The Black Word Search Puzzle was a concept that was developed from the question: How do you integrate history into ordinary activities? As it goes, the idea arose and an African-American oriented word search puzzle began its long process of creation. Over time, I began to play with the idea of graphics and came up with the icon of the African pick or comb, which

seemed appropriate in that it lent itself to a double meaning when placed in this context -- the word search puzzle being a combing through process. The Black Word Search Puzzle is both an entertaining and educational word game that gives players, young and old, an opportunity to learn about a bit of Black history and African geography.

When you think of a map of the United States, what do you see? Now think of the Seattle that begot Jimi Hendrix. The Dallas that shaped Erykah Badu. The Holly Springs, Mississippi, that compelled Ida B. Wells to activism against lynching. The Birmingham where Martin Luther King, Jr., penned his most famous missive. Now how do you see the United States? *Chocolate Cities* offers a new cartography of the United States—a “Black Map” that more accurately reflects the lived experiences and the future of Black life in America. Drawing on cultural sources such as film, music, fiction, and plays, and on traditional resources like Census data, oral histories, ethnographies, and health and wealth data, the book offers a new perspective for analyzing, mapping, and understanding the ebbs and flows of the Black American experience—all in the cities, towns, neighborhoods, and communities that Black Americans have created and defended. Black maps are consequentially different from our current geographical understanding of race and place in America. And as the United States moves toward a majority minority society, *Chocolate Cities* provides a broad and necessary assessment of how racial and ethnic minorities make and change America’s social, economic, and political landscape.

statement on African American English. Enriched by her evocative and inimitable prose style, the study presents an overview of past debates on the speech of African Americans, as well as providing a vision for the future. Featuring cartoons which demonstrate the relationship between language and race, as well as common perceptions of African American Language, she explores its contribution to mainstream American English and includes a summary of expressions as a suggested linguistic core of AAL. As global manifestations of Black Language increase, she argues that, through education, we must broaden our conception of AAL and its speakers, and further examine the implications of gender, age and class on AAL. Perhaps most of all we must appreciate the 'artistic and linguistic genius' of AAL, presented in this book through rap and Hip Hop lyrics and the explorations of rhyme and rhetoric in the Black speech community. *Word from the Mother* is an essential read for students of African American English, language, culture and sociolinguistics, as well as the general reader interested in the worldwide 'crossover' of black popular culture.

Europe, but was adapted by African American congregations and went on to have a profound influence on music of all kinds—from gospel to soul to jazz. "Lining out," also called Dr. Watts hymn singing, refers to hymns sung to a limited selection of familiar tunes, intoned a line at a time by a leader and taken up in turn by the congregation. From its origins in seventeenth-century England to the current practice of lining out among some Baptist congregations in the American South today, William Dargan's study illuminates a unique American music genre in a richly textured narrative that stretches from Isaac Watts to Aretha Franklin and Ornette Coleman. *Lining Out the Word* traces the history of lining out from the time of slavery, when African American slaves adapted the practice for their own uses, blending it with other music, such as work songs. Dargan explores the role of lining out in worship and pursues the cultural implications of this practice far beyond the limits of the church, showing how African Americans wove African and European elements together to produce a powerful and unique cultural idiom. Drawing from an extraordinary range of sources—including his own fieldwork and oral sources—Dargan offers a compelling new perspective on the emergence of African American music in the United States. Educator's Sourcebook of African American Heritage

This book is a multifaceted approach to understanding the central developments in African American history since 1939. It combines a historical overview of key personalities and movements with essays by leading scholars on specific facets of the African American experience, a chronology of events, and a guide to further study. Marian Anderson's famous 1939 concert in front of the Lincoln Memorial was a watershed moment in the struggle for racial justice. Beginning with this event, the editors chart the historical efforts of African Americans to address racism and inequality. They explore the rise of the Civil Rights and Black Power movements and the national and international contexts that shaped their ideologies and methods; consider how changes in immigration patterns have complicated the conventional "black/white" dichotomy in U.S. society; discuss the often uneasy coexistence between a growing African American middle class and a persistent and sizable underclass; and address the complexity of the contemporary African American experience. Contributors consider specific issues in African American life, including the effects of the postindustrial economy and the influence of music, military service, sports, literature, culture, business, and the politics of self-designation, e.g., "Colored" vs. "Negro," "Black" vs. "African American". While emphasizing political and social developments, this volume also illuminates important economic, military, and cultural themes. An invaluable resource, *The Columbia Guide to African American History Since 1939* provides a thorough understanding of a crucial historical period.
