planning. It is an invaluable up-to-date resource for students and practitioners in any discipline whose programs will include a significant health education or

## Access PDF Health Program Planning An Educational And Ecological Approach With Powerweb Bind In Card

health promotion component. Each chapter includes references and extensive endnotes from the most current literature and is backed by the authors' reputations as leading researchers and practitioners in the field.

### Workplace Health Promotion Programs

Health Sciences & Professions

#### Step by Step to Coordinated School Health

Health Promotion Programs introduces the theory of health promotion and presents an overview of current best practices from a wide variety of settings that include schools, health care organizations, workplace, and community. The 43 contributors to Health Promotion Programs focus on students and professionals interested in planning, implementing, and evaluating programs that promote health equity. In addition to the focus on best practices, each chapter contains information on: Identifying health promotion programs Eliminating health disparities Defining and applying health promotion theories and models Assessing the needs of program participants Creating and supporting evidence-based programs Implementing health promotion programs: Tools, program staff, and budgets Advocacy Communicating health information effectively Developing and increasing program funding Evaluating, improving, and sustaining health promotion programs Health promotion challenges and opportunities Health promotion resources and career links "The authors have clearly connected the dots among planning, theory, evaluation, health disparity, and advocacy, and have created a user-friendly toolbox for health promotion empowerment."—Ronald L. Braithwaite, PhD, professor, Morehouse School of Medicine, Departments of Community Health and Preventive Medicine, Family Medicine, and Psychiatry "The most comprehensive program planning text to date, this book examines all facets of planning and implementation across four key work environments where health educators function."—Mal Goldsmith, PhD, CHES, professor and coordinator of Health Education, Southern Illinois University, Edwardsville "Health Promotion Programs . . . explores the thinking of some of our field's leaders and confirms its well-deserved place in the field and in our personal collections."—Susan M. Radius, PhD, CHES, professor and program director, Health Science Department, Towson University

#### Who Will Keep the Public Healthy?

Shine a spotlight on the benefits of promoting health in the workplace Workplace Health Promotion Programs focuses on the incredible value that employee health programs can offer by exploring six key topics: behavioral health, physical health, healthy environments, health education, nutritional health, and physical activity. This in-depth resource explicitly establishes what successful workplace health promotion programs, services, and collaborations are, and then builds upon this foundational understanding by introducing methods and tools for promoting employee health and safety, while emphasizing the skills students need to do so. Through this resource, students will come to understand how to recognize employee health and safety opportunities, and how to think on a larger scale when it comes to workplace health initiatives in small, midsized, and larger employers that are comprehensive and fiscally sound. Workplace health promotion programs have the potential to both improve the health of the population as a whole and control healthcare spending in the process. Health problems are estimated to cost employers in the United States over \$200 billion per year through medical costs, absenteeism, disability, and overall reduced productivity. Improving well-being through effective workplace health promotion programs can reduce this cost—and create healthier, happier workforces. Discover the design, implementation, and evaluation of workplace health promotion programs that address the range of employee health needs and concerns Understand how evidence-based programs can positively impact business and reduce health care cost

## Access PDF Health Program Planning An Educational And Ecological Approach With Powerweb Bind In Card

Explore the larger scale implications of successful workplace health programs, including health policies, health insurance design, worker safety, employee behavior, etc. Learn how together employers and employees work to create a culture of health and well-being to support and promote employee health and safety. Review the ways in which successful workplace health promotion programs can prove financially beneficial. Workplace Health Promotion Programs is a resource that guides students and professionals alike in the discovery, development, and execution of successful employee health initiatives.

### Health Behavior

First multi-year cumulation covers six years: 1965-70.

