What enables some talented people to rise to the top and live their full ambitions at work and in life, while others stop short? In 2007, Joanna Barsh led a team at McKinsey & Company to answer that very question. In the process, they uncovered what distinguishes leaders who are successful from those who achieve true greatness, developing an approach called Centered Leadership. They drew on research from

across the academic fields of leadership, organization behavior, neuroscience, evolutionary psychology and positive psychology. In addition, Barsh interviewed over 160 leaders from many fields - including business, government and the arts - and from many countries. With quantitative research, the team learned that these leaders have mastered practices to find their balance in the midst of chaos and lead from their most resourceful selves, unleashing the potential of others. In 2009, Johanne Lavoie joined to lead development of programs that help executives build these capabilities. Their research and development work continues as more and more leaders experience Centered Leadership. In the business bestseller, *How Remarkable Women Lead*, Barsh described Centered Leadership's five capabilities and the research that underpins it. Here, with colleague Johanne Lavoie, Barsh provides a practical, actionable field guide for implementation. In *Centered Leadership*, Barsh and Lavoie will guide you through the Centered Leadership program. You'll find the interactive tools, exercises, and practices that have helped the men and women participants in Centered Leadership programs gain the skills, courage and confidence to lead. And, along the way, you'll read inspiring stories of remarkable men and women leaders who demonstrate the power of these skills in action. Those early in their careers will learn how to use these skills to explore their passions and accelerate their
