### Scaling Teams

Two leaders in the field offer a compelling analysis of the current state of the art and reveal the steps we must take to achieve a truly robust artificial intelligence. Despite the hype surrounding AI, creating an intelligence that rivals or exceeds human levels is far more complicated than we have been led to believe. Professors Gary Marcus and Ernest Davis have spent their careers at the forefront of AI research and have witnessed some of the greatest milestones in the field, but they argue that a computer beating a human in Jeopardy! does not signal that we are on the doorstep of fully autonomous cars or superintelligent machines. The achievements in the field thus far have occurred in closed systems with fixed sets of rules, and these approaches are too narrow to achieve genuine intelligence. The real world, in contrast, is wildly complex and open-ended. How can we bridge this gap? What will the consequences be when we do? Taking inspiration from the human mind, Marcus and Davis explain what we need to advance AI to the next level, and suggest that if we are wise along the way, we won't need to worry about a future of machine overlords. If we focus on endowing machines with common sense and deep understanding, rather than simply focusing on statistical analysis and gathering ever larger collections of data, we will be able to create an AI we can trust--in our homes, our cars, and our doctors' offices. Rebooting AI provides a lucid, clear-eyed assessment of the current science and offers an inspiring vision of how a new generation of AI can make our lives better.

### **Unstoppable Teams**

*Shoes of Prey* launched in 2009. It allowed people to design their dream shoes online, get them expertly manufactured, and have them shipped to anywhere in the world within two weeks. The startup broke even at two months, hit multi-million dollar revenues in under two years, raised tens of millions in funding from top-tier investors and shipped to more than 100 countries. All the metrics pointed to huge scalability. To a huge business. To a huge success. But it didn't succeed. In 2018 the business failed. And this is that story. *Reboot* tells the truth of what it is like to be at the helm of a global business. From the high highs of besting Karl Lagerfeld on global awards to the low lows of closing the doors on your dream, join author Jodie Fox on a raw journey as she reveals for the first time the story behind the story of fashion darling *Shoes of Prey*. This incredible ride will share lessons on raising capital, building a brand, finding suppliers, doing business in China and, most importantly, how to learn and grow from your successes and your mistakes and be ready every day to reboot for the next challenge.

### **The Great Reboot**

"Every so often, you meet people who radiate joy--who seem to know why they were put on this earth, who glow with a kind of inner light. This inner peace, David Brooks reveals, comes not from a life of self-centered achievement but a life of interdependence and commitment to others. In *The Second Mountain*, David Brooks explores the four main commitments that define a virtuous and meaningful life: to a spouse and family, to a vocation, to a philosophy or faith, and to a community. Our personal fulfillment ultimately depends on how well we choose and execute these commitments. We have taken individualism to the extreme, Brooks argues, and in the process we have torn the social fabric in a thousand different ways. In *The Second Mountain*, Brooks gives us the tools to repair our fractured society, and shows what can happen when we put commitment-making at the center of our lives." -- back cover.

### **The Art of Being a Brilliant Teenager**

Bobby Herrera has a simple leadership philosophy: -We all struggle. -Inside every struggle is a gift. -Leaders share their gifts with others. In *The Gift of Struggle*, Bobby Herrera, cofounder and CEO of Populus Group, lives that philosophy by telling the stories of his struggles, identifying the gifts he found,

and sharing those gifts with you.

### **The 100X Leader**

More Americans are choosing to take time off from work to relax or re-examine their priorities, so they can return to work energized. Some companies offer formal sabbatical programs, but how can the average person take time off to evaluate their direction, explore their passions, and make time for the things that are really important? Whether you're disillusioned with your career, yearning to follow a dream, or taking time out after a layoff, now is the time to step back and reboot. This book will show you how you can give yourself the best gift ever--the gift of time. People who take sabbaticals report feeling happier, and they return to their jobs refreshed, reinvigorated, and ready to tackle new challenges. *Reboot Your Life* draws upon the experiences of the four authors and their interview subjects: 200 people who have taken sabbaticals and 150 organizations offering sabbatical programs. The book includes real-life stories and exercises to help the reader figure out how to plan for and take a sabbatical, or how to use unexpected time off.

