"Mental Health Care for Urban Indians: Clinical Insights From Native Practitioners is the first clinical book written by American Indian scholars working in Indian communities. This groundbreaking volume provides the reader with a basic understanding of the historical impact of colonization, the ensuing results of urban migration and boarding schools, and the effects that these events have had on the Native community. These lingering effects include a lack of cultural identity, a loss of tradition, and a sense of isolation that may lead to violence, alcoholism, and risky behaviors. Chapter authors acknowledge this history while developing culturally sensitive practice recommendations that incorporate traditional healing methods. This will be an invaluable resource for psychologists and other helping professionals who work with Native clients"--Jacket. (PsycINFO Database Record (c) 2006 APA, all rights reserved)

"We take the greatest pleasure in presenting this latest and best work from the pen of William Walker Atkinson. It embodies the essence of years of thought, study, and experiment on the part of its author whose original research, discoveries, and writings along these lines have given him his worldwide reputation as an authority. It is his Masterpiece. A portion of its material was used in two of the author's previous works, vis., "Mental Magic," and "Mental Fascination," both of which works were published by ourselves. Both of the said works are now practically out of print, and will be withdrawn from sale by us, as they will be superseded by this newer and more complete work. This foundation material has been edited; added to; changed; improved; and corrected by the author, in accordance with his increased experience and knowledge of the subject. Obsolete matter has been replaced by entirely new material, and the work is now strictly "up-to-date". It is encyclopaedic in extent and character, every phase of the subject being considered by the author

and expressed in words charged with his dynamic vitality. It contains matter that well might have been expanded into several volumes"--Foreword.

"The present treatise, contains a Systematic Exposition of Mind, a History of the leading Questions in Mental Philosophy, and a copious Dissertation on Ethics. The Exposition of Mind, occupying nearly half the work, is, for the most part, an abridgement of my two volumes on the subject. I have singled out, and put in conspicuous type, the leading positions; and have given a sufficient number of examples to make them understood. It is not to be expected that the full effect of the larger exposition can be produced in the shorter; still, there may be an occasional advantage in the more succinct presentation of complicated doctrines. As regards the Controverted Questions, I have entered fully into the history of opinion, so as to present the different views, both formerly, and at present, entertained on each. Nominalism and Realism, the Origin of Knowledge in the mind, External Perception, Beauty, and Freewill, are the chief subjects thus treated"--Preface. The research evaluated the effects of mental ability on the gunnery performance of 19K One Station Unit Training (OSUT) soldiers. Five hundred forty-seven soldiers were given a 35-engagement tank gunnery test on the high-fidelity Institutional-Conduct of Fire Trainer (I-COFT). The I-COFT test included offensive and defensive engagements fired in normal and degraded operational modes. The primary analysis compared speed and accuracy performance as a function of mental category as derived from General Technical (GT) scores. The test scores were also used as parameter estimates in a soldier performance model based on Lanchester-type combat attrition models. OSUT soldiers with higher mental ability were faster and more accurate on the I-COFT test than were soldiers with lower mental ability. Mental category I & II soldiers hit 14% more targets than category IV soldiers and were 2 seconds faster. The effects of mental ability were relatively the same for both normal and degraded mode exercises. Analyses based on the soldier performance model indicated that category IV soldiers performed at 73% of category I & II soldiers. Keywords: Armor; Personnel selection; Gunnery prediction; Unit conduct of fire trainer; Performance(human).

### Hearst's Magazine

This book explores, in depth, the link between modern psychiatric practice and the person-centred approach. It promotes an open dialogue between traditional rivals - counsellors and psychiatrists within the NHS - to assist greater understanding and improve practice. Easy to read and comprehend, it explains complex issues in a clear and accessible manner. The author is a full-time psychiatrist and qualified counsellor who offers a unique perspective drawing on personal experience. Humanising Psychiatry and Mental Health Care will be of significant interest and help to all mental health professionals including psychiatrists and psychiatric nurses, social care workers, occupational therapists, psychologists, person-centred counsellors and therapists. Health and social care policy makers and shapers, including patient groups, will also find it helpful and informative. Courageous, a striking commentary. Embodies a hope and a vision which can vanquish despair. This book is the story of what it has meant for the psychiatrist/person-centred counsellor to remain hopeful and resilient in the face of the ever-deepening crisis in the powerfully drug-orientated and medicalised world of NHS psychiatry. We glimpse a future where psychiatrists and person-centred therapists will collaborate in the healing of persons. Books like this keep the vision alive and serve as beacons in the current darkness.' Brian Thorne, in his Foreword Rachel is an excoriatingly honest writer. Brave and unsettling. This is not a book for the faint-hearted. There is no easy framework here to aid your understanding of the medical world and your role in it. The book offers no theoretical asylum from the sneers of those who criticise the person-centred approach for its lack of objectivity. It is a tough philosophy, confident in its assertion of subjective principles and everything that flows from them. It provides no guarantee of success and no insurance against failure. B
