Eight timeless tales from the master of speculative fiction, featuring the Nebula and Hugo Award-winning story “Repent, Harlequin!” Said the Ticktockman.” Robert Heinlein says, “This book is raw corn liquor—you should serve a whiskbroom with each shot so the customer can brush the sawdust off after he gets up from the floor.” Perhaps a mooring cable might also be added as necessary equipment for reading these eight wonderful stories. They not only knock you down . . . they raise you to the stars. Passion is the keynote as you encounter the Harlequin and his nemesis, the dreaded Tictockman, in one of the most reprinted and widely taught stories in the English language; a pyretic who creates fire merely by willing it; the last surgeon in a world of robot physicians; a spaceship filled with hideous mutants rejected by the world that gave them birth. Touching, gentle, and shocking stories from an incomparable master of impossible dreams and troubling truths.

A remarkably trenchant collection of early stories by “the dark prince of American letters” exploring the injustice and desperation of a forgotten America (Pete Hamill, author of *A Drinking Life*). Bold and uncompromising, *Gentleman Junkie and Other Stories of the Hung-up Generation* is a watershed moment in Harlan Ellison’s early writing career. Rather than dealing in speculative fiction, these twenty-five short stories directly tackle issues of discrimination, injustice, bigotry, and oppression by the police. Pulling from his own experience, Ellison paints vivid portraits of the helpless and downtrodden, blazing forth with the kind of unblinking honesty that would define his career. Reviewing this collection, Dorothy Parker called Ellison “a good, honest, clean writer, putting down what he has seen and known, and no sensationalism about it.”

St. Elizabeths has been a mental health hospital in Washington, D.C., since 1852, when it was established by the United States Congress as the Government Hospital for the Insane. St. Elizabeths, along with other hospitals, experienced rapid expansion in its first century, hitting a peak of almost eight thousand patients by the 1960s. Deinstitutionalization in the second half of the twentieth century emptied out the historic buildings on campus. This well-illustrated book follows an exhibition at the National Building Museum, tracing the hospital's evolution over time, highlighting the ways that this specialized architecture and landscape served the mentally ill. It continues the story of St. Elizabeths, a National Historic Landmark, through its current redevelopment as a federal campus and mixed-use neighborhood.

### **Parish and Belonging**

### **Juniper Time**

In February of 1973, Nancy Weber put an ad in the Village Voice offering to trade places with another woman, a stranger, for a month. In hopes of better understanding what was fixed and final in each person—and what was invented, and therefore might be reinvented—they would use each other's names, live in each other's homes, love each other's loves, and do each other's work. After interviewing many of the fascinating women who answered the ad, Weber—single (with a longtime lover) and straight—chose a polyamorous, bisexual, married psychologist and academic, the pseudonymous Micki Wrangler. They spent five months getting ready for their adventure—cajoling their nearest and dearest into participating, exchanging thousands of details, and swapping deep secrets. But, instead of a month, their wild ride lasted only a week. Wrangler was having a rough time (and Weber too good a time, maybe) so they decided to call things off. Wanting *The Life Swap* to convey more than her own experience, Weber invited Wrangler and ten others to enrich the book with their uncensored reports. Publicity for the book included stints on *The Tonight Show* with Johnny Carson and To

Tell the Truth. The book achieved a kind of cult status, in part because it's a relic of 1970s sexual openness (cruelly destroyed by HIV/AIDS) and belief in the right of self-invention. Recent critics have credited the book with inspiring life swap reality TV shows and several popular novels and films.

One of the most widely used ethnographies published in the last twenty years, this Margaret Mead Award winner has been used as required reading at more than 600 colleges and universities. This personal account by a biocultural anthropologist illuminates not-soon-forgotten messages involving the sobering aspects of fieldwork among malnourished children in West Africa. With nutritional anthropology at its core, *Dancing Skeletons* presents informal, engaging, and oftentimes dramatic stories that relate the author's experiences conducting research on infant feeding and health in Mali. Through fascinating vignettes and honest, vivid descriptions, Dettwyler explores such diverse topics as ethnocentrism, culture shock, population control, breastfeeding, child care, the meaning of disability and child death in different cultures, female circumcision, women's roles in patrilineal societies, the dangers of fieldwork, and facing emotionally draining realities. Readers will laugh and cry as they meet the author's friends and informants, follow her through a series of encounters with both peri-urban and rural Bambara culture, and struggle with her as she attempts to reconcile her very different

roles as objective ethnographer, subjective friend, and mother in the field. The 20th Anniversary Edition includes a 13-page “Q&A with the Author” in which Dettwyler responds to typical questions she has received individually from students who have been assigned *Dancing Skeletons* as well as audience questions at lectures on various campuses. The new 23-page “Update on Mali, 2013” chapter is a factual update about economic and health conditions in Mali as well as a brief summary of the recent political unrest.