### **Extraordinary Influence**

VisuaLeadership [noun]: The art and science of applying visual thinking and visual communication tools, tips, and techniques, in order to turn your vision into reality. If a picture is worth a thousand words, and finding the right words takes time, and time is money, then wouldn't it follow that business leaders could make more money—in less time—if they simply took a more “visual” approach to how they manage and lead? Okay, it's not quite that simple...but VisuaLeadership will forever change the way you think and communicate by showing how you can quickly and easily leverage the power of visual imagery, mental models, metaphor, analogy, storytelling, and humor to help you take your game to a whole new level. The French novelist Marcel Proust famously wrote that, “The real voyage of discovery consists not in seeking new lands, but in seeing with new eyes.” So, if your vision is to become a better communicator and presenter, a more innovative thinker, a more productive performer, a more efficient manager, a more effective coach, or a more visionary and inspirational leader, then this exciting new book will open your “mind's eye” to a whole new world: The world of VisuaLeadership. “Have you added visual communication to your leadership toolbox? According to Todd Cherches, if you haven't, you're missing out on a powerful tool to capture attention, aid comprehension, and enable your team members to retain the information you need them to use. Packed with examples, VisuaLeadership will help you develop this skill so that you can become a better communicator, innovator, and leader.” —Daniel H. Pink, author of *When and Drive* “The most effective communicators and leaders use the power of story to influence and inspire action. In VisuaLeadership, Cherches demonstrates how every role can express their ideas through the use of visual imagery and visual language. This book will help anyone discover how to become a visual leader.” —Nancy Duarte, CEO and bestselling author “I always say that ‘what got you here...won't get you there.’ To help you ‘get there,’ executive coach Todd Cherches, in his wonderful new book, VisuaLeadership, demonstrates how we can all leverage the power of visual thinking to envision—and to achieve—a more successful future.” —Marshall Goldsmith, the world's #1 Leadership Thinker and Executive Coach

## The Gift of Struggle

The DNA of business has changed. Forever. You can blame technology, smartphones, social media, online shopping and everything else, but nothing changes this reality: we are in a moment of business purgatory. So, what are you going to do about it? Mitch Joel, one of the world's leading experts in new media, warns that the time has come to CTRL ALT DELETE. To reboot and to start re-building your business model. If you don't, Joel warns, not only will your company begin to slide backwards, but you may find yourself unemployable within five years. That's a very strong warning, but in his new book, CTRL ALT DELETE, Joel explains the convergence of five key movements that have changed business forever. The movements have already taken place, but few businesses have acted on them. He outlines what you need to know to adapt right now. He also points to the seven triggers that will help you take advantage of these game-changing factors to keep you employable as this new world of business unfolds. Along the way, Joel introduces his novel concept of "squiggle" which explains how you can learn to adapt your personal approach to your career, as new technology becomes the norm. In short, this

is not a book about "change management" but rather a book about "changing both you AND your business model."

### **Think Like a Monk**

There are plenty of leadership how-to books, filled with advice such as "Just do this to get ahead!" We're overdue for a book that warns business leaders and CEOs what not to do, and why. *The Leadership Killer: Reclaiming Humility in an Age of Arrogance* aims to help aspiring, early-stage, and experienced leaders alike answer a critical question: "How will I use my leadership power?" Too many leaders are increasingly abusing their position, in the process damaging themselves and the people they're charged with leading. This is particularly true for men in leadership roles, as the #MeToo movement has brought to light the scale of long-standing male abuses of power that have been happening just below the surface. Co-authored by globally renowned author and executive development trainer Bill Treasurer and retired U.S. Navy SEAL Captain John Havlik, this book brings together two unique perspectives—civilian and military—to explore precisely why some good leaders go bad. With decades worth of insight from training elite military teams, special forces, global companies and organizations, *The Leadership Killer* also contains stories from notable leaders as well as actionable strategies for the reader. *The Leadership Killer: Reclaiming Humility in an Age of Arrogance* exposes the single most lethal leadership flaw. Being a good leader doesn't require being a bad person, and if you know what to look out for, Treasurer and Havlik point out, you can keep your ego and hubris in check and become a leader worth remembering.

