### **Josef, the Indy Car Driver**

This New York Times Notable Book from the #1 New York Times bestselling author of *The Underground Railroad* is a brisk, comic tour de force about identity, history, and the adhesive bandage industry. The town of Winthrop has decided it needs a new name. The resident software millionaire wants to call it New Prospera; the mayor wants to return to the original choice of the founding black settlers; and the town's aristocracy sees no reason to change the name at all. What they need, they realize, is a nomenclature consultant. And, it turns out, the consultant needs them. But in a culture overwhelmed by marketing, the name is everything and our hero's efforts may result in not just a new name for the town but a new and subtler truth about it as well.

### **Uncanny Valley**

A future winter November 2018. The Eye of Heaven—a prototype Chinese satellite with next generation technology falls and is lost in the polar icecap. The race begins when two superpowers face off, one to learn secrets, the other to keep them. And they will send their greatest weapons wielded by their fiercest warriors to reach the prize. Special Agent Greg Cole, a man of lethal skill, pathological appetites, and a Machiavellian intellect, who engineered the theft of the satellite. For him, retrieving its secrets would be a career-making coup and nothing; no one was going to stand in his way—friend, foe, or innocent bystander. SEAL Command Master Chief Carter Bohem—an aging warrior given one final chance to prove he can still run with

the wolves, never questioned his orders or his purpose . . . until this mission. Until his orders called for murder. Colonel Xiang Lai Peng of the People's Republic of China—Tasked by his government to retrieve the satellite at all costs, this elite unit commander will lead his men into an unimaginable nightmare where the price of success will be all too high. Captain Marcus Cartaneo USN—Commander of the USS Seawolf, a submarine bristling with a frightening array of weaponry and the combined technological might of a superpower. Yet, its weakness lies in the tragedy haunted crew on the verge of mutiny against a commanding officer who has lost their trust. But natural enemies are the least of their worries for as the Arctic winter storms close in; something else has awakened deep within the ice. An elder force that once roamed ancient seas with impunity, now consigned to the realm of myth and legend has returned. The stories speak of its savagery; pure, insatiable and untainted by conscience or reason yet possessing immense power and fearsome intelligence. In this cold, unforgiving wasteland, man and machine will come face to face with a malevolent, unrelenting entity who will hunt them across ice, across oceans to the very doorstep of their homes. Only the survivor, only the triumphant will be the Apex Predator.

One of Amazon's Best 100 Books of 2020. A New York Times Book Review Editors' Choice and a January 2020 IndieNext Pick. "A definitive document of a world in transition: I won't be alone in returning to it for clarity and consolation for many years to come." --Jia Tolentino, author of *Trick Mirror: Reflections on Self-Delusion* The prescient, page-turning account of a journey in Silicon Valley: a defining memoir of our digital age In her mid-twenties, at the height of tech industry idealism, Anna Wiener--stuck, broke, and looking for meaning in her work, like any good millennial--left a job in book publishing for the promise of the new digital economy. She moved from New York to San Francisco, where she landed at a big-data startup in the heart of the Silicon Valley bubble: a world of surreal extravagance, dubious success, and fresh-faced entrepreneurs hell-bent on domination, glory, and, of course, progress. Anna arrived amidst a massive cultural shift, as the tech industry rapidly transformed into a locus of wealth and power rivaling Wall Street. But amid the company ski vacations and in-office speakeasies, boyish camaraderie and ride-or-die corporate fealty, a new Silicon Valley began to emerge: one in far over its head, one that enriched itself at the expense of the idyllic future it claimed to be building. Part coming-of-age-story, part portrait of an already-bygone era, Anna Wiener's memoir is a rare first-person glimpse into high-flying, reckless startup culture at a time of unchecked ambition, unregulated surveillance, wild fortune, and accelerating political power. With wit, candor, and heart, Anna deftly charts the tech industry's shift from self-appointed world savior to democracy-endangering liability, alongside a personal narrative of aspiration, ambivalence, and disillusionment. Unsparing and incisive, *Uncanny Valley* is a cautionary tale, and a revelatory interrogation of a world reckoning with consequences its unwitting designers are only beginning to understand.

Note: The third edition of this book is now available ISBN: 978-1936754106 in both paperback and eBook formats Beyond the Force.com documentation - Second edition Advanced Apex Programming for Salesforce.com and Force.com is neither a tutorial nor a book for beginners. Intended for developers who are already familiar with the Apex language, and experienced Java and C# developers who are moving to Apex, this book starts where the Force.com documentation leaves off. Instead of trying to cover all of the features of the platform, Advanced Apex programming focuses entirely on the Apex language and core design patterns. You'll learn how to truly think in Apex - to embrace limits and bulk patterns. You'll see how to develop architectures for efficient and reliable trigger handling, and for asynchronous operations. You'll discover that best practices differ radically depending on whether you are building software for a specific organization or for a managed package. And you'll find approaches for incorporating testing and diagnostic code that can dramatically improve the reliability and deployment of Apex software, and reduce your lifecycle and support costs. Based on his experience as a consultant, Force.com MVP and architect of a major AppExchange package, Dan Appleman focuses on the real-world problems and issues that are faced by Apex developers every day, along with the obscure problems and surprises that can sneak up on you if you are unprepared.

