The Phantom Atlas

Senior High Core Collection

Guided by a tattered map, accompanied by Thomas the Pig Boy, and inspired by the storyteller's blood that thrums through her veins, eleven-year-old Trinket searches for the seven stories she needs to become a bard like her father, who disappeared years before. She befriends a fortune-telling gypsy girl; returns a child stolen by the selkies to his true mother; confronts a banshee and receives a message from a ghost; helps a village girl outwit—and out-dance—the Faerie Queen; travels beyond the grave to battle a dastardly undead Highwayman; and meets a hound so loyal he fights a wolf to the death to protect the baby prince left in his charge. All fine material for six tales, but it is the seventh tale, in which Trinket learns her father's true fate, that changes her life forever. The Seven Tales of Trinket is a Kirkus Reviews Best Children's Book of 2012

The California Tales

"A fine and lively collection of exploration stories" from the author of Barrow's Boys (Kirkus Reviews). On John Franklin's 1820 expedition to find the Northwest Passage, Michel Teroahaute cannibalized two team members and was preparing a third when he was caught and killed. When Rene La Salle set off for the Mississippi Delta in 1684, he missed the target by five hundred miles, but on landing, immediately built a prison for those who fell asleep on watch. Consummate storyteller Fergus Fleming brings together these and forty-three other gripping stories spanning three ages of exploration in Off the Map. Off the Map recounts episodes both classic and forgotten: The "classics" are brought to life in more vivid colors than ever before; the lesser-known stories offer accounts of extraordinary feats that have long lain hidden. From the Renaissance golden age of Columbus, da Gama, and Magellan, to the twentieth-century heroics of polar explorers such as Peary, Scott, and Amundsen, this is an unforgettable journey into the annals of adventure. "A first-rate one-volume . . . introduction to many hair-raising stories of exploration." —The New York Times "Each story is short, punchy, and crammed with facts . . . Fleming possesses an eye for wry detail." —Adventure "There

isn't a dud in the lot . . . Adventure reading of a high order: brisk, fresh and full of color."
—Kirkus Reviews

Pam on the Map

The first West Europeans to winter in the high Arctic and survive, Dutch sailing-master William Barents and his 16-member crew battled scurvy, hunger, the assaults of bears, and the intense winter cold, then made a 1,600-mile escape in open boats. Barents died on the way home, but his voyage was meticulously recorded in remarkably vivid detail by one of the survivors.

More than fifty specialists have contributed to this new edition of volume 4 of The Cambridge Bibliography of English Literature. The design of the original work has established itself so firmly as a workable solution to the immense problems of analysis, articulation and coordination that it has been retained in all its essentials for the new edition. The task of the new contributors has been to revise and integrate the lists of 1940 and 1957, to add materials of the following decade, to correct and refine the bibliographical details already available, and to re-shape the whole according to a new series of conventions devised to give greater clarity and consistency to the entries.

Tales from the Archives: Volume 2

Prisoners of Geography meets Bill Bryson: a funny, fascinating, beautifully illustrated - and timely - history of countries that, for myriad and often ludicrous reasons, no longer exist. "Countries are just daft stories we tell each other. They're all equally implausible once you get up close." Countries die. Sometimes it's murder, sometimes it's by accident, and sometimes it's because they were so ludicrous they didn't deserve to exist in the first place. Occasionally they explode violently. A few slip away almost unnoticed. Often the cause of death is either 'got too greedy' or 'Napoleon turned up'. Now and then they just hold a referendum and vote themselves out of existence. This is an atlas of 48 nations that fell off the map. The polite way of writing an obituary is: dwell on the good bits, gloss over the embarrassing stuff. This book refuses to do so, because these dead nations are so full of schemers, racists, and con men that it's impossible to skip the embarrassing stuff. Because of this - and because treating nation-states with too much reverence is the entire problem with pretty much everything - these accounts are not concerned with adding to the earnest flag saluting in the world, however nice some of the flags might be.

