Bad days are just part of life. But for the characters highlighted in Matthew Braga's short story collection, their bad days are just a little bit worse. A husband who wants nothing more than to reconnect with his wife after realizing their marriage is in a slump finally finishes a long-awaited backyard project, only to discover that no matter how much he thinks he knows, sometimes he is not in charge—or in control of anything. When a wife is ill in bed, her husband quietly creeps around the house hoping not to disturb her, but after they have a disastrous meeting in the bathroom, he heads outside where something unanticipated comes down—right on her prized flower garden. When a couple moves into a new house, a stray cat soon makes it known that he is smarter than humans. Finally, a little boy who struggles with his difference discovers that he can do anything he wants if he has friends—and a good dream. *So You Think You're Having a Bad Day?* is a lighthearted collection of humorous vignettes with an important message that even the worst of days are survivable.

“Sarah and Beth are an absolute gift to our culture right now. Not only do they offer balanced perspectives from each political ideology, but they teach us how to dialogue well, without sacrificing our humanity.” —Jen Hatmaker, New York Times bestselling author, speaker, and founder of Legacy Collective
“Sarah from the left and Beth from the right serve as our guides through conflict and complexity, delivering us into connection. I wish every person living in the United States would read this compelling book, from the youngest voter to those holding the highest office.” —Emily P. Freeman, Wall Street Journal bestselling author of *Simply Tuesday* and *The Next Right Thing*
More than ever, politics seems driven by conflict and anger. People sitting together in pews every Sunday have started to feel like strangers, loved ones at the dinner table like enemies. Toxic political dialogue, hate-filled rants on social media, and agenda-driven news stories have become the new norm. It’s exhausting, and it’s too much. In *I Think You’re Wrong (But I’m Listening)*, two working moms from opposite ends of the political spectrum contend that there is a better way. They believe that we can choose to respect the dignity of every person, choose to recognize that issues are nuanced and can’t be reduced to political talking points, choose to listen in order to understand, choose gentleness and patience. Sarah from the left and Beth from the right invite those looking for something better than the status quo to pull up a chair and listen to the principles, insights, and practical tools they have learned hosting their fast-growing podcast *Pantsuit Politics*. As impossible as it might seem, people from opposing political perspectives truly can have calm, grace-filled conversations with one another—by putting relationship before policy and understanding before argument.

50 musings on the self-appointed cool kids taking over your towns. Skinny jeans? Check. Thrift-store clothing? Check. Non-essential prescription glasses? Check. Beanie hat balanced artfully on the back of your skull? Check. These items have become the uniform for a new breed of young people—hipsters—determined to take over cities with their “alternative” ways while overloading on irony and striving to be original and creative. So You Think You’re a Hipster? examines what it takes to become one of this ever-growing tribe of young urbanites, just as desperate to be accepted by their peers as they are to receive the next rent check from mom and dad. A series of hilarious case studies will identify typical examples of the subculture, helping you to avoid any future encounters with them. Take the vintage store worker who, at 35, still works selling worn sneakers and threadbare t-shirts for extortionate amounts and still dreams of one day getting his latest album reviewed on Pitchfork. Or the aspiring author who lugs around an old-fashioned typewriter to write down her inspirational musings at a moment’s notice. Then there’s the bearded urban hunter dressed head to toe in workwear and outdoor gear despite the fact it’s the middle of summer. Basically there are nearly as many hipsters featured here as you would find at an LCD Soundsystem concert.

So You Think You're Human?

My motive for writing this book is to restore the unity of the African-American family. There are values that we have strayed away from. So many African-Americans are not getting married because they fear that it will not work out. For those that do get married, fewer and fewer of those marriages are lasting. A great number of people get married with the mindset that if it doesn’t work out they will just get a divorce. By having that mindset they are going into the marriage with an attitude of defeat. As I look around our nation, I see so many families breaking apart, thereby destroying future generations. We do what looks good, feels good, and whatever makes us happy as individuals. We are molding our next generation into self-centered out of control individuals going nowhere fast. The morals and values of our ancestors are almost extinct. The desire of my heart is for us to stop hurting and damaging one another. It’s a catastrophic domino effect that seems like a never ending nightmare! We have to take the time to sit back and realize our selfishness only preps the next person for the same, or preps them to feel there’s no way out of being nice and loving people and getting hurt, being someone’s doormat! I wish to help restore the worth of our men and women; to revive the black community, putting things into proper perspective so that people who get married can STAY married, and for those that aren’t married and are afraid of the marriage failing, to break free of that fear and fulfill their desire to be married. We don’t have to accept a dysfunctional family as the norm! In order to establish and maintain a healthy family, our perspective on life has to be positive, with one main ingredient: love. It is the responsibility of each individual to do what’s necessary to build a strong foundation that will solidify a successful relationship and/or marriage, even while you are still single. It breaks my heart to see so many unhappy people. Whether they are unhappily married or unhappily single, many are miserable and have no clue as to why. In this book I will lay out some things very clearly, step by step, to help you understand why marriages fail, relationships crumb, and fear so gruesomely imprisons us.

So, You Think You're Alone

So, You Think You're Psychic?