This book is for anyone who wants to become a web developer but is scared of writing tons of code and is looking for the easiest track to start with. I got the idea for this book from my neighbor's son who was studying computer science. Few months ago he approached me to discuss his IT project. He was very dejected and from his discussion I realized that the cause of his depression was the platform he was using to create the project, which involved lots of coding. Choosing such heavy coding platforms for absolute beginners is not a good idea - they need something very simple to get on the track. Keeping in view the scenario, I compiled this book for everyone (especially teens) to make programming fun for them rather than a nightmare. Oracle APEX is a low-code application development framework. Low-code is a software development approach that enables the delivery of applications faster and with minimal hand-coding. Low-code framework helps you create complete applications visually with the help of drag-and-drop interface and wizards. Rather than writing thousands of lines of complex code and syntax, low-code platforms allow you to build complete applications with modern user interfaces, integrations, data and logic quickly and visually. Oracle APEX is one such area. You can use Oracle APEX free of charge - either as part of an existing Oracle Database license or running in the free Oracle Database 18c XE product. Oracle APEX empowers you to build incredible apps and solve real problems. And you won't need to become an expert in a vast array of web technologies. Oracle APEX is capable to do the heavy lifting for you. You just need to focus on the problem to be solved. This book is written for people of any age who have a desire to become web developer. The main objective of this book is to give you a jump-start in the exciting world of web application development and to make you a web application developer in a short time span. If you start learning to develop web apps today, you can actively perform your role in this fast-changing world. It is the skill of the 21st century. Organizations today need more problem-solving ability than ever before, and almost every career opportunity involves technology as a mandatory prerequisite. It is the only occupation that doesn't need master or doctoral degrees. Mark Zuckerberg developed Facebook in 2004 when he was a college student. In 2014, 1.4 billion people were using Facebook every month. Facebook demonstrates the power of technology to engage billions and to reach more people. Mark just spent his time doing things that interested him and he did them obsessively because it was fun. Don't try to be someone else. Be yourself. You can't create the Big Thing right now, but you can create the few small things, and bring them up so they grow bigger. If you haven't started creating something yet, get started now! I welcome you to the exciting world of web application development. If you need any kind of assistance from me, just give me a shout via my email address - I'm always available to help you out.

Says the author "This book is not written for the members of fringe political groups, such as the Weatherman, or The Minutemen. Those radical groups don't need this book. They already know everything that's in here. If the real people of America, the silent majority, are going to survive, they must educate themselves. That is the purpose of this book." In what the author considers a survival guide, there is explicit information on the uses and effects of drugs, ranging from pot to heroin to peanuts. There i detailed advice concerning electronics, sabotage, and surveillance, with data on everything from bugs to scramblers. There is a comprehensive chapter on natural, non-lethal, and lethal weapons, running the gamut from cattle prods to sub-machine guns to bows and arrows.

Alcoholics Anonymous (also known as the Big Book in recovery circles) sets forth cornerstone concepts of recovery from alcoholism and tells the stories of men and women who have overcome the disease. The fourth edition includes twenty-four new stories that provide contemporary sharing for newcomers seeking recovery from alcoholism in A.A. during the early years of the 21st century. Sixteen stories are retained from the third edition, including the "Pioneers of A.A." section, which helps the reader remain linked to A.A.'s historic roots, and shows how early members applied this simple but profound program that helps alcoholics get sober today. Approximately 21 million copies of the first three editions of "Alcoholics Anonymous" have been distributed. It is expected that the new fourth edition will play its part in passing on A.A.'s basic message of recovery. This fourth edition has been approved by the General Service Conference of Alcoholics Anonymous, in the hope that many more may be led toward recovery by reading its explanation of the A.A. program and its varied examples of personal experiences which demonstrate that the A.A. program works.

The Apex Book of World SF, edited by Lavie Tidhar, features award-winning science fiction and fantasy short stories from Asia, Eastern Europe and around the world. The world of speculative fiction is expansive; it covers more than one country, one continent, one culture. Collected here are sixteen stories penned by authors from Thailand, the Philippines, China, Israel, Pakistan, Serbia, Croatia, Malaysia, and other countries across the globe. Each one tells a tale breathtakingly vast and varied, whether caught in the ghosts of the past or entangled in a postmodern age. Among the spirits, technology, and deep recesses of the human mind, stories abound. Kites sail to the stars, technology transcends physics, and wheels cry out in the night. Memories come and go like fading echoes and a train carries its passengers through more than simple space and time. Dark and bright, beautiful and haunting, the stories herein represent speculative fiction from a sampling of the finest authors from around the world.
