It's a murder mystery on the moon in this humorous and suspenseful space adventure from the author of *Belly Up* and *Spy School* that *The New York Times Book Review* called "a delightful and brilliantly constructed middle grade thriller." Like his fellow lunarnauts—otherwise known as Moonies—living on Moon Base Alpha, twelve-year-old Dashiell Gibson is famous the world over for being one of the first humans to live on the moon. And he's bored out of his mind. Kids aren't allowed on the lunar surface, meaning they're trapped inside the tiny moon base with next to nothing to occupy their time—and the only other kid Dash's age spends all his time hooked into virtual reality games. Then Moon Base Alpha's top scientist turns up dead. Dash senses there's foul play afoot, but no one believes him. Everyone agrees Dr. Holtz went onto the lunar surface without his helmet properly affixed, simple as that. But Dr. Holtz was on the verge of an important new discovery, Dash finds out, and it's a secret that could change everything for the Moonies—a secret someone just might kill to keep

'Maisie Hill has written a bloody brilliant book (pun intended). Everything you need to know about periods and how they affect you and your life is here. It's revolutionary' - Miranda Sawyer 'Thank GOODNESS for Maisie Hill! Flipping open the lid on a vital conversation. It's about time we claimed the power of our periods!' - Gemma Cairney, broadcaster & co-founder of Boom Shakalaka Productions 'This is such an important book. Maisie's insights and cycle strategy have changed my life and my cycle. Period Power is written with such intelligence, humour and a deep understanding of women's health. If you have a period you need to read this book.' - Anna Jones, author of The Modern Cook's Year A profound and practical blueprint for aligning daily life with your menstrual cycle. Period Power is the handbook to periods and hormones that will leave you wondering why the hell nobody told you this sooner. The hormones of the menstrual cycle profoundly influence our energy, mood and behaviour, but all too often we're taught that our hormones make us unreliable, moody bitches, or that it's our lot in life to put up with 'women's problems'. Maisie Hill, a women's health practitioner, knows the power of working with the menstrual cycle and refuses to accept this theory. Instead, Maisie believes that our hormones are there to serve us and, if utilized correctly, can be used to help you get what you want out of life. Yes, we are hormonal, and that's a very good thing. This revolutionary book reveals everything you need to know about taking control of your menstrual cycle and outlines The Cycle Strategy to help us perform at our best, throughout our cycle. In Period Power you will discover how to: - maximise your natural superpowers each month while making adjustments for the darker days, and use Maisie's favourite tips to improve them - identify your personal patterns, powers and pitfalls for each phase of the menstrual cycle - plan your month to perform at your best in all aspects of your life - figure out if you have a hormonal imbalance and what to do about it. Period Power is a no-nonsense guide with all the tools you need to improve your menstrual health.

In Tides: The Science and Spirit of the Ocean, writer, sailor, and surfer Jonathan White takes readers across the globe to discover the science and spirit of ocean tides. In the Arctic, White shimmies under the ice with an Inuit elder to hunt for mussels in the dark cavities left behind at low tide; in China, he races the Silver Dragon, a twenty-five-foot tidal bore that crashes eighty miles up the Qiantang River; in France, he interviews the monks that live in the tide-wrapped monastery of Mont Saint-Michel; in Chile and Scotland, he investigates the growth of tidal power generation; and in Panama and Venice, he delves into how the threat of sea level rise is changing human culture—the very old and very new. Tides combines lyrical prose, colorful adventure travel, and provocative scientific inquiry into the elemental, mysterious paradox that keeps our planet's waters in constant motion. Photographs, scientific figures, line drawings, and sixteen color photos

dramatically illustrate this engaging, expert tour of the tides.

Both unflinchingly funny and deeply heartfelt, MEDALLION STATUS is a hilarious, thoughtful examination of status, fame, and identity. It's about the weird trauma that comes with success that feels unseemly to discuss (because who will sympathise with you?); about the addiction to status that sometimes (always) follows success; and about the way we all deal with those moments in public and private life when we realise we don't quite have it anymore.

Travel just a few miles beyond Acadia National Park and you will find a little known and seldom visited patchwork of quaint fishing villages, rocky coastlines, wild blueberry fields, and vast stretches of forestland reaching all the way to the Canadian border, a hundred miles away. Beyond Acadia: Exploring the Bold Coast of Down East Maine is a travel guide that brings together, for the first time, the amazing opportunities to enjoy a day or a week in Down East Maine, leaving the crowds and traffic of Acadia National Park and Mount Desert Island behind. Here you will find trails on The Bold Coast overlooking cliffs that plunge a hundred feet to the crashing surf below, quiet country roads winding through the forest, picturesque villages, art galleries, breweries, wineries, farm stands, campgrounds and inns. What you won't find

are t-shirt shops, traffic jams, or overcrowded hiking trails. Beyond Acadia is an engaging and informative guide to this relatively undiscovered area east of Ellsworth and Winter Harbor, stretching to the Canadian border. Compelling photos, clear maps and an easy to understand format will make the book indispensable for people who long to take their Maine experience "beyond Acadia," both literally and figuratively.

If you have ever wondered about space travel, now you have the opportunity to understand it more fully than ever before. Traveling into space and even emigrating to nearby worlds may soon become part of the human experience. Scientists, engineers, and investors are working hard to make space tourism and colonization a reality. As astronauts can attest, extraterrestrial travel is incomparably thrilling. To make the most of the experience requires serious physical and mental adaptations in virtually every aspect of life, from eating to intimacy. Everyone who goes into space sees Earth and life on it from a profoundly different perspective than they had before liftoff. Astronomer and former NASA/ASEE scientist Neil F. Comins has written the go-to book for anyone interested in space exploration. He describes the wonders that travelers will encounter—weightlessness, unparalleled views of Earth and the cosmos, and the opportunity to walk on another world—as well as the dangers: radiation, projectiles, unbreathable atmospheres, and potential equipment failures. He also provides insights into specific trips to destinations including suborbital flights, space stations, the Moon, asteroids, comets, and Mars—the top candidate for colonization. Although many challenges are technical, Comins outlines them in clear language for all readers. He synthesizes key issues and cutting-edge research in astronomy, physics, biology, psychology, and sociology to create a complete manual for the ultimate voyage.

Moon Washington

For as long as ten-year-old Moon can remember, he has lived out in the forest in a shelter with his father. They keep to themselves, their only contact with other human beings an occasional trip to the nearest general store. When Moon's father dies, Moon follows his father's last instructions: to travel to Alaska to find others like themselves. But Moon is soon caught and entangled in a world he doesn't know or understand; he's become property of the government he has been avoiding all his life. As the spirited and resourceful Moon encounters constables, jails, institutions, lawyers, true friends, and true enemies, he adapts his wilderness survival skills and learns to survive in the outside world, and even, perhaps, make his home there. This title has Common Core connections. *Alabama Moon* is a 2007 Bank Street - Best Children's Book of the Year.
