We in the United States have almost come to accept natural disasters as part of our nation's social fabric. News of property damage, economic and social disruption, and injuries follow earthquakes, fires, floods and hurricanes. Surprisingly, however, the total losses that follow these natural disasters are not consistently calculated. We have no formal system in either the public or private sector for compiling this information. The National Academies recommends what types of data should be assembled and tracked.

With the liberalization of the Indian economy, the insurance sector has opened up, and a lot of new players, both multinationals and Indian companies with foreign collaboration, have entered this arena realizing the vast potential in life insurance. A basic knowledge of life insurance has therefore become essential for the students opting for this course as well as for the practitioners. With this view in mind, Dr. Kutty gives in this text a masterly analysis and a holistic view of every dimension of life insurance management in the sequence of 6Ps—purpose, principles, purchase, products, process and people, in an easy to understand language. He strives to demystify the complex world of life insurance and present its fundamentals to all the readers. Based on the author's rich experience in insurance sector over the two decades, the text provides new research insights in the areas such as product comparisons, e.g. portfolio approach to purchase of life insurance. It covers the actuarial dimensions of life insurance, with the minimum use of mathematics. Besides, the text discusses in detail the two core operations of an insurance company—underwriting and claims. The hallmark of this book is its attempt to transform the way marketing and operations in life insurance are approached and its sure guidance on how a professional should approach and manage sales, service, process and people. Key Features

- Separate chapters are devoted to topics such as general insurance, risk management, underwriting, claims and financial management.
- The nature of contracts in general and life insurance contracts in particular is explained.
- Different traditional insurance products such as term insurance and non-conventional products like unit-linked policies are dealt with in detail.

This book is primarily designed for students of management, commerce and those pursuing specific insurance courses. It can also be profitably used by industry practitioners. Finally, the book will be invaluable to managers of Life Insurance companies, Banks (engaged in Bancassurance), and Security firms.

## The Locomotive

Despite its obvious importance and the recent boom in litigation support, valuation of commercial damages for litigation purposes has, until now, lacked a complete methodological framework for accountants, economists, and attorneys. *Measuring Commercial Damages* explains how commercial damages in litigation should be measured and provides an integrated accounting and economics approach that explains exactly what accountants need to know about economics to measure commercial damages. Valuing the damages of a company in litigation requires not only a far-reaching knowledge of the research and practices of accounting, but also a working knowledge of macroeconomics, microeconomics, econometrics, and finance, including investment analysis, capital market theory, and corporate finance. While few experts possess strengths in all of the required areas, this book's easy-to-understand methods offer an integrated approach so that practitioners in the fields of accounting, economics, and law can clearly understand and effectively utilize material presented from other fields. *Measuring Commercial Damages* is the first book to put forth a standard methodology for the most
