Skateboarding is both a sport and a way of life. Creative, physical, graphic, urban and controversial, it is full of contradictions – a billion-dollar global industry which still retains its vibrant, counter-cultural heart. Skateboarding and the City presents the only complete history of the sport, exploring the story of skate culture from the surf-beaches of '60s California to the latest developments in street-skating today. Written by a life-long skater who also happens to be an architectural historian, and packed through with full-colour images – of skaters, boards, moves, graphics, and film-stills – this passionate, readable and rigorously-researched book explores the history of skateboarding and reveals a vivid understanding of how skateboarders, through their actions, experience the city and its architecture in a unique way.

The Legacy of Warren Bolster : Master of Skateboard Photography

The story of the simple skateboard is part thriller, part underground, underdog success tale. It's chock-full of innovations, far-out graphic artistry, and ever-more-incredible hot-dogging feats. And the story's told in this book with contributions from the stars themselves—Tony Hawk, Stacey Peralta, Jeff Ho, the Dogtown Z-Boys, and more. Beautifully illustrated with historical posters, ads, and memorabilia along with new action photography, studio skateboard shots, and unique portraits of the stars, this is a fitting tribute to an American classic.

The Fun of Figure Skating

Southern California is the birthplace of skateboard culture and, even though skateparks may be found worldwide today, it is where these parks continue to flourish as architects, engineers and skateboarders collaborate to refine their designs. The artist Amir Zaki grew up skateboarding, so he has an understanding of these spaces and, as someone who has spent years photographing the built and natural landscape of California, he has a deep appreciation of the large concrete structures not only as sculptural forms, but also as significant features of the contemporary landscape, belonging to a tradition of architecture and public art. To capture the images in this book, Zaki photographed in the early-morning light, climbing inside the bowls and pipes while there were no skaters around. Each photograph is a composite of dozens of shots taken with a digital camera mounted on a motorized tripod head. The resulting images are incredibly high resolution and can be printed at a large scale with no loss of detail. Their look is unusual in that Zaki's lens is somewhat telephoto, which has the effect of flattening space, yet the angle of view is often quite wide, which exaggerates spatial depth. The technology also allows Zaki to photograph certain areas from difficult positions that would otherwise be impossible to capture. Zaki makes the point that, by climbing deep inside these spaces, the visual experience is fundamentally different from viewing them from outside. In his text, Tony Hawk - one of world's best-known professional skateboarders - describes how Zaki's photographs of empty skateparks and open skies evoke memories of the idyllic freedom and the sense of potential that he felt when he first visited a skatepark as a child and saw skaters flying like birds in and out of the concrete pools and bowls. Hawk has

skated in some of the parks featured in this book, and for him several of Zaki's images, taken from the skater's perspective, recall the experience of trying to learn a particular trick. A beautiful full pipe that looks like a barrelling wave may be, for Hawk and other seasoned skateboarders, a perfect example of function and form fitting together flawlessly in a well-designed skatepark. In his essay, the Los Angeles-based architect Peter Zellner offers a different perspective. Skateparks are made by excavating large open areas of land within city parks. The forms inside them may represent ocean waves, mountainous terrain and other features from nature, but they are permanently frozen in cement like Brutalist architecture. Every shape, line, transition, hip, tombstone, coping, stair, flow, tile, bowl, pipe, spine, rail, ledge, roll-in, kidney, clover, square and bank serves a specific purpose - to provide a challenging thrill and maximum pleasure for the rider. In this sense, skateparks epitomize function over form. In Zaki's mesmerizing photographs, however, these concrete landscapes suggest a more complex and integrated relationship with the history of design and architecture in Southern California.

The issues explored are: what mediated popular culture says about women and their roles in contemporary society; whether and how the mediated representation of women addresses real women's goals and potential; how the popular media negotiate the tension between cultural constraint and social changes within their portrayal of women; and whether women are still the victims of symbolic annihilation by the media."--BOOK JACKET.

The dazzling smile, the signature haircut, the staple spin. "America's Sweetheart" Dorothy Hamill grew up on the ice, working toward the dream she was to accomplish by age nineteen: winning Olympic gold in figure skating. But life was not the picture of perfection it appeared to be. Dorothy faced a painful inner struggle from the time she was a young girl that followed her into adulthood--though she would not know about the depression that ran in her family until much later in life. Weeks and months away from home to train and compete took a difficult toll, yet little reprieve could be found in the tumultuous

and fragile relationship she had with her parents. Dorothy went on to marry the man of her dreams, only to have the partnership end in heartache and a tragedy that almost pushed her to her breaking point. Then, just when a light at the end of the tunnel finally began to appear, a second failed marriage tried and tested Dorothy's trust and strength yet again--a travesty that could have led her to give up. But, she found a remarkable strength in what she did have--her greatest love, her daughter Alexandra. "Thank goodness, I had my skating. There was certainly a pattern to my life. When times were tough, I went skating. It was only while I was out on the ice, enjoying the freedom of movement and my love of music, that I was able to escape from my bottomless heartache." In her deeply moving and honest memoir, Dorothy opens up for the first time about love, family, courage, and what it means to truly win both on and off the ice.

Olympic medalist Adam Rippon has been making it pretty for the judges even when, just below the surface, everything was an absolute mess. Beautiful on the Outside looks at his journey from a homeschooled kid in Scranton, Pennsylvania, to a self-professed American sweetheart on the world stage and all the disasters and self-delusions it took to get him there. Yeah, it may be what's on the inside that counts, but life is so much better when it's beautiful on the outside.
