'Your father's not your father': when DNA tests reveal

The agency's new Homeland Advanced Recognition Technology (HART) database will include multiple forms of biometrics—from face recognition to DNA, data from questionable sources, and highly personal data on innocent people. It will be shared with federal agencies outside of DHS as well as state and local law enforcement and foreign governments.

The Dna Of Relationships

This "DNA-matching" can throw up previously unknown or unacknowledged brothers and sisters, cousins, uncles and aunts ... or even reveal that the man

you call dad is not your biological father.

TikTok user claims DNA test reveals dad isn't related to

DNA Sibling Tests: Testing Brother or Sister Relationships. A DNA sibling test compares the genetic material (DNA) of one person to that of another person to determine the likelihood that they are related biologically as siblings. In most cases, sibling tests are performed to determine paternity—whether or not the two individuals have the
