### Listening to Wild Dolphins

. . . a collection of wonderful and encouraging stories about 'Animal Assisted Therapy.' - Stanley Coren, author of *The Intelligence of Dogs*  
This inspiring, humorous, and touching book celebrates the beneficial effects that animals have on humans and describes how their healing potential is being increasingly acknowledged by the medical community. Animal Assisted Therapy, an important new development in health care, has already shown that people are statistically less likely to suffer an early heart attack if they have a pet, and that stroking an animal actually reduces stress levels. This, however, is only the tip of the iceberg, says environmental psychologist Bernie Graham. Animal Assisted Therapy is now achieving amazing results in treating children with physical and mental disabilities by using trained dolphins in aquatic therapy. There are also programs that teach dogs to help the disabled by taking laundry out of the washing machine; selecting, unpacking, and paying for items in the supermarket; and even withdrawing money from the bank. Cats, rabbits, and dogs are now taken into hospitals to comfort the patients, and more exotic animals such as ferrets, donkeys, guinea pigs, monkeys, and even tigers are being used to bring hope to individuals, thereby enhancing human efforts. Written with warmth and compassion, *Creature Comfort* looks at all aspects of Animal Assisted Therapy, including the theories behind it, to provide both a practical guide and a moving account of the many rewarding human-animal interactions. A must for pet lovers, health care workers, and anyone who wishes to benefit from this most holistic of therapies. Bernie Graham, an environmental psychologist, is a member of the British Psychological Society, the International Society for Anthrozoology, and the Society for Companion Animal Studies.

### Dance to a Dolphin's Song

In this memorable first book, *Behind the Dolphin Smile*, Richard O'Barry told the inspiring story of his personal transformation from world-famous dolphin trainer (Flipper was his pupil) to dolphin liberator. Now, in *To Free a Dolphin*, he passionately recounts the dramatic story of his heart-breaking campaign to release captive dolphins back into the wild. With wit and insight he chronicles the extreme opposition he has faced from bureaucrats, major players in the captive-dolphin industry, rival wildlife groups, and well-meaning sentimentalists. He introduces readers to famous show animals he has helped, including Bogie and Bacall of Key Largo. And, most fascinating, he describes his struggles to deprogram and rehabilitate dolphins emotionally scarred from years of captivity--struggles that become battles for the animals' souls.

Journey with Linda Shay into the pristine tropical waters of Hawaii where she communes, up close and personal, with a pod of wild Hawaiian spinner dolphins. Discover how one moment, with one dolphin, changes her life forever. Return with Linda to her high desert home in Sedona, Arizona, and walk by her side as she discovers she has been initiated into a unique spiritual path, guided by the Dolphin Consciousness. Witness the beginning of Dolphin Energy Healing, an intuitive energy healing modality, as Linda learns she has been activated by the dolphins to serve as a vehicle for their beautiful healing frequencies. Through interdimensional encounters with the dolphins on land, and magical close encounters with the dolphins in the sea, Linda becomes a bridge between the worlds of humans and dolphins. The bond of healing and love that has been forged unites her eternally with her beloved family of the sea. This touching and inspiring glimpse into Linda's journey with the dolphins opens a doorway into the realm of possibility. It offers an expanded view of who these endearing dolphins really are. It serves as a clear demonstration of the dolphins' desire and ability to heal the human heart, helping us achieve higher states of peace, love, and joy. This is a true story that takes place on land, in the sea, and in the realm of spirit in other dimensions of reality. Linda wrote this book with the intention that each reader would co-create their own unique spiritual adventure story with the dolphins. Many have reported receiving unexpected healings and energy transmissions while reading this book. "Dolphin Love From Sea to Land is a spellbinding adventure of personal growth and transformation. Through a deep and enduring relationship with dolphins, Linda finds her life changed in ways that are unimaginable and delightful. Dolphin Love opened my heart in new and profound ways, rekindling my longing for oneness and expanding my vision and understanding of these amazing beings. This journey into the world of human/dolphin relations demonstrates that dolphins can be a path to spiritual awakening. It's time to dive in!" - Mary J. Getten, Marine Naturalist, Animal Communicator and author of *Communicating with Orcas: The Whales' Perspective*

