California Desert Byways

This book presents the natural, environmental and scenic richness of the world's coastal and marine areas classified by UNESCO as "Natural World Heritage Sites". Representing well-preserved areas of exceptional significance to the planet and to humankind, they include a total of 49 marine sites, formed by reefs, atolls and gulfs, and 35 coastal sites in all oceans and all continents with exception of Antarctica. They are being protected and preserved from most degrading uses for future generations as an important legacy from the past. Exploring their richness, this book analyzes and explains these sites in a clear, understandable, scientific way, and is of interest to all who work in or care about the geosciences, environmental sciences and biosciences.

Northern California. And while he's still in love with many of the old trails, some of them have become unsafe or less accessible. The good news is that this gave him the chance to fall for some new trails, which are happily now included in this new edition. The old-growth forests and multiple mountain ranges of Northern California beckon the 10 million urban inhabitants of the Bay Area—who need outdoor experiences BADLY! This new edition not only gets them to the best of nature not far from their door, but looks tremendous on an urban coffee table, too. New hikes in this edition include: 2 in the Bay Area, including the Coastal Trail in San Francisco 5 in the Redwoods and along the coast north of the Bay Area 4 in the Sierra Nevada, including two summits: Ellis Peak and Sierra Buttes 2 in the Russian Wilderness in the Klamath Mountains

Chapter 6: Where to Stay Conclusion Author Bio Publisher The Redwoods Northern California's Redwoods is known for its sky-rising forests which are entirely unique to California. These forests draw visitors from all over the world to witness the towering giants in the vast wilderness. These mesmerizing landscapes and old forests which display truly exceptional characteristics are composed of both sequoias and redwoods which fascinatingly soar up to the skies. These trees have been used and referred to interchangeably by many. However, these two are largely different and make up the notable tree species. Distinct to the northern lands in California, these tree types share that unique brownish red bark as well as the tendency to grow to greater heights. More so, these trees vary in climate requirements in order to thrive. The giant or coastal redwoods (*sequoia sempervirens*) are distinct from its relative tree which is the giant sequoia (*sequoiadendron giganteum*) basically because of its environmental requirements. As the name suggests, the giant coastal redwoods survive in moist or humid climates because it is where the marine fog delivers the necessary climate to enable its growth. The fog is the source of moisture to the soil which also helps trap it, thus lowering evaporation rates. The giant or coastal redwoods usually outgrow their relatives and may stand up to 378 feet in height. On the other hand, the giant sequoias survive in the higher elevation locations compared to the giant redwoods. They grow naturally along the slopes of the Sierra Nevada's, most of which stands at 5,000 – 7,000 feet elevation. The giant sequoias also need periodic heat so that their cones open and produce seeds. These trees still grow to imposing heights of 311 feet but are relatively shorter than their coastal counterparts. But

Read Book Online Redwood National And State Parks National Geographic Trails Illustrated Map 218

although the giant sequoias lack in height, they still make up for their wider size which considerably outweighs the giant redwoods. Because of its sheer volume, it is the giant sequoias that hold title to being the largest tree in the world. The General Sherman, which is known for being the most gigantic of all sequoias, weighs in at an astounding 2.7 million pounds and stands supreme at around 275 feet from the base which was also measured at 100 feet wide. The General Sherman is not only known as the largest tree but it has also been named as the largest living organism of the earth. The people know about the Redwoods as the home to the tallest trees in the world. But apart from housing the giant trees, Redwood parks, and forests still cover and protect large prairies, gushing river ways, oak woodlands and a long 40-mile stretch of primeval coastline, making up an abundantly rich wildlife environment characterized by great diversity. These natural beauties serve not only as a source of enjoyment, but also of inspiration and education to the people.

The Once and Future Forest: California's Iconic Redwoods

Now in a fully updated edition, this invaluable reference work is a fundamental resource for scholars, students, conservationists, and citizens interested in America's national park system. The extensive collection of documents illustrates the system's creation, development, and management. The documents include laws that established and shaped the system; policy statements on park management; Park Service self-evaluations; and outside studies by a range of scientists, conservation organizations, private groups, and businesses. A new appendix includes summaries of pivotal court cases that have further interpreted the Park

Service mission.

Coast Redwood

Presents 65 desert trips from Bishop to the Mexican border, including expanded coverage of popular destinations such as Death Valley National Park, Mojave National Preserve, and Anza-Borrego Desert State Park. This book makes high-walled canyons, lonely ghost towns, and soaring peaks from Mexico to the Great Basin easily accessible to recreational drivers. Tony Huegel's glove-box-sized Byways have been leading drivers to the hidden surprises found along unpaved backroads for more than 10 years. These books are for recreational drivers who want to use their four-wheel-drive or sport-utility vehicle beyond the pavement to explore, but who might not want to do hard-core or lengthy off-road driving. They are also for adventurers who use these trips as jumping-off points for muscle-powered exploration, such as hiking and mountain biking.