The author's intent is to call into question the validity of a belief about human nature that enjoys almost universal acceptance. He contends that there is a huge difference between the "good" people we think we are, and what we're really like. He hopes this book will challenge us to evaluate ourselves and our core values. This book is about us—our humanity and our inhumanity, our selflessness and our self-centeredness, our compassion and our indifference. It is about the age old question of what we're really like in the depths of our being. Most assume that, "basically, we're good people." Isn't that just the way it is? Isn't that what everybody thinks? If someone feels like their self-image, integrity or reputation is being threatened, we often hear them say, "I'm a good person!" It would be pretty hard to live with yourself if you weren't able to maintain some semblance of self-worth. We've taken it for granted that, "basically, we're good people." Something we've just assumed to be a given has been elevated to the status of truth. The reader will be asked to do some soul searching as to the validity of this widely held belief. Two key factors in making any assessment of whether or not we're "good people" are the standard by which we measure ourselves with respect to charitable giving and volunteerism. The reader is challenged to reevaluate their standard of what a good person is. Furthermore, this book asks the reader to take action based on their understanding of what it means to be a good person. Do you want to go with the flow, or start struggling against the strong cultural currents of ethics, morals and values that seek to pull us along with everyone else? His reason for writing is that he hurts for and is concerned about those who are less fortunate, those dying from starvation or disease and those living in conditions that make it difficult to maintain any semblance of dignity and hope. He challenges the reader to use their potential to help the suffering, the abandoned and the destitute. The book addresses many current high-visibility issues that are relevant and part of today's conversation: income inequality and the wealth gap, the fading of the American Dream and the decline of the middle-class, government regulation and the Volcker rule, bank penalties for actions taken during the mortgage crisis and the anniversary of Lyndon Johnson's declaration of a War on Poverty, Congressional gridlock and, most of all, Pope Francis' emphasis on the need to care for the poor and the marginalized. The dynamics involved in these issues demonstrate the author's belief about the nature of man, reflected in lives that are characterized by self-interest, greed and indifference. We have this tendency to look out not just for the needs of ourselves and our own, but also our wants, at the expense of the unmet needs of others - many of whom are living in misery and despair. This book gives his perspective on how all of these issues fit into the big picture of the meaning of life.

This book draws back the curtain on the author's life and lets in the light of God's grace which is always sufficient for us whatever we are facing. When God gave Helen a vision, it was at one of the lowest points of her life. She was excited as the vision revealed something of the future God had planned for her. When she shared the vision with some friends they laughed at her. "Why would God give you a ministry and a house?" They asked. At that time her self-esteem was very low, so Helen agreed with them. Why would the Lord give her a big house and a husband as well as a ministry? This only happened to special people and she wasn't one of those, were her thoughts. She was a nobody, with little or no future! They were right. So she laid the vision down believing it to be impossible, but Helen reckoned without God, a fatal mistake! When two months later the Lord spoke into her life, telling her to pick the vision up again. She was delighted. This time she took hold of it with both hands, and determined that she would not let go of it again, no matter what it cost her. Little did she know it would almost cost her, her life!

So You Think You're a Foodie

It seems all too many of us choose to live our lives without God. Modesty and morality are no longer important. Get as much pleasure, accumulate as many material objects, value no one other than ourselves, and live as though death has no hold on us. What's the big deal if we saturate our minds with porno morning, noon, and night? Whom are we hurting if we engage in illicit sex, as long as our partner is willing? If the female gets pregnant just go to the local suck clinic and have the kid aborted. It's no big deal. We've got all these freedoms, you see. The law says it's okay. Important people are our spokespersons, telling us that it's our right to decide certain life and death issues for ourselves. Hey, life is good. If anyone tries to give us any static about what we say or

do, we've got some gutless politicians to straighten things out. One day all of us will discover that man's law is not God's law. And then our asses have had it. We're going to be judged on everything we ever thought, said, or did. And then it will be time to pay the price for the way we chose to live our lives. We rejected God, and now Hell has nothing to do with us. Hell is for eternity!

The mining industry has been tackling the issue of gender for almost 25 years. But very little has changed. So you think you're tough: Getting serious about gender in mining brings together many of Dean Laplonge's ideas and consulting experiences on gender and mining. In this book, he criticises the mining industry's obsession with "women in mining", and bemoans the lack of attention that is paid in this industry to broader research on gender. Drawing on ideas from the fields of gender studies and cultural studies, Dean creates a new vision for gender in the mining industry which promises to break through the current impasse. Out is the old view of gender which relies on a distinct separation of men from women. And in comes a new view of gender which focuses on multiple and diverse ways of acting out as men and women. The shift appears simple, as we move from being genders to doing genders. But the

application in the mining industry is proving to be difficult, not least because it demands we think about gender in terms of men and masculinities. This book provides practical ways for mining companies to start introducing this new vision of gender into their workplaces. By focusing on the relationships between gender and safety, and gender and leadership, Dean argues we can begin to understand how mining is already gendered. And we can then finally start to develop real gender diversity on mine sites.

Ekina was made in America with African parts, but unfortunately this has never made him indestructible. Precocious at ten years old, Ekina knows that physical strength won't help him fend off his overbearing parents, cruel teachers, and one-sided romance. It won't help him save his baby sister from their traditionally-misogynist father or protect his little brother from their mother's expectations either, although it might've helped him master an adagio--if he hadn't quit ballet class.
