Oral diseases are among the most prevalent diseases globally and have serious health and economic burdens, greatly reducing quality of life for those affected. The most prevalent and consequential oral diseases globally are dental caries (tooth decay), periodontal disease, tooth loss, and cancers of the lips and oral cavity. In this first of two papers in a Series on oral health, we describe

A dental implant (also known as an endosseous implant or fixture) is a surgical component that interfaces with the bone of the jaw or skull to support a dental prosthesis such as a crown,

bridge, denture, facial prosthesis or to act as an orthodontic anchor. The basis for modern dental implants is a biologic process called osseointegration, in which materials such as titanium form an intimate

Straumann® BLX

The key to comprehensive oral healthcare is to be based around patient-centered care. The current challenge in this era is the rapid increase of dental treatment cost, the steady incline of population age, the chronic oral diseases that have affected the quality of life, and the need for dental treatment especially for patients from remote areas with difficult-to-reach geographical locations [].

Align Technology was founded by Zia Chishti and Kelsey Wirth in 1997 and began working on the development of a clear aligner. Align received FDA clearance to market the Invisalign system in 1998 and it was first marketed in 2000. Align Technology went public on January 26, 2001 on the Nasdaq Stock Market.

Bing: Quintessence Of Dental Technology 2019

About 39% perceived a need for dental care and 32.3% experienced dental pain with problem in eating and cleaning teeth. Those not perceiving a need for dental care were more likely to have an impact (OR: 2.3; CI: 1.2 – 4.4). Males had higher OIDP ADD scores for dental pain than females ($p = 0.015$). Conclusion: Overall impact was less than 50%.

The safe sedation of children for procedures requires a systematic approach that includes the following: no administration of sedating medication without the safety net of medical/dental supervision, careful presedation evaluation for underlying medical or surgical conditions that would place the child at increased risk from sedating medications, appropriate fasting for elective procedures and

Dental implant - Wikipedia

In a systematic review, Machado and associates (2019) examined the safety and effectiveness of BTX-A for painful temporomandibular disorders. These investigators searched for RCTs in 10 databases, from inception to February 12, 2019 (Medline, Embase, CENTRAL, LILACS, BBO, Web of Science, Scopus, ClinicalTrials.gov, WHO and OpenGrey).
