Entrepreneur and bestselling author of *The Lean Startup*, Eric Ries reveals how entrepreneurial principles can be used by businesses of all kinds, ranging from established companies to early-stage startups, to grow revenues, drive innovation, and transform themselves into truly modern organizations, poised to take advantage of the enormous opportunities of the twenty-first century. In *The Lean Startup*, Eric Ries laid out the practices of successful startups – building a minimal viable product, customer-focused and scientific testing based on a build-measure-learn method of continuous innovation, and deciding whether to persevere or pivot. In *The Startup Way*, he turns his attention to an entirely new group of organizations: established enterprises like iconic multinationals GE and Toyota, tech titans like Amazon and Facebook, and the next generation of Silicon Valley upstarts like Airbnb and Twilio. Drawing on his experiences over the past five years working with these organizations, as well as nonprofits, NGOs, and governments, Ries lays out a system of entrepreneurial management that leads organizations of all sizes and from every industry to sustainable growth and long-term impact. Filled with in-the-field stories, insights, and tools, *The Startup Way* is an essential road map for any organization navigating the uncertain waters of the century ahead.

Advances in Accounting Education

Now in its Third Edition, *Financial Accounting* by Kimmel, Weygandt, and Kieso has been tested and approved in the classroom. This best-selling text has helped students hit the road with a practical set of tools, and the confidence they need to use those tools effectively in making business decisions. *Financial Accounting* provides students with an understanding of those concepts that are fundamental to the use of accounting. Starting with a "macro" view of accounting information, the authors present real financial statements and establish how a financial statement communicates the financing, investing, and operating activities of a business to users of accounting information. They motivate students by grounding the discussion in the real world, showing them the relevance of the topics covered to their future career. The authors identify a finite set of tools necessary to make business decisions based on financial information: The Decision Toolkit. This toolkit is consistently re-introduced throughout the text, logically sequenced to take full advantage of the tools presented in earlier chapters, and summarized in the final chapter. This thorough integration of the use of financial statements for decision-making makes this one of the most user-oriented texts available today. This joint publication of the United Nations, the European Commission, the International Monetary Fund, the Organization for Economic Cooperation and Development, and the World Bank reflects the changes and improvements that have been introduced to the System of National Accounts since its most recent revision in 1993. The System of National Accounts 2008 (2008 SNA) is a statistical framework that provides a comprehensive, consistent and flexible set of macroeconomic accounts for policymaking, analysis and research purposes. The 2008 SNA is expected to receive distinguished attention not only from professionals practicing in the field of national accounts but policy makers, analysts, academia and a broad range of users who rely on macroeconomic information obtainable from the updated system of accounts. It also provides an overarching framework for standards in other domains of economic statistics, facilitating the integration of these statistical systems to achieve consistency with national accounts. The publication that contains the 2008 SNA has been substantially updated from its previous version as a result of a multiyear collaborative project. Annex 3 of the publication provides a detailed description of the new features of the 2008 SNA. The 2008 SNA will support the implementation of international standards in national accounting and provide the methodological basis for improving the international comparability of national accounts data. When adopting the 2008 SNA as the updated new standard of national accounting, the United Nations Statistical Commission encouraged all countries to compile and report their national accounts on the basis of the 2008 SNA as soon as possible. The publication also provides practical new tools to complement the previously published version: a glossary of SNA terms and definitions and a comprehensive index.

This new and expanded edition builds upon the first edition's accessible and comprehensive overview of the interdisciplinary field of sustainability. The focus is on furnishing solutions and equipping the student with both conceptual understanding and technical skills for the workplace. Each chapter explores one aspect of the field, first introducing concepts and presenting issues, then supplying tools for working toward solutions. Techniques for management and measurement as well as case studies from around the world are provided. The second edition includes a complete update of the text, with increased coverage of major topics including the Anthropocene; complexity; resilience; environmental ethics; governance; the IPCC's latest findings on climate change; Sustainable Development Goals; and new thinking on native species and novel ecosystems. Chapters include further reading and discussion questions. The book is supported by a companion website with links, detailed reading lists, glossary, and additional case studies, together with projects, research problems, and group activities, all of which focus on real-world problem solving of sustainability issues. The textbook is designed to be used by undergraduate college and university students in sustainability degree programs and other programs in which sustainability is taught.

This study examines the emergence of new forms of Islamic spirituality in Indonesia identified as Majlis Dhikr. These Majlis Dhikr groups have proliferated on Java in the last two decades, both in urban and rural areas, and have attracted followers from a wide social background. The diverse aspects of these Majlis Dhikr groups - their rituals, teachings and strategies of dissemination as well as the popular understanding of these rituals and their contestation by critics and opponents - are examined in detail and illustrated by reference to three particular groups - Salawat Wahidiyat, Istighathat Ihsaniyyat and Dhikr al-Ghafilin each of which has its own distinctive features and notable religious leadership. These Majlis Dhikr groups regard their activities as legitimate ritual practices that are in accordance with the legacy of Islamic Sufism based on the interpretation of the Qur'anic and Prophetic tradition.

Sustainability Principles and Practice

Audit professionals are valued members of society and are expected to be both skilled and ethical in their decision-making. The role of the auditor extends far beyond that of counting beans by demanding a social and political awareness, a technical knowledge, ethical principles and relationship skills. In addition, due to the team-oriented nature of the audit approach, auditors require strong team-building and interpersonal skills. This book offers expert descriptions of, and insights into, how such skills and responsibilities can be inculcated in tertiary education and professional training environments. Unlike other books which focus on auditing as a technical process, this volume examines auditing from a teaching and learning perspective. Expert contributors provide authoritative insights into an audit education which is embedded in accounting practice. The book's descriptions of these insights into improving education for future audit professionals may allow the introduction of new and challenging fields of enquiry. Audit Education will be of great interest to educators in tertiary institutions, trainers in professional firms, and key individuals in accounting professional bodies seeking to ensure their members possess acceptable levels of attainment for admission and continued membership. This book was originally published as a special issue of Accounting Education: an international journal.