A Map of Days

This map-tastic middle grade story from Andrew Clements gives the phrase “uncharted territory” a whole new meaning! Alton Barnes loves maps. He’s loved them ever since he was little, and not just for the geography. Because maps contain more information than just locations, and that’s why he likes to draw them as well as read them. Regular “point A to point B” ones, sure, but also maps that explain a whole lot more—like what he really thinks about his friends. And teachers. Even the principal. So when Alton’s maps are stolen from his locker, there’s serious trouble on the horizon...and he’ll need some serious cartographic skills to escape it. From “a genius of gentle, high-concept tales set in suburban middle schools” (The New York Times), this stand-alone story is off the charts.

Discover the mysteries within ancient maps — Where exploration and mythology meet This richly illustrated book collects and explores the colorful histories behind a striking range of real antique maps that are all in some way a little too good to be true. Mysteries within ancient maps: The Phantom Atlas is a guide to the world not as it is, but as it was imagined to be. It's a world of ghost islands, invisible mountain ranges, mythical civilizations, ship-wrecking beasts, and other fictitious features introduced on maps and atlases through mistakes, misunderstanding, fantasies, and outright lies. Where exploration and mythology meet: Author Edward Brooke-Hitching is a map collector, author, writer for the popular BBC Television program QI and a Fellow of the Royal Geographical Society. He lives in a dusty heap of old maps and books in London investigating the places where exploration and mythology meet. Cartography's greatest phantoms: The Phantom Atlas uses gorgeous atlas images as springboards for tales of deranged buccaneers, seafaring monks, heroes, swindlers, and other amazing stories behind cartography's greatest phantoms. If you are a fan of this popular genre and a reader of books such as Prisoners of Geography, Atlas of Ancient Rome, Atlas Obscura, What If, Book of General Ignorance, or Thing Explainer, your will love The Phantom Atlas

The Wagner Story Book

This powerful and lyrical debut novel is to Syria what *The Kite Runner* was to Afghanistan; the story of two girls living eight hundred years apart—a modern-day Syrian refugee seeking safety and an adventurous mapmaker’s apprentice—“perfectly aligns with the cultural moment” (*The Providence Journal*) and “shows how interconnected two supposedly opposing worlds can be” (*The New York Times Book Review*). This “beguiling” (*Seattle Times*) and stunning novel begins in the summer of 2011. Nour has just lost her father to cancer, and her mother moves Nour and her sisters from New York City back to Syria to be closer to their family. In order to keep her father’s spirit alive as she adjusts to her new home, Nour tells herself their favorite story—the tale of Rawiya, a twelfth-century girl who disguised herself as a boy in order to apprentice herself to a famous mapmaker. But the Syria Nour’s parents knew is changing, and it isn’t long before the war reaches their quiet Homs neighborhood. When a shell destroys Nour’s house and almost takes her life, she and her family are forced to choose: stay and risk more violence or flee across seven countries of the Middle East and North Africa in search of safety—along the very route Rawiya and her mapmaker took eight hundred years before in their quest to chart the world. As Nour’s family decides to take the risk, their journey becomes more and more dangerous, until they face a choice that could mean the family will be separated forever. Following alternating timelines and a pair of unforgettable heroines coming of age in perilous times, *The Map of Salt and Stars* is the “magical and heart-wrenching” (*Christian Science Monitor*) story of one girl telling herself the legend of another and learning that, if you listen to your own voice, some things can never be lost.