other projects. All the standard topics are covered, but with less emphasis on method and theory and more coverage of a variety of industrial and postindustrial societies. Auxiliary materials bells and whistles have been kept to a minimum to reduce distractions and maintain a reasonable price to students. The author has chosen all the photographs with great care to illustrate or amplify important points. The Instructors Manual includes summaries of each chapter, student exercises, and a test bank. Dettwylers upbeat tone inspires students to: develop the ability to think logically, objectively, and critically about different cultural beliefs, practices, and social structures; understand that humans are primates with culture, with a complex overlay of environmental and cultural influences; appreciate how powerful cultural beliefs and practices can be in shaping human perceptions of the world; realize that culture is not the same thing as social constructions of race, ethnic identity, or place of geographic origin; understand why/how cultural practices make sense within the cultures that practice them; articulate how an anthropological perspective helps discern everyday situations and interactions at the local, national, and international levels; understand that anthropology is not just an academic discipline it is a way of looking at and understanding the world; appreciate the ways cultural beliefs and practices, social structures, and human lifestyles contribute to a meaningful life.

### **Rural Englands**

## **An Occupational Perspective of Health**

Rural Englands is the first general history of nineteenth-century English rural workers. Barry Reay provides a fresh perspective on England's rural past, reintroducing those often excluded from more traditional historical approaches, and stressing the diversity of working communities and the dynamism of rural life. Reay challenges stereotypes of country living, arguing that the extent of localization is so compelling that, instead of thinking of a unitary notion of 'rural England', we must think in terms of 'rural Englands'. Incorporating a wide range of source material, Reay examines and explores both representations and experiences of rural labour, including: - varieties of settlement and landscape - types of work carried out by men, women and children - household survival strategies - experiences of life and death - leisure patterns - repertoires of protest - visual imagery - literary representations.

### **The Intentional Relationship**

Set in a reality where nightmares do not fade upon waking, this anthology skims along the surface of life and dips just beneath, revealing the hidden machinations that fuel dreams. These underlying myths and fantasies exist not as musty old stories but as ancient truths that have come to illuminate the modern human condition. The title story touches on themes of grief, redemption, and time travel; "Cold Fire" ventures into love and obsession; and "Peace on Suburbia" introduces readers to a Christmas with an entirely different kind of savior. These and 13 other tales are framed by four interludes—Dreams, Nightmares, Waking, and Rising—that guide readers through a world that is at once familiar and eerily off-kilter.

## **The Life Swap**

This groundbreaking book addresses a critical aspect of the occupational therapy practice—the art and science of building effective therapeutic relationships with clients. A distinguished clinician, scientist, and educator, Renée Taylor, PhD, has defined a conceptual practice model, the Intentional Relationship Model, to identify how the client and the therapist each contribute to the unique interpersonal dynamic that becomes the therapeutic relationship. She emphasizes how therapists must act deliberately, thoughtfully, and with vigilant anticipation of the challenges and breakthroughs that have the potential to influence the course of the relationship.

## **Great Thinkers and Workers**

This compelling book includes 186 case studies of patients who were admitted to the Delaware State Hospital at Farnhurst between 1894 and 1920. Until now, their stories have remained hidden away, lost, forgotten, inaccessible. This book changes that by providing a detailed look at the lives of a wide variety of patients. Farnhurst is usually thought of as having been simply a "mental hospital" or "lunatic asylum." In reality, the institution cared for people with many

different conditions ranging from "congenital imbeciles," to traumatic and acquired brain injuries, syphilis, epilepsy, delusions, schizophrenia, depression, bipolar disorder, Huntington's disease, acute intermittent porphyria, deafness, blindness, age-related senility, pregnancy-related conditions, substance abuse disorders, etc. - at a time when there were few or no other options for care and treatment. An important resource for reducing the stigma associated with being diagnosed with a mental illness or spending time in a mental institution, this book shows that every patient came from somewhere and had meaningful lives before, during, and after their time at the Delaware State Hospital. They were real individuals, each with their own story. Come meet them.

stresses how important parochial belonging once was. Professor Snell discusses themes such as settlement law and practice, marriage patterns, cultures of local xenophobia, the continuance of out-door relief in people's own parishes under the new poor law, the many new parishes of the period and their effects upon people's local attachments. The book highlights the continuing vitality of the parish as a unit in people's lives, and the administration associated with it. It employs a variety of historical methods, and makes important contributions to the history of welfare, community identity and belonging. It is highly relevant to the modern themes of globalisation, de-localisation, and the decline of community, helping to set such changes and their consequences into local historical perspective.
