We are a couple with two boys (ages 7 and 5) living in Seattle, Washington. We came to Seattle in 2008 to study at the University of Washington and since then have fallen in love with the natural beauty of the area and enjoy exploring the many beautiful sites around Washington state. Entering into our 9th year in Seattle, we began to look back at our favorite places and started a blog to make a record of our memories. During this time, many friends around us that had just moved into the area or otherwise had plans to visit asked us for advice on where to go and what to do to enjoy their time here in full. This made us think that our experience could be helpful to other people like us - especially families with young kids that are looking for short (or long) kid-friendly trips and activities in the area. This book is a collection of our family's memories and the information that we have researched, as well as pictures that we have taken ourselves - so rather than presenting viewers with professional travel information, its intention is to share our weekly casual and refreshing getaways for ideas on spending time with the kids and showing them the great outdoors.

\* An eloquently written story, laced with appreciations of the region's natural history \* Includes historic photographs In midwinter 1920, Floyd Schmoie and his bride struggled up Mount Rainier on snowshoes on a long-delayed honeymoon. As the new caretakers at Paradise Inn, they would be alone in a towering world of snow and ice and incomparable beauty, until the plows arrived to free them on the fourth of July. So began a long love affair with Mount Rainier. And here is Floyd Schmoie's account of it; a delightful and informative portrait of a mountain through the seasons of the year. Through his personal narrative, Schmoie writes of many things that combined to cast a spell on him: the shy mountain goat, the reproductive processes of trees and plants, techniques of climbing, the habits of glaciers and volcanoes, the curious fact of a mouse being found at very high altitude, the peculiarities of tourists-and much more. This is a book for anyone drawn to the mysteries of the high country.

#### **50 Hikes in Mount Rainier National Park**

An imposing geologic feature that once provided a variety of natural resources for the indigenous people who lived nearby, the sheer size of Mount Rainier prompted many to call it simply The Mountain, or "Takhoma." The volcanic cone towers to 14,410 feet and comprises about one-fourth of the 377-square-mile national park. The area's formidable physical characteristics had long impeded modern anthropological research. In 1963, when faculty at Washington State University decided to explore the locality's prehistory under contract with the National Park Service, its archaeological past was virtually unknown. Combining an exhaustive search of pre-existing data and literature with a field study comprised of interviewing elderly Native Americans, Allan Smith sought to ascertain the locations of possible archaeological sites in the national park, and secure data to assist in their interpretation. Takhoma: Ethnography of Mount Rainier National Park presents the analysis of the collected and recovered material addressing native toponymy, tribal identities and boundaries, camp sites and structures, aboriginal economic and other uses of the region, and native trails, travel, and trade. This informative investigation served as a valuable first step toward unraveling the

Carr delves into the planning and motivations of the people who wanted to preserve America's scenic geography. He demonstrates that by drawing on historical antecedents, landscape architects and planners carefully crafted each addition to maintain maximum picturesque wonder. Tracing the history of landscape park design from British gardens up through the city park designs of Frederick Law Olmsted, Carr places national park landscape architecture within a larger historical context.

range. Included are 10 new topos, updated maps, over 100 photographs (75 with route overlays), route information and driving directions. Hikers, scramblers, serious climbers and Northwest rescue organizations, alike, have relied on Fred Beckey's Cascade Alpine Guides for decades to lead them through this wild mountain range. In addition to their comprehensiveness, the books provide a rare combination of aerial photos with route overlays, three-dimensional illustrated maps and climbing topos. The section of the North Cascades covered in this volume is roughly a pie-shaped area bounded by Hwy 97 and the Columbia River to the east, Lake Chelan to the west, and Hwy 20 to the north. Except for glaciers and some year-round snow fields, it's mostly dry, lonesome, open country, with beautiful granite spires jutting to the sky.

### **Mount Rainier**

On clear days, the mammoth volcano Mount Rainier dominates the Seattle and Tacoma skylines and can be seen from Whidbey Island to Yakima and the central Washington wheat fields. "The Mountain's out!" is a cheerful local greeting, especially after a long spell of overcast weather. Sunrise to Paradise explores the rich history of this symbol of the Pacific Northwest and the national park that preserves it. Mount Rainier is the fifth highest peak in the United States outside Alaska, and it soars higher above its immediate base than does any other in the lower forty-eight. Sunrise to Paradise describes its geological and glacial origins and current ecological health, and the century-old stewardship of Mount Rainier National Park. Its stories include accounts by Native people such as Saluskin and Wapowety, climbers from John Muir and Fay Fuller to Willi Unsoeld and Lou Whittaker, and entrepreneurs from the Longmire family to Paul Sceva. Here, too, are the tales of scientists and tourists, park rangers and volunteers. Numerous illustrations span the decades. Some of the photographs were taken from albums of the 1912 and 1915 Mountaineers outings; others are by noted photographers of the past like Imogen Cunningham and Asahel Curtis and by contemporary photographers including Ira Spring. There are paintings by Abby Williams Hill and George Tsutakawa and a series specially created by Dee Molenaar.