### **Dancing with the Gods**

*Be Fearless* is researched-based call to action for those seeking to live extraordinary lives and bring about transformational change. LOS ANGELES TIMES BESTSELLER \* NATIONAL BESTSELLER Weaving together storytelling, practical tips and inspiration, the book will teach you how to put the five fearless principles to work so that you too can spark the sorts of remarkable breakthroughs that can impact the world. Philanthropist, investor, and technology pioneer Jean Case brings to life the five *Be Fearless* principles common to the people and organizations that bring about transformational change. When National Geographic Chairman Jean Case set out to investigate the core qualities of great change makers, past and present, from inventors to revolutionaries, she found five surprising traits they all had in common. These weren't wealth, privilege, or even genius. What all of these exceptional men and women shared was that they had chosen to make a "big bet," take bold risks, learn from their failures, reach beyond their bubbles, and let urgency conquer fear. Throughout *Be Fearless*, Jean vividly illustrates these principles through storytelling—from her own transformational life experiences, to Jane Goodall's remarkable breakthroughs in understanding and protecting chimpanzees, to celebrity chef José Andrés' decision to be a "first responder" and take his kitchen to the sites of devastating hurricanes to feed the hungry, to Madame C.J. Walker's vision to build a hair care empire that would employ thousands across the country, and more. She shares new insights to stories you might think you know—like Airbnb's tale of starting from scratch to transform the hospitality industry, to John F. Kennedy's history-making moonshot—and gems from changemakers you've never heard of. *Be Fearless* features a compelling foreword from Jane Goodall saying "there is no time in history when it has been more important to *Be Fearless*" and a new afterword with stories of people inspired to take action after reading the book.

### **Elevate**

An award-winning conflict consultant offers a new path to take when agreement and collaboration seem impossible, and teaches us that when conflict

resolution fails, we can achieve freedom instead—even without others' cooperation. A founding CEO and his top salesperson are engaged in a heated clash over her compensation package. A mother and daughter are locked in a nasty cycle of blame and attack. A high-profile executive team is struggling with aggressive political infighting. In all these cases, every effort to talk it out has been unsuccessful. Where can you turn when your attempts to resolve conflict fail? Most approaches emphasize collaboration. You are supposed to sit down, calmly talk through your differences, and find a solution. But what if nothing seems to work, no matter what you do? When situations resist resolution, the Optimal Outcomes Method teaches us conflict freedom. This innovative method, based on Dr. Jennifer Goldman-Wetzler's training at the Program on Negotiation at Harvard Law School, two decades as a consultant to Fortune 500 and high-growth CEOs and senior teams, grassroots work with Middle East leaders, US government-funded research on terrorism, and her popular course at Columbia University, Optimal Outcomes reveals eight groundbreaking practices proven to help people everywhere free themselves from conflict. With inspiring stories from clients, students, and Dr. Goldman-Wetzler's own life lighting the way, you'll learn to observe complex situations with clarity, access your shadow values (things you really care about but have been unwilling to admit), and take bold, simple, surprising action. Optimal Outcomes blends mindfulness, Jungian psychology, and practical, step-by-step advice to free anyone from seemingly impossible conflict. Applying the practices, you'll reach your Optimal Outcome—which may be vastly different from what you originally imagined, but more satisfying than you ever dreamed possible.