### The Dolphin Lady

After studying dolphins for many years, Dr Horace Dobbs came to the conclusion that these highly intelligent mammals were using their brains in a way that could benefit human beings. To test his theory he decided to step outside the confines of his scientific training and film an experiment for television. That film, "The Dolphin's Touch", records how he invited three people suffering from different forms of stress and depression to swim with a wild dolphin off the Irish coast. In the case of the middle-aged man the encounter had a dramatic effect, while the outlook of two younger participants improved significantly. For Dr Dobbs they served to confirm other similar transformations and persuaded him that it might be possible, through video film and audio tapes of dolphin song, to bring the healing power of dolphins to anyone unable to experience it at first hand. The result leaves, he argues, little room for doubt that dolphins can generate a sense of well-being in people. In this book the author conveys not only the joy to be experienced when cavorting in the sea with a wild dolphin, he also provides clues to the mental dexterity and perception of one of the smallest of the whale family.

The informative and witty expose of the "bad science" we are all subjected to, called "one of the essential reads of the year" by New Scientist. We are obsessed with our health. And yet — from the media's "world-expert microbiologist" with a mail-order Ph.D. in his garden shed laboratory, and via multiple health scares and miracle cures

— we are constantly bombarded with inaccurate, contradictory, and sometimes even misleading information. Until now. Ben Goldacre masterfully dismantles the questionable science behind some of the great drug trials, court cases, and missed opportunities of our time, but he also goes further: out of the bullshit, he shows us the fascinating story of how we know what we know, and gives us the tools to uncover bad science for ourselves. From the Hardcover edition.

Does living with a pet really make people happier and healthier? What can we learn from biomedical research with mice? Who enjoys a better quality of life— the chicken destined for your dinner plate or the rooster in a Saturday night cockfight? Why is it wrong to eat the family dog? Drawing on more than two decades of research into the emerging field of anthrozoology, the science of human – animal relations, Hal Herzog offers an illuminating exploration of the fierce moral conundrums we face every day regarding the creatures with whom we share our world. Alternately poignant, challenging, and laugh-out-loud funny—blending anthropology, behavioral economics, evolutionary psychology, and philosophy—this enlightening and provocative book will forever change the way we look at our relationships with other creatures and, ultimately, how we see ourselves.

The revolutionary, highly effective technique that allows you to free yourself from emotional hang-ups—forever! Does your fear of flying make travel with friends and family impossible? Are you having trouble coping with the loss of a loved one or forgiving yourself for a mistake you made long ago? For the millions of people who suffer from phobias, anxieties, or distressing emotions such as anger, guilt, and grief, the breakthrough science of Thought Field Therapy—an easy-to-use practice often referred to as “ acupressure for the emotions ” —can make a remarkable difference. In this groundbreaking book, psychologists Peter Lambrou and George Pratt make their highly successful techniques available to everyone through simple exercises that anyone can use to treat everyday emotional roadblocks with immediate and permanent results. A blend of Western psychotherapy and Chinese medicine, Thought Field Therapy (or TFT) uses the body ' s meridian energy systems to treat emotional issues that can take years to unravel through traditional, talk-based therapy. A combination of breathing and relaxation exercises, affirmations, and tapping on specific pressure points on the body, TFT can instantly eliminate problems such as a fear of flying or public speaking, addictive urges, or painful emotions such as embarrassment or regret. Used on thousands of people with a 95 percent success rate, the step-by-step methods in Instant Emotional Healing now allow you to master this amazingly simple, astonishingly effective practice for yourself—and open the door to a lifetime of emotional control and well-being.

## Souls in the Sea

Internationally renowned dolphin expert Dr Horace Dobbs tells the incredible story of over two decades' work with dolphins and reveals new research that shows how dolphins can inspire us not only with their beauty and intelligence; they can also heal us physically and emotionally. Dobbs explores possible scientific explanations for the healing power of dolphins which he supports with many heart-warming tales of personal transformation. These stories include that of Bill who, after swimming with

dolphins, was completely cured after 12 years of depression; Lilo who's terminal cancer regressed; and the incredible story of Eve, a severely autistic girl who uttered her first word, 'good', after meeting a dolphin. The book also examines the success of organised dolphin healing around the world including the work of the famous Dolphin Healing Centre in Kyoto, Japan. Inspiring and deeply moving, Dolphin Healing heralds a breathtaking new development in communications between humans and dolphins.