Lassoing the Sun

The Roosevelt elk populate the parks along California's north coast and comprise the largest land mammals in the parks, some weighing up to 1,200 pounds. They are a stable terrestrial land mammal population, a fixture in the parks, but still require ongoing stewardship and management. In a study spanning more than twenty years, Weckerly made key observations

Read Book Online Redwood National And State Parks National Geographic Trails Illustrated Map 218

and conducted various investigations under a multitude of ecological conditions. Few authors have dedicated this much time and effort into a single research area. It is a testament to perseverance that his groundbreaking study of the Roosevelt elk was so successful. He was able to document the independent dynamics of several herds of female elk, experience the extinction of one of their subpopulations, and record scientific conclusions in the context of resiliency and redundancy of the elk population. This book will be of considerable interest to those who investigate the ecology of big game animals, including naturalists, hunters, and individuals with particular interest in Redwood State and National Parks. It is an important book that contributes substantially to the persistence and viability of Roosevelt elk in the parks and the surrounding area.

The Redwood Coast

Redwood National and State Parks are home to some of the world's tallest trees: old-growth coast redwoods, living to be 2000 years old and growing to over 300 feet tall. Author and hiker Dan Brett includes trail descriptions and maps of nearly 22 easy day hikes within these spectacular parks. This indispensable guide provides accurate hike descriptions, easy-to-follow maps, and concise trail information for the author's favorite trails.

Redwood

At last there is a definitive guidebook for the magnificent and beautifully mysterious hikers' paradise known as the Redwood Coast of Northern California. In this new title in the Top Trails series, veteran outdoors author Mike White leads day-trippers and backpackers into some of the most awe-inspiring terrain on earth. Step-by-step in his trail-worn boots, the author created a menu of 57 diverse routes, from a gentle half-mile morning loop to a 29-mile backpacking adventure. Winding through Mendocino, Humboldt, and Del Norte counties, he guides readers into this landscape of lush, old-growth redwoods; picture-postcard vistas to Pacific Ocean sea stacks; winding descents to undisturbed beaches and mesmerizing tide-pool life; pathways to inland canyons; and untamed wilderness shy on humans but boisterous with herds of Roosevelt elk. For readers ready to hit the trail, this is the can't-do-without guide. For armchair travelers, it's 57 journeys into wonderland.

The Wild Trees

Visiting the redwoods in nineteenth-century California meant coming to Big Trees Grove, now part of Henry Cowell Redwoods State Park. This forest of giants in the Santa Cruz Mountains attained fame through the 1846 exploits of explorer John Charles Fr é mont, whose namesake tree still stands. Saved from the logger's axe by Joseph Warren Welch in 1867, these were the first coastal redwoods preserved for public recreation. As a world-renowned resort for sixty years, Big Trees Grove hosted thousands of visitors--from picnickers to presidents, including Theodore Roosevelt. Join author Deborah Osterberg as she recounts the stories of those first visitors and the awe-inspiring landscape they preserved for future generations.

Redwoods

The Eel River in Northern California is the third largest river in the state. Along its banks stand the largest remaining redwood groves in the world. They are preserved within Humboldt Redwoods State Park. Created in 1921 with the purchase of Bolling Grove near Myers Flat by the Save the Redwoods League, the park currently preserves 53,000 acres of forestland. Within the park are structures built by the Civilian Conservation Corps in the 1930s and a monolithic four-fireplace structure designed by Julia Morgan. The park also encompasses many small towns. The settlement of these towns is included in this pictorial history of Humboldt Redwoods State Park. Additionally, steps taken to preserve the redwoods are documented. Finally, floods along the river that have shaped the environment and influenced the growth of the park are also featured.

Walks of a Lifetime in America

Takes a close-up look at the world's tallest trees, the coast redwoods that grow only in the coastal regions of California, and at the previously unknown ecosystem that the trees form high in the air in the forest canopy.

Top Trails: Northern California's Redwood Coast

This book gives a brief history and description of Redwood National and State Parks, located on the Pacific coast of northern California.

Best Short Hikes in Redwood National and State Parks

"In this remarkable journey, Mark Woods captures the essence of our National Parks: their serenity and majesty, complexity and vitality--and their power to heal." --Ken Burns Many childhood summers, Mark Woods piled into a station wagon with his parents and two sisters

Read Book Online Redwood National And State Parks National Geographic Trails Illustrated Map 218

and headed to America's national parks. Mark's most vivid childhood memories are set against a backdrop of mountains, woods, and fireflies in places like Redwood, Yosemite, and Grand Canyon national parks. On the eve of turning fifty and a little burned-out, Mark decided to reconnect with the great outdoors. He'd spend a year visiting the national parks. He planned to take his mother to a park she'd not yet visited and to re-create his childhood trips with his wife and their iPad-generation daughter. But then the unthinkable happened: his mother was diagnosed with cancer, given just months to live. Mark had initially intended to write a book about the future of the national parks, but *Lassoing the Sun* grew into something more: a book about family, the parks, the legacies we inherit and the ones we leave behind.