The New Cambridge Bibliography of English Literature

Exhibit-A To dream the im-poss-ible dream to fight the un-beat-able foe to run where the brave (or wise) dare not go -From the Broadway production of The Man of La Mancha, music by Darien and Leigh, 1965 Gracing the awesome coastline of California like a set of stained glass and adobe rosary beads, the 18th-century chain of twenty-one old Spanish missions offer the modern tourist a window into the history of the golden state at once colorful, quaint, often romanticized and just possibly not as benign as the tourist literature would lead us to believe. Investigating just that possibility, three amateur researchers have uncovered an historic mission artifact that, proven authentic, could shaken the golden state to its foundations. Nor would the repercussions end there, cautioned research director Brother Kolbe. Not by a long shot. At the state capitol in Sacramento, the governors Mission Affairs Department, and entrenched bereaucrazy representing the vested interest of the church, civic groups, university and private concerns, is naturally interested in the discovery. With real estate totaling in the multi-billion dollar range, including treasure troves of priceless relics and artwork, the Mission Affairs Department is somewhat hesitant at relinquishing control of their flock of iconic golden geese. Exposing the scandalous mission hullabaloo to the light of day may very well, researcher Samara Del Rio smiled with a perfectly beatific malfeasance, induce a state of anarchy. This my quest, to follow that star no matter how hopeless, no matter how far Along with Sam, ostensibly the team sociologist; Franciscan Brother and linguist Kolbe McCeanna and computer technician Felicia Bonaventura have tracked the legendary article to the derelict ruins of a minor auxiliary mission, Mision Estancia San Micmac, abandoned deep in the cathedral redwoods of Californias rugged pacific coast foothills. Exhibit-A.: as Sacramento knows, the notorious artifact is a legendary mission document lost since the colonial era, and thought to be a Spanish translation of aboriginal petroglyphs, entitled Las Cuentitas Primavera de Isla Califia. Past as prologue, a highly divisive work of folkloric Outside Art, colonial-era historians date the slim manuscript to the year 1561. Spakespearean scholars, however, citing key internal references to The Bards colonial-era play The Tempest, insist that the text is no older that the year 1611. Anti-Stratfordians, of course, call the Spakespearean theory leaky as an unstaunched wench. Adding to the debate, pre-Columbian archivists at Villa Poggio Gherado in Canterbury, England claim tevidence supporting a composition date of 1348. Equally divided, modern pundits dismiss Las Cuentitas as nothing more than psychosocial gibberish and third-rate poetic doggerel anyway, or else venerate the document as instrumental to a radical psychosocial transformation. Either way, if birds of a feather flock together than the infamous manuscript resembles a traditional book to the extent a penguin resembles an ostrich. [Embedded in translation throughout the plot of The California Tales], Las Cuentitas represents an extraordinary multimedia-literary genre suppressed censored and banned since the 1960s as irredeemably subversive to the status quo. During its brief hayday in the sun, the tempestuous genre was known as Prosperos Salient Heliotropic Articulation Grids: pSHAGs. And, particularly threatening to the dominate paradigm, pSHAG poetry, (or poetry), was known, rather tongue-in-cheek, as Teleoethanantological Neuropeptidal Algorithms: T.N.A.s. Moreover, reputedly encrypted within a Prospero SHAG TNA are the sole surviving fragments of the theoretical Archetypical Tale: the mother of all manuscripts, the lore at the core. Archetypical Tale theorists insist that this so-called consummate communique is simultaneously primordial and pansophic, pro

New islands are under construction or emerging because of climate change. Eccentric enclaves and fantastic utopian experiments are multiplying. Once-secret fantasy gardens are cracking open their doors to outsiders. Our world is becoming stranger by the day—and Alastair Bonnett observes and captures every fascinating change. In *Beyond the Map*, Bonnett presents stories of the world's most extraordinary spaces—many unmarked on any official map—all of which challenge our assumptions about what we know—or think we know—about our world. As cultural, religious and political boundaries ebb and flow with each passing day, traditional maps unravel and fragment. With the same adventurous spirit he effused in the acclaimed *Unruly Places*, Bonnett takes us to thirty-nine incredible spots around the globe to explore these changing boundaries and stimulate our geographical imagination. Some are tied to disruptive contemporary political turbulence, such as the rise of ISIL, Russia's incursions into Ukraine and the Brexit vote in the United Kingdom. Others explore the secret places not shown on Google Earth or reflect fast-changing landscapes. *Beyond the Map* journeys out into a world of mysterious, daunting and magical spaces. It is a world of hidden cultures and ghostly memories, of uncountable new islands and curious stabs at paradise. From the phantom tunnels of the Tokyo subway to a stunning movie-set re-creation of 1950s-era Moscow; from the caliphate of the Islamic State to virtual cybertopias—this book serves as an imaginative guide to the farthest fringes of geography.