### **The Art of Quiet Influence**

You'll never see leadership the same way again after reading this book. These fifteen commitments are a distillation of decades of work with CEOs and other leaders. They are radical or provocative for many. They have been game changers for us and for our clients. We trust that they will be for you too. Our experience is that unconscious leadership is not sustainable. It won't work for you, your team or your organization in the long term. Unconscious leadership can deliver short term results, but the costs of living and leading unconsciously are great. Fear drives most leaders to make choices that are at odds with healthy relationships, vitality and balance. This fear leaves a toxic residue that won't be as easily tolerated in an increasingly complex business environment. Conscious leadership offers the antidote to fear. These pages contain a comprehensive road map to guide you to shift from fear-based to trust-based leadership. Once you learn and start practicing conscious leadership you'll get results in the form of more energy, clarity, focus and healthier relationships. You'll do more and more of what you are passionate about, and less of what you do out of obligation. You'll have more fun, be happier, experience less drama and be more on purpose. Your team will get results as well. They'll be more collaborative, creative, energized and engaged. They'll solve issues faster, and once resolved the issues won't resurface. Drama and gossip will all but disappear, and the energy and resources that fueled them will be redirected towards innovation and creativity. Any one of these commitments will change your life. All of them together are revolutionary. Leaders who practice the 15 commitments: - End blame and criticism - Speak candidly, openly and honestly, in a way that invites others to do the same - Find their unique genius - Let go of taking everything-especially themselves and their problems-so seriously - Create win for all solutions - Experience a new relationship to time and money where there is always enough What do you need to bring to the table? Be curious. Sounds so simple, and yet in our experience it's a skill few have mastered. Most of us are far more interested in being right and proving it, than we are in learning, growing and shifting out of our old patterns. By default we gravitate towards the familiar. We're asking you to take a chance and explore the unfamiliar. You'll get scared and reactive. We all do. So what? Just stay curious and let us introduce you to a whole new world of leadership.

### **Reboot**

There is a competitive advantage out there, arguably more powerful than any other. Is it superior strategy? Faster innovation? Smarter employees? No, New York Times best-selling author, Patrick Lencioni, argues that the seminal difference between successful companies and mediocre ones has little to do with

what they know and how smart they are and more to do with how healthy they are. In this book, Lencioni brings together his vast experience and many of the themes cultivated in his other best-selling books and delivers a first: a cohesive and comprehensive exploration of the unique advantage organizational health provides. Simply put, an organization is healthy when it is whole, consistent and complete, when its management, operations and culture are unified. Healthy organizations outperform their counterparts, are free of politics and confusion and provide an environment where star performers never want to leave. Lencioni's first non-fiction book provides leaders with a groundbreaking, approachable model for achieving organizational health—complete with stories, tips and anecdotes from his experiences consulting to some of the nation's leading organizations. In this age of informational ubiquity and nano-second change, it is no longer enough to build a competitive advantage based on intelligence alone. The Advantage provides a foundational construct for conducting business in a new way—one that maximizes human potential and aligns the organization around a common set of principles.

### **Ctrl Alt Delete**

A vision for building a society that looks beyond money and toward maximizing the values that make life worth living, from the cofounder of Kickstarter. Western society is trapped by three assumptions: 1) That the point of life is to maximize your self-interest and wealth, 2) That we're individuals trapped in an adversarial world, and 3) That this is natural and inevitable. These ideas separate us, keep us powerless, and limit our imagination for the future. It's time we replace them with something new. This Could Be Our Future is about how we got here, and how we change course. While the pursuit of wealth has produced innovation and prosperity, it also established an implicit belief that the right choice in every decision is whichever option makes the most money. The answer isn't to get rid of money; it's to expand our concept of value. By assigning rational value to other values besides money--things like community, purpose, and sustainability--we can refocus our energies to build a society that's generous, fair, and ready for the future. By recalibrating our definition of value, a world of scarcity can become a world of abundance. Hopeful but firmly grounded, full of concrete solutions and bursting with creativity, This Could Be Our Future brilliantly dissects the world we live in and shows us a road map to the world we are capable of making.

### **Summary of Reboot**

What we make, makes us. This is the central tenet of Artful Design, a photorealistic comic book that examines the nature, purpose, and meaning of design. A call to action and a meditation on art, authenticity, and social connection in a world disrupted by technological change, this book articulates a fundamental principle for design: that we should design not just from practical needs but from the values that underlie those needs. Artful Design takes readers on a journey through the aesthetic dimensions of technology. Using music as a universal phenomenon that has evolved alongside technology, this book breaks down concrete case studies in computer-mediated toys, tools, games, and instruments, including the best-selling app Ocarina. Every chapter elaborates a set of general design principles and strategies that illuminate the essential relationship between aesthetics and engineering, art and design. Ge Wang implores us to both embrace and confront technology, not purely as a means to an end, but in its potential to enrich life. Technology is never a neutral agent, but through what we do with it--through what we design with it--it provides a mirror to our human endeavors and values. Artful Design delivers an aesthetic manifesto of technology, accessible yet uncompromising.