### Health Promotion Planning

Children are the foundation of the United States, and supporting them is a key component of building a successful future. However, millions of children face health inequities that compromise their development, well-being, and long-term outcomes, despite substantial scientific evidence about how those adversities contribute to poor health. Advancements in neurobiological and socio-behavioral science show that critical biological systems develop in the prenatal through early childhood periods, and neurobiological development is extremely responsive to environmental influences during these stages. Consequently, social, economic, cultural, and environmental factors significantly affect a child's health ecosystem and ability to thrive throughout adulthood. Vibrant and Healthy Kids: Aligning Science, Practice, and Policy to Advance Health Equity builds upon and updates research from Communities in Action: Pathways to Health Equity (2017) and From Neurons to Neighborhoods: The Science of Early Childhood Development (2000). This report provides a brief overview of stressors that affect childhood development and health, a framework for applying current brain and development science to the real world, a roadmap for implementing tailored interventions, and recommendations about improving systems to better align with our understanding of the significant impact of health equity.

### Health Education

### Health and Academic Achievement

"This book related to fundamental recognitions that 1) children, adolescents, and families usually make no or very poor connections to specialty mental health (see Atkins et al. 1998; Catron, Harris, & Weiss, 1999), 2) schools are where children and youth are, and 3) many advantages accrue when education, mental health, and other youth-serving systems join together to better meet the mental health needs of students, in ways that reflect reducing and removing barriers to learning (Andis et al., 2002; Weist, 1997). National and global networks are increasingly recognizing the centrality of the SMH agenda as reflected in increasing funding, growing training opportunities, key policy initiatives, and an advancing research base that involves localities, states, regions and countries pursuing common themes"--

### Systems Approach Workbook for Health Education & Program Planning

This classic text by the creators of the PRECEDE/PROCEED model provides a comprehensive overview of the principles and processes of health promotion planning. It is an invaluable up-to-date resource for students and practitioners in health education and health promotion. Each chapter includes references and extensive endnotes from the most current literature and is backed by the authors' reputations as leading researchers and practitioners in the field.

## Planning, Implementing, and Evaluating Health Promotion Programs

### Current Topics in Public Health

Planning, Implementing, and Evaluating Health Promotion Programs: A Primer, provides readers with a comprehensive overview of the practical and theoretical skills needed to plan, implement, and evaluate health promotion programs in a variety of settings. The Fifth Edition features updated information throughout, including new theories and models such as the Healthy Action Process Approach (HAPA) and the Community Readiness Model (CRM), sections on grant writing and preparing a budget, real-life examples of marketing principles and processes, and a new classification system for evaluation approaches and designs. Health Education, Health Promotion, Health Educators, and Program Planning, Models for Program Planning in Health Promotion, Starting the Planning Process, Assessing Needs, Measurement, Measures, Measurement Instruments and Sampling, Mission Statement, Goals, and Objectives, Theories and Models Commonly Used for Health Promotion Interventions, Interventions, Community Organizing and Community Building, Identification and Allocation of Resources, Marketing: Making Sure Programs Respond to Wants and Needs of Consumers, Implementation: Strategies and Associated Concerns, Evaluation: An Overview, Evaluation Approaches and Designs, Data Analysis and Reporting. Intended for those interested in learning the basics of planning, implementing, and evaluating health promotion programs

### Planning, Implementing, and Evaluating Health Promotion Programs

The essential health behavior text, updated with the latest theories, research, and issues Health Behavior: Theory, Research and Practice provides a thorough introduction to understanding and changing health behavior, core tenets of the public health role. Covering theory, applications, and research, this comprehensive book has become the gold standard of health behavior texts. This new fifth edition has been updated to reflect the most recent changes in the public health field with a focus on health behavior, including coverage of the intersection of health and community, culture, and communication, with detailed explanations of both established and emerging theories. Offering perspective applicable at the individual, interpersonal, group, and community levels, this essential guide provides the most complete coverage of the field to give public health students and practitioners an authoritative reference for both the theoretical and practical aspects of health behavior. A deep understanding of human behaviors is essential for effective public health and health care management. This guide provides the most complete, up-to-date information in the field, to give you a real-world understanding and the background knowledge to apply it successfully. Learn how e-health and social media factor into health communication Explore the link between culture and health, and the importance of community Get up to date on emerging theories of health behavior and their applications Examine the push toward evidence-based interventions, and global applications Written and edited by the leading health and social behavior theorists and researchers, Health Behavior: Theory, Research and Practice provides the information and real-world perspective that builds a solid understanding of how to analyze and improve health behaviors and health.

