### More Or Less a Mess!

The new class has been baptized in blood and fire, but they're still standing. And now the Student Council has plans to change that.

Hello, My Name Is Ruby

Every year, 6 million companies and more than 100,000 products are launched. They all need an awesome name, but many (such as Xobni, Svbtle, and Doostang) look like the results of a drunken Scrabble game. In this entertaining and engaging book, ace naming consultant Alexandra Watkins explains how anyone—even noncreative types—can create memorable and buzz-worthy brand names. No degree in linguistics required. The heart of the book is Watkins's proven SMILE and SCRATCH Test—two acronyms for what makes or breaks a name. She also provides up-to-date advice, like how to make sure that Siri spells your name correctly and how to nab an available domain name. And you'll see dozens of examples—the good, the bad, and the “so bad she gave them an award.” Alexandra Watkins is not afraid to name names.

As an overweight child, author Lori M. Sweeney was ridiculed and called a loser by children and even certain family members. Her weight increased over time and cruel treatment continued. She inherited new names, including the name, "Fatness." A major car accident resulted in two knee surgeries and a broken heart. She could no longer keep up with her toddler or do simple things such as walk or climb stairs. She couldn't find her size in a store and had to special order large, unflattering clothing. With all the courage she could muster, Sweeney persevered. Since diets of the past didn't work, she carefully devised a reasonable plan and created lists of situations that caused overeating and paired them with solutions. As a former chemist, Sweeney had the gift of formulations which carried over into the kitchen where she was able to concoct culinary creations low in fat and calories. Her tips and tricks led to a

The world goes out of its way to make you believe you are not good enough. Maybe you aren't sure you like where you've been, or who you've become. Maybe someone has made you believe a lie about who you are by speaking damaging words to you. The discovery of our true identities does not begin by looking within ourselves, but by looking to the One who made us. Hello, My Name Is will inspire you to not wear the nametag that someone else gave you, but to wear the name of who God says you are. Your name may be "Lonely" . . . He calls you Friend. Your name may be "Failure" . . . He calls you Redeemed. Your name may be "Broken" . . . He calls you Beloved. It is time to tear off the false nametags that cover up your true identity. Understanding who you are begins with knowing Whose you are so you can embrace your destiny as a child of the one true King. "Hello, My Name Is will silence the lies of the enemy so you can hear God whisper, 'You are mine. You are wanted. You are so incredibly loved.'" -- Lysa Terkeurst, New York Times best-selling author and president of Proverbs 31 Ministries "Hello, My Name Is gets to the heart of an issue that haunts the homeless and the hero, the kid and the king, the disabled and the diva -- our identity." -- Randy Frazee, Senior Minister at Oak Hills Church, author of The Heart of the Story "Matthew West brings the rare combination of songwriter and pastor to his ministry. He is a modern-day King David, creating Psalms that touch the heart of God and God's children. Now, as an added blessing to us all, he has compiled his thoughts into a book. A person can almost hear Matthew sing through the pages. I'm deeply grateful for this work, this singer, this friend." -- Max Lucado, New York Times best-selling author "Matthew West has always written honestly in his songs and stories. In his latest book, Hello, My Name Is, Matthew may offer his greatest truth yet: how to discover our God-given identity while building a closer relationship with our Lord. I gained a lot of

A guide to understanding the inner workings and outer limits of technology and why we should never assume that computers always get it right. In *Artificial Unintelligence*, Meredith Broussard argues that our collective enthusiasm for applying computer technology to every aspect of life has resulted in a tremendous amount of poorly designed systems. We are so eager to do everything digitally--hiring, driving, paying bills, even choosing romantic partners--that we have stopped demanding that our technology actually work. Broussard, a software developer and journalist, reminds us that there are fundamental limits to what we can (and should) do with technology. With this book, she offers a guide to understanding the inner workings and outer limits of technology--and issues a warning that we should never assume that computers always get things right. Making a case against technochauvinism--the belief that technology is always the solution--Broussard argues that it's just not true that social problems would inevitably retreat before a digitally enabled Utopia. To prove her point, she undertakes a series of adventures in computer programming. She goes for an alarming ride in a driverless car, concluding "the cyborg future is not coming any time soon"; uses artificial intelligence to investigate why students can't pass standardized tests; deploys machine learning to predict which passengers survived the Titanic

disaster; and attempts to repair the U.S. campaign finance system by building AI software. If we understand the limits of what we can do with technology, Broussard tells us, we can make better choices about what we should do with it to make the world better for everyone.