### **The Empathy Factor**

The age-old question for every leader—how do we bring out the best in those we lead? Anyone who has run a company, raised a family, lead an army, or coached a team struggles to find the key to help others excel and realize their potential. It is surprising how often we resort to criticism vs. an approach that actually results in a better worker and a better person. What if we could speak Words of Life that transform those under our influence and ignite fires of intrinsic motivation? What if those we lead found great purpose in what they do and worked at their jobs with all their heart? Isn't that what leaders, parents and teachers really want? Ultimately, don't we hope to foster intrinsic motivation so that the individuals we lead become better employees, better students or better athletes? Recent discoveries of brain science and the wisdom of top CEO's that Dr. Tim Irwin interviewed for this book give us the answers we've long sought. In most organizations, the methods used to provide feedback to employees such as performance appraisal or multi-rater feedback systems, in fact, accomplish the exact opposite of what we intend. We inadvertently speak Words of Death. Brain science tells us that these methods tend to engage a natural "negativity bias" that is hardwired in us all. Science in recent years discovered that affirmation sets in motion huge positive changes in the brain. It releases certain neuro chemicals associated with well-being and higher performance. Amazingly, criticism creates just the opposite neural reaction. The most primitive part of the brain goes into hyper defense mode, compromising our performance, torpedoing our motivation and limiting access to our higher-order strengths. How do we redirect employees who are out-of-line without engaging our natural "negativity bias?" Leaders must forever ban the term, "Constructive Criticism." Brain science tells us that we can establish a connection between the employee's work and his or her aspirations. This book calls for a new approach to align workers with an organization's mission, strategy and goals, called Alliance Feedback.

Lead-er-shift [verb]: The act of nimbly adapting one's leadership in the midst of rapid change. The term leadershift may be new to you, but the climate of change that demands it is not. As a leader, you already know that it takes more than staying the course to be successful. The key to not just surviving but to continual innovation, improvement, and influence is to learn how to leadershift. In the Leadershift Workbook, based on the bestselling book of the same name, author John C. Maxwell helps leaders make the changes the current fast-paced environment demands. He begins by helping leaders embrace seven principles to face every situation with flexibility and confidence: Continually learn, unlearn, and relearn Value yesterday, but live in today Rely on speed, but thrive on timing See the big picture as the picture keeps getting bigger Live in today, but think about tomorrow Move forward courageously in the midst of uncertainty Realize today's best will not meet tomorrow's challenges In each of the lessons in this workbook, John shares the critical shifts he has personally made over the course of his long and successful leadership career, including the Adaptive Shift from Plan A to Option A, the Production Shift from Ladder Climbing to Ladder Building, and the Influence Shift from Positional Authority to Moral Authority. These leadershifts will change the way you think, act, and ultimately lead so you can be proactive and successful in an ever-changing world. Designed for use with the Leadershift book (9780718098506).

### **This Could Be Our Future**

Three-time Navy SEAL platoon commander and founder of Perfect Fitness reveals how to put together teams that can accomplish any objective—by leveraging an unexpected set of values and priorities. SEALs and civilians operate in extremely different environments, but what makes both kinds of teams excel comes down to the same thing: service to others, trust, empathy, and a caring environment. Alden Mills has experience working in both the military and the private sector, as a SEAL platoon commander and as a startup founder of Perfect Fitness. He's seen firsthand what it takes to lead an unstoppable team of individuals. Teams are nothing more than a series of interconnected relationships with a collective, single-minded focus. Success almost never depends on individual talent and valor; instead, Alden Mills shows, it depends, first, on creating a strong foundation for yourself and, second, using that foundation to help others go beyond their individual pursuits and talents to create something bigger and better—an unstoppable team. Unstoppable Teams show managers at every level, at both large and small organizations, including private, public, and nonprofit, how to inspire, motivate, and lead the people around them. Mills draws on stories from his own experiences to impart these surprising team-building lessons: Too many people mistake groups of individuals for a team. No two people are alike, but we all have the same genetic drivers that motivate us—our will to survive, our ego-driven desire for personal gain, and our soul-driven yearning to be a part of something greater than ourselves. When we override our fears about survival, we can focus on our desire to thrive. The more you care for your teammates, the more they will dare for the team. Great ideas are not reserved for a select few—true teams embrace diversity of thought to find winning ideas. These lessons aren't exclusive to the Navy SEALs; they are used by successful entrepreneurs, nonprofit leaders, coaches, and sport captains—and now you can master them too. Unstoppable Teams is the handbook for how to build care-based teams that will push people to achieve more than they ever thought possible.