### Health Program Planning and Evaluation: A Practical, Systematic Approach for Community Health

The World Health Organization defines the social determinants of health as "the conditions in which people are born, grow, work, live, and age, and the wider set of forces and systems shaping the conditions of daily life." These forces and systems include economic policies, development agendas, cultural and social norms, social policies, and political systems. In an era of pronounced human migration, changing demographics, and growing financial gaps between rich and poor, a fundamental understanding of how the conditions and

## Access PDF Health Program Planning An Educational And Ecological Approach With Powerweb Bind In Card

circumstances in which individuals and populations exist affect mental and physical health is imperative. Educating health professionals about the social determinants of health generates awareness among those professionals about the potential root causes of ill health and the importance of addressing them in and with communities, contributing to more effective strategies for improving health and health care for underserved individuals, communities, and populations. Recently, the National Academies of Sciences, Engineering, and Medicine convened a workshop to develop a high-level framework for such health professional education. A Framework for Educating Health Professionals to Address the Social Determinants of Health also puts forth a conceptual model for the framework's use with the goal of helping stakeholder groups envision ways in which organizations, education, and communities can come together to address health inequalities.

### Assessment and Planning in Health Programs

This unique book bridges the gap between evidence-based research and clinical practice. Edited by Kari Bo who has done pioneering research in this area, each chapter focuses on the evidence, from basic studies (theories or rationales for the treatment) and RCTs (appraisal of effectiveness), to the implications of these for clinical practice, and finally in recommendations on how to start, continue and progress treatment. Detailed treatment strategies - pelvic floor muscle training, biofeedback, electrical stimulation. Information on pelvic floor dysfunction in specific groups - men, children, elite athletes, the elderly, pregnancy, neurological diseases. Detailed illustrations of pelvic floor anatomy and related neuroanatomy/neurophysiology. MRIs and ultrasounds showing normal and dysfunctional pelvic floor. Clinical practice guidelines. Critical appraisal of RCTs. Strategies to reduce drop-out in conservative treatment.

### Current Catalog

A comprehensive overview of the program planning process for both new and experienced "directors of learning" in business, education, and other organizational settings. Index.

### Assessment and Planning in Health Programs

The latest National Health Education Standards available The revised National Health Education Standards provides guidance to, and is widely used throughout the country by, stakeholders interested in improving school health education programs, including: State and local government agencies Education professionals and administrators at all grade levels Parents and families Community agencies, businesses, organizations, and institutions Colleges and universities Local and national organizations The revised edition preserves the current standards, but features: Refined performance indicators Supplemental resources on teaching, skill development, and assessment An expanded Opportunities to Learn section State-of-the-art information on health education and behavior change This book is the accepted standard reference on health education, and its standards have been adopted in most states.

### Evidence-based Physical Therapy for the Pelvic Floor

Public Health is regarded as the basis and cornerstone of health, generally and in medicine. Defined as the science and art of preventing disease, prolonging life and promoting health through the organized efforts and informed choices of society, organizations, public and private, communities and individuals, this discipline has been renewed by the incorporation of multiple actors, professions, knowledge areas and it has also been impacted and promoted by multiple technologies, particularly - the information technology. As a changing field of knowledge, Public Health requires evidence-based information and regular updates. Current Topics in Public Health presents updated information on multiple topics related to actual areas of interest in this

## Access PDF Health Program Planning An Educational And Ecological Approach With Powerweb Bind In Card

growing and exciting medical science, with the conception and philosophy that we are working to improve the health of the population, rather than treating diseases of individual patients, taking decisions about collective health care that are based on the best available, current, valid and relevant evidence, and finally within the context of available resources. With participation of authors from multiple countries, many from developed and developing ones, this book offers a wide geographical perspective. Finally, all these characteristics make this book an excellent update on many subjects of world public health.