Best Easy Day Hikes Redwood National and State Parks

* More than 60 short hikes in the Redwoods -- from half-hour to half-day -- with camping and park facilities information * Handy quick-guide for selecting hikes by difficulty, mileage and features (flowers, water, views, etc.) * Little-known Redwood Park gems as well as world-famous Founders Grove and Fern Canyon trails A stand of towering old-growth redwoods, where sounds are dampened to near silence, where only the dimmest rays of light penetrate are you looking for redwood hikes with beaches? Redwood hikes known for wildflowers? You'll find those, too, in this guide devoted to the best hikes in Redwood National Park and the state parks-Prairie Creek, Del Norte Coast, Jedediah Smith and Humboldt Redwoods State Parks. Most trailheads are adjacent to paved roads, accessible within five miles of Pacific Coast Highway 101. This guidebook includes many short hikes off Avenue of the Giants and Newton

B. Drury Scenic Parkway. It will take you to the Boy Scout Tree and to the Tallest Tree, a 367.8-foot skyscraper. But it also includes trails for solitude even at the height of the tourist season. Background information on redwood biology rounds out your experience.

Historic Redwood National and State Parks

Redwood National Park

"This is not a simple or ordinary history of a conservation crusade. Schrepfer very ably traces the changes in scientific wisdom from nineteenth-century romanticism and teleological evolutionism to more current ecological dynamism—and the influence of those intellectual developments on political history. . . . The subject is important—much broader than the title suggests—and so is the book."—American Historical Review

Redwood National and State Parks, General Management Plan

It's common knowledge that coast redwoods are tall, tall trees. In fact, they are the tallest trees in the world. What most people don't know is that there is a whole other forest growing high in the canopy of a redwood forest. This adaptation of *The House That Jack Built* climbs into this secret, hidden habitat full of all kinds of plants and animals that call this forest home.

photographs, written stories, and videos shared by the national and international media, their project resulted in an incredible view of America's National Park System seen in its 100th year. 'A Year in the National Parks, The Greatest American Road Trip' is a gorgeous visual journey through our cherished public lands, detailing a rich tapestry of what makes each park special, as seen along an epic journey to visit them all within one special celebratory year.

REDWOOD, NATIONAL AND STATE PARKS, HUMBOLDT AND DEL NORTE COUNTIES, CALIFORNIA VOLUME 2: COMMENTS AND RESPONSES FINAL GENERAL MANAGEMENT.

Provides an introduction to the parks and the movement to preserve redwoods, the world's tallest trees. Explores redwood natural history, the work of restoring loggeland, and North Coast Indian culture. Includes a travel guide and reference materials for touring the parks.

Exam Prep for: Historic Redwood National and State Parks

Jason Chin's Redwoods tells the story of a boy who discovers a book about redwoods and finds himself in their midst as he turns the pages. An ordinary train ride becomes an extraordinary trip to the great ancient forests. A subway trip is transformed when a young boy happens upon a book about redwood forests. As he reads the information unfolds, and with

Read Book Online Redwood National And State Parks National Geographic Trails Illustrated Map 218

each new bit of knowledge, he travels--all the way to California to climb into the Redwood canopy. Crammed with interesting and accurate information about these great natural wonders, Jason Chin's first book is innovative nonfiction set within a strong and beautiful picture storybook. Chin's approach makes Redwoods a must-have common core tool for teachers and librarians introducing scientific principals to young students.

The Forest in the Trees

On December 18, 1999, Julia Butterfly Hill's feet touched the ground for the first time in over two years, as she descended from "Luna," a thousand-year-old redwood in Humboldt County, California. Hill had climbed 180 feet up into the tree high on a mountain on December 10, 1997, for what she thought would be a two- to three-week-long "tree-sit." The action was intended to stop Pacific Lumber, a division of the Maxxam Corporation, from the environmentally destructive process of clear-cutting the ancient redwood and the trees around it. The area immediately next to Luna had already been stripped and, because, as many believed, nothing was left to hold the soil to the mountain, a huge part of the hill had slid into the town of Stafford, wiping out many homes. Over the course of what turned into an historic civil action, Hill endured El Nino storms, helicopter harassment, a ten-day siege by company security guards, and the tremendous sorrow brought about by an old-growth forest's destruction. This story--written while she lived on a tiny platform eighteen stories off the ground--is one that only she can tell. Twenty-five-year-old Julia Butterfly Hill never planned to become what some have called her--the Rosa Parks of the environmental movement.

Read Book Online Redwood National And State Parks National Geographic Trails Illustrated Map 218

Shenever expected to be honored as one of Good Housekeeping's "Most Admired Women of 1998" and George magazine's "20 Most Interesting Women in Politics," to be featured in People magazine's "25 Most Intriguing People of the Year" issue, or to receive hundreds of letters weekly from young people around the world. Indeed, when she first climbed into Luna, she had no way of knowing the harrowing weather conditions and the attacks on her and her cause. She had no idea of the loneliness she would face or that her feet wouldn't touch ground for more than two years. She couldn't predict the pain of being an eyewitness to the attempted destruction of one of the last ancient redwood forests in the world, nor could she anticipate the immeasurable strength she would gain or the life lessons she would learn from Luna. Although her brave vigil and indomitable spirit have made her a heroine in the eyes of many, Julia's story is a simple, heartening tale of love, conviction, and the profound courage she has summoned to fight for our earth's legacy.