Jay Shetty, social media superstar and host of the #1 podcast *On Purpose*, distills the timeless wisdom he learned as a monk into practical steps anyone can take every day to live a less anxious, more meaningful life. When you think like a monk, you'll understand: -How to overcome negativity -How to stop overthinking -Why comparison kills love -How to use your fear -Why you can't find happiness by looking for it -How to learn from everyone you meet -Why you are not your thoughts -How to find your purpose -Why kindness is crucial to success -And much more Shetty grew up in a family where you could become one of three things—a doctor, a lawyer, or a failure. His family was convinced he had chosen option three: instead of attending his college graduation ceremony, he headed to India to become a monk, to meditate every day for four to eight hours, and devote his life to helping others. After three years, one of his teachers told him that he would have more impact on the world if he left the monk's path to share his experience and wisdom with others. Heavily in debt, and with no recognizable skills on his resume, he moved back home in north London with his parents. Shetty reconnected with old school friends—many working for some of the world's largest corporations—who were experiencing tremendous stress, pressure, and unhappiness, and they invited Shetty to coach them on well-being, purpose, and mindfulness. Since then, Shetty has become one of the world's most popular influencers. In 2017, he was named in the *Forbes* magazine 30-under-30 for being a game-changer in the world of media. In 2018, he had the #1 video on Facebook with over 360 million views. His social media following totals over 38 million, he has produced over 400 viral videos which have amassed more than 8 billion views, and his podcast, *On Purpose*, is consistently ranked the world's #1 Health and Wellness podcast. In this inspiring, empowering book, Shetty draws on his time as a monk to show us how we can clear the roadblocks to our potential and power. Combining ancient wisdom and his own rich experiences in the ashram, *Think Like a Monk* reveals how to overcome negative thoughts and habits, and access the calm and purpose that lie within all of us. He transforms abstract lessons into advice and exercises we can all apply to reduce stress, improve relationships, and give the gifts we find in ourselves to the world. Shetty proves that everyone can—and should—think like a monk.

Advisor of Leadership at Google and former vice president of leadership at LinkedIn claims that the biggest driver of motivation is the chance to serve a larger purpose beyond our careers and ourselves, rather than salary, benefits, bonuses, or other material incentives; companies that are able to successfully focus their people, their teams, and their culture around meaning outperform their competition. Fred Kofman's approach to leadership has little to do with the standard practices taught in business school and traditional books. Bringing together economics and business theory, communications and conflict resolution, family counseling and mindfulness mediation, Kofman argues in *The Meaning Revolution* that our most deep-seated, unspoken, and universal anxiety stems from our fear that our life is being wasted--that the end of life will overtake us when our song is still unsung. Material incentives--salary and benefits--account for perhaps 15 percent of employees' motivation at work. The other 85 percent is driven by a need to belong, a feeling that what we do day in and day out makes a difference, that how we spend our time on earth serves a larger purpose beyond just ourselves. Kofman claims that transcendental leaders, wherever they are in the hierarchy, are able to put aside their self-interests and help others to feel connected with others on a team or in an organization on a great mission and part of an ennobling purpose. He argues that every organization involved in work that is nonviolent and non-addictive has what he calls an "immortality project" at its core. And the challenge for leaders is to identify and expand on that core, to inspire all

stakeholders to take part.