### Essentials of Environmental Health

Assessment and Planning in Health Programs, Second Edition enables students and practitioners to successfully plan, implement, and evaluate programs and interventions that will assist individuals and groups in maintaining and improving their health. Written in an accessible manner, this comprehensive text provides an overview of needs assessment, program planning, and program evaluation, and explains several goals and strategies for each. It addresses the importance and use of theories, data collection strategies, and key terminology in the field of health education and health promotion. Instructor Resources: Instructor ' s Manual, PowerPoint Presentations Student Resources: Companion website

### Program Planning for Health Education and Health Promotion

Rev. ed. of: Health education planning / Lawrence W. Green. 1st ed.

### Vibrant and Healthy Kids

The skills necessary to plan and deliver efficient health education programs are fundamentally the same, whether it's in a classroom, workplace, hospital, or community. Health Education: Creating Strategies for School & Community Health, Third Edition provides the tools to make appropriate programming decisions based on the needs of the clients and the educational settings. It encourages the systematic development of sound, effective, and appropriate presentation methods and demonstrates the evolving state of health education. The philosophy presented in this text is based on the premise that the core of health education is the process of health education. It is a must-have resource for health education methods courses.

### Planning Programs for Adult Learners

- New York Times bestseller
- The 100 most substantive solutions to reverse global warming, based on meticulous research by leading scientists and policymakers around the world

“ At this point in time, the Drawdown book is exactly what is needed; a credible, conservative solution-by-solution narrative that we can do it. Reading it is an effective inoculation against the widespread perception of doom that humanity cannot and will not solve the climate crisis. Reported by-effects include increased determination and a sense of grounded hope. ” —Per Espen Stoknes, Author, What We Think About When We Try Not To Think About Global Warming

“ There ' s been no real way for ordinary people to get an understanding of what they can do and what impact it can have. There remains no single, comprehensive, reliable compendium of carbon-reduction solutions across sectors. At least until now. . . . The public is hungry for this kind of practical wisdom. ” —David Roberts, Vox

“ This is the ideal environmental sciences textbook—only it is too interesting and inspiring to be called a textbook. ” —Peter Kareiva, Director of the Institute of the Environment and Sustainability, UCLA

In the face of widespread fear and apathy, an international coalition of researchers, professionals, and scientists have come together to offer a set of realistic and bold solutions to climate change. One hundred techniques and practices are described here—some are well known; some you may have never heard of. They range from clean energy to educating girls in lower-income countries to land use practices that pull carbon out of the air. The solutions exist, are economically viable, and communities

## Access PDF Health Program Planning An Educational And Ecological Approach With Powerweb Bind In Card

throughout the world are currently enacting them with skill and determination. If deployed collectively on a global scale over the next thirty years, they represent a credible path forward, not just to slow the earth ' s warming but to reach drawdown, that point in time when greenhouse gases in the atmosphere peak and begin to decline. These measures promise cascading benefits to human health, security, prosperity, and well-being—giving us every reason to see this planetary crisis as an opportunity to create a just and livable world.

### Educating the Student Body

The third edition of *Planning Programs for Adult Learners* explores the development of adult education programs in clear and specific detail. The book offers a popular step-by-step guide that contains information on every area of program planning for adult learners, from understanding the purpose of educational programs to obtaining suitable facilities to incorporating technology appropriately. This important resource is written for educators and practitioners for whom planning programs is a full-time responsibility or only a part of their jobs, as well as volunteers in a variety of organizations. This new edition integrates the relevant literature from the past decade on globalization, culture, and technology that has influenced the world in which adult educators now practice. The book is filled with examples and scenarios that illustrate the precepts and advice from Caffarella's proven Interactive Model of Program Planning and the handy chapter checklists remind practitioners what to focus on in their practice. In addition, the third edition puts the focus on critical administrative tasks and explores the ethical issues related to program planning. With the Interactive Model of Program Planning, the authors provide adult educators and practitioners in all fields a set of intellectual and practical tools to plan effective educational programs for adults.