### Encyclopedia of North American Mammals

What if whales and dolphins truly do have a superior intellect, as many believe, and can speak to the human race? What would their message be? In November 2008, gifted clairvoyant Patricia Cori was in Jordan teaching a workshop when a life-changing event occurred. A community of Cetaceans— “ a choir of whales and dolphins, ” as she describes it—interrupted her talk with a frantic plea for help. Cori was suddenly witness to a devastating scene of suffering, a communal grieving of scores of whales and dolphins “ frenzied, lost, and dying. ” This was the first of several terrifying calls for help, all of which were immediately followed by mass suicide events as these majestic creatures collectively chose to leave us and our planet. These troubling incidents evolved into the stream of messages for humanity that Cori reveals in this extremely timely work. The whales and dolphins present their deep understanding of our urgent global situation, calling for the human race to restore balance to our ecosystems—especially our dying oceans. For the first time, we read the communications of the Cetaceans and their story of devotion and celebration of life on the Great Planet Earth. We are also given a glimpse of their role in the unfolding of galactic events throughout our solar system, and the message is clear: We must wake up and realize that our continued abuse of the environment is altering the course of Gaia ’ s progression to the next dimension. Without the whale and dolphin song—without these musicians who hold the oceans in balance—we risk our advancement through the ascension process for which our entire solar system is

destined. Before We Leave You is a roadmap to that higher future and a pathway to global transformation. \*\*\*NOTE: ELECTRONIC VERSION OF THIS TITLE DOES NOT INCLUDE THE CETACEAN MEDITATIONS CARDS INCLUDED IN THE REGULAR PRINTED VERSION.

### The Hidden Powers of Animals

#### Island of the Blue Dolphins

From Susan Casey, the New York Times bestselling author of *The Wave* and *The Devil's Teeth*, a breathtaking journey through the extraordinary world of dolphins. Since the dawn of recorded history, humans have felt a kinship with the sleek and beautiful dolphin, an animal whose playfulness, sociability, and intelligence seem like an aquatic mirror of mankind. In recent decades, we have learned that dolphins recognize themselves in reflections, count, grieve, adorn themselves, feel despondent, rescue one another (and humans), deduce, infer, seduce, form cliques, throw tantrums, and call themselves by name. Scientists still don't completely understand their incredibly sophisticated navigation and communication abilities, or their immensely complicated brains. While swimming off the coast of Maui, Susan Casey was surrounded by a pod of spinner dolphins. It was a profoundly transporting experience, and it inspired her to embark on a two-year global adventure to explore the nature of these remarkable beings and their complex relationship to humanity. Casey examines the career of the controversial John Lilly, the pioneer of modern dolphin studies whose work eventually led him down some very strange paths. She visits a community in Hawaii whose adherents believe dolphins are the key to spiritual enlightenment, travels to Ireland, where a dolphin named as "the world's most loyal animal" has delighted tourists and locals for decades with his friendly antics, and consults with the world's leading marine researchers, whose sense of wonder inspired by the dolphins they study increases the more they discover. Yet there is a dark side to our relationship with dolphins. They are the stars of a global multibillion-dollar captivity industry, whose money has fueled a sinister and lucrative trade in which dolphins are captured violently, then shipped and kept in brutal conditions. Casey's investigation into this cruel underground takes her to the harrowing epicenter of the trade in the Solomon Islands, and to the Japanese town of Taiji, made famous by the Oscar-winning documentary *The Cove*, where she chronicles the annual slaughter and sale of dolphins in its narrow bay. Casey ends her narrative on the island of Crete, where millennia-old frescoes and artwork document the great Minoan civilization, a culture which lived in harmony with dolphins, and whose example shows the way to a more enlightened coexistence with the natural world. No writer is better positioned to portray these magical creatures than Susan Casey, whose combination of personal reporting, intense scientific research, and evocative prose made *The Wave* and *The Devil's Teeth* contemporary classics of writing about the sea. In *Voices in the Ocean*, she has written a thrilling book about the other intelligent life on the planet. From the Hardcover edition.
