### QuickBooks 2016: The Missing Manual

Small businesses are the backbone of the U.S. economy. They are the biggest job creators and offer a path to the American Dream. But for many, it is difficult to get the capital they need to operate and succeed. In the Great Recession, access to capital for small businesses froze, and in the aftermath, many community banks shuttered their doors and other lenders that had weathered the storm turned to more profitable avenues. For years after the financial crisis, the outlook for many small

businesses was bleak. But then a new dawn of financial technology, or “fintech,” emerged. Beginning in 2010, new fintech entrepreneurs recognized the gaps in the small business lending market and revolutionized the customer experience for small business owners. Instead of Xeroxing a pile of paperwork and waiting weeks for an answer, small businesses filled out applications online and heard back within hours, sometimes even minutes. Banks scrambled to catch up. Technology companies like Amazon, PayPal, and Square entered the market, and new possibilities for even more transformative products and services began to appear. In *Fintech, Small Business & the American Dream*, former U.S. Small Business Administrator and Senior Fellow at Harvard Business School, Karen G. Mills, focuses on the needs of small businesses for capital and how technology will transform the small business lending market. This is a market that has been plagued by frictions: it is hard for a lender to figure out which small businesses are creditworthy, and borrowers often don't know how much money or what kind of loan they need. New streams of data have the power to illuminate the opaque nature of a small business's finances, making it easier for them to weather bumpy cash flows and providing more transparency to potential lenders. Mills charts how fintech has changed and will continue to change small business lending, and how financial innovation and wise regulation can restore a path to the American Dream. An ambitious book grappling with the broad significance of small business to the economy, the historical role of credit markets, the dynamics of innovation cycles, and the policy implications for regulation, *Fintech, Small Business & the American Dream* is relevant to bankers, fintech investors, and regulators; in fact, to anyone who is interested in the future of small business in America.

Business Management and Financial Organization with Dual Practice Software  
The voice on the other end of the phone was beyond frustrated. It was the Office Manager and Doctor of a lucrative practice trying to make sense of what their practice software stated they received as income vs what the CPA had on the financial reports. It was a tangled mess and they needed help! The challenge of dual business software exists. Money In, Money Out does not deal with the step-by-step process of how to use either software, but instead focuses on how the day-to-day process of organizing that financial information can and should be managed together. With dual business software use in the practice, the necessity for a book that defines the systems and procedures in a practice has grown imperative. Written by the Financial Organizational Expert, Susan Gunn pulls from her 21 years of working with practices nationally to understand the business side of their practice and how to organize their financial information by implementing systems and procedures to help protect the practice from embezzlement. Valuable advice

from notable industry thought leaders include Teresa Duncan (Odyssey Management), Kim McClesky (Avitus Group), Andy Cleveland (Dental Accounts Receivable Ninja), Cheryl Donahue (Merchant Advocate), Sally McKenzie (McKenzie Management), Debbie Castagna (Castagna Coaching), Kate Willeford (Willeford Group), Theresa Narantic (Theresa Narantic Inc.), and Virginia Moore (Moore Practice Success). Susan's 40th book, Money In, Money Out offers readers a mesmerizing plot line about financial organization and the spellbinding romantic relationship between the three major players: #1 Accounts Receivable (Money In), #2 Accounts Payable (Money Out) and #3 what's left at the end of the day in your bank account!