### Planning Health Promotion Programs

#### Drawdown

*Schools and Health* is a readable and well-organized book on comprehensive school health programs (CSHPs) for children in grades K-12. The book explores the needs of today's students and how those needs can be met through CSHP design and development. The committee provides broad recommendations for CSHPs, with suggestions and guidelines for national, state, and local actions. The volume examines how communities can become involved, explores models for CSHPs, and identifies elements of successful programs. Topics include: The history of and precedents for health programs in schools. The state of the art in physical education, health education, health services, mental health and pupil services, and nutrition and food services. Policies, finances, and other elements of CSHP infrastructure. Research and evaluation challenges. *Schools and Health* will be important to policymakers in health and education, school administrators, school physicians and nurses, health educators, social scientists, child advocates, teachers, and parents.

#### Beyond Instruction

This work provides background and application information needed to plan, implement and evaluate health promotion programmes in a variety of settings. Programmes in the areas of community health, medical care and worksites are examined in detail and presented in an accessible format.

#### Health Education

This text emphasizes evaluation as an indispensable component of program management. The authors stress the importance of monitoring & reviewing internal processes, as well as systematically conceptualizing

## Access PDF Health Program Planning An Educational And Ecological Approach With Powerweb Bind In Card

outcome evaluations.

### Program Planning and Evaluation for the Public Manager

Assessment and Planning in Health Programs, Second Edition enables students and practitioners to successfully plan, implement, and evaluate programs and interventions that will assist individuals and groups in maintaining and improving their health. Written in an accessible manner, this comprehensive text provides an overview of needs assessment, program planning, and program evaluation, and explains several goals and strategies for each. It addresses the importance and use of theories, data collection strategies, and key terminology in the field of health education and health promotion. Important Notice: the digital edition of this book is missing some of the images or content found in the physical edition.

### Schools and Health

Resources for teaching and learning are posted at [tinyurl.com/Glanz4e](http://tinyurl.com/Glanz4e) and [www.med.upenn.edu/hbhe4](http://www.med.upenn.edu/hbhe4). This fourth edition of the classic book, Health Behavior and Health Education: Theory, Research, and Practice provides a comprehensive, highly accessible, and in-depth analysis of health behavior theories that are most relevant to health education. This essential resource includes the most current information on theory, research, and practice at individual, interpersonal, and community and group levels. This edition includes substantial new content on current and emerging theories of health communication, e-health, culturally diverse communities, health promotion, the impact of stress, the importance of networks and community, social marketing, and evaluation.

### Journal of Health, Physical Education, Recreation

This best-selling offering from the APHA/JB Learning Essential Public Health series is a clear and comprehensive study of the major topics of environmental health. Important Notice: The digital edition of this book is missing some of the images or content found in the physical edition.

### National Health Education Standards

Planning Health Promotion Programs This thoroughly revised and updated third edition of Planning Health Promotion Programs provides a powerful, practical resource for the planning and development of health education and health promotion programs. At the heart of the book is a streamlined presentation of Intervention Mapping, a useful tool for the planning and development of effective programs. The steps and tasks of Intervention Mapping offer a framework for making and documenting decisions for influencing change in behavior and environmental conditions to promote health and to prevent or improve a health problem. Planning Health Promotion Programs gives health education and promotion professionals and researchers information on the latest advances in the field, updated examples and explanations, and new illustrative case studies. In addition, the book has been redesigned to be more teachable, practical, and practitioner-friendly.
